IoT and Cloud Computing Advancements in Vehicular Ad-Hoc Networks Sep 07 2020 The optimization of traffic management operations has become a considerable challenge in today's global scope due to the significant increase in the number of vehicles, traffic congestions, and automobile accidents. Fortunately, there has been substantial progress in the application of intelligent computing devices to transportation processes. Vehicular ad-hoc networks (VANETs) are a specific practice that merges the connectivity of wireless technologies with smart vehicles. Despite its relevance, empirical research is lacking on the developments being made in VANETs and how certain intelligent technologies are being applied within transportation systems. *IoT and Cloud Computing Advancements in Vehicular Ad-Hoc Networks* provides emerging research exploring the theoretical and practical aspects of intelligent transportation systems and analyzing the modern techniques that are being applied to smart vehicles through cloud technology. Featuring coverage on a broad range of topics such as health monitoring, node localization, and fault tolerance, this book is ideally designed for network designers, developers, analysts, IT specialists, computing professionals, researchers, academics, and post-graduate students seeking current research on emerging computing concepts and developments in vehicular ad-hoc networks.

Object-Oriented Programming in Turbo C++ Mar 14 2021 Object-Oriented Programming (OOP) is the most dramatic and potentially confusing-innovation in software development since the dawn of the computer age. Based on the idea of treating functions and data as objects, OOP results in programs that are more flexible, more easily maintained, and, on the whole, more powerful. Suitable for students, hackers, and enthusiasts, Object-Oriented Programming in Turbo C++ is written by best-selling author Robert Lafore. Step-by-step lessons teach the Basics of Object-Oriented Programming with Turbo C++ and its new Windows-compatible sibling, Borland C++. Object-Oriented Programming in Turbo C++ focuses on C++ as a separate language, distinct from C, and assumes no prior experience with C.
