Practical Handbook of Microbiology Aug 09 2020 The field of microbiology has developed considerably in the last 20 years, building exponentially on its own discoveries and growing to encompass many other disciplines. Unfortunately, the literature in the field tends to be either encyclopedic in scope or presented as a textbook and oriented for the student. Finding its niche between these two pol

Management of Common Musculoskeletal Disorders Aug 01 2022 The fundamental textbook of orthopedic physical therapy is now in its thoroughly updated Fourth Edition. This new edition presents a "how-to" approach focusing on the foundations of manual therapy. More than 1,200 illustrations and photographs demonstrate therapeutic techniques. Extensive references cite key articles, emphasizing the latest research. Reflecting current practice standards, this edition places

greater emphasis on joint stabilization techniques and the role of exercise. Coverage includes new material on soft tissue manipulations and myofascial evaluation. This edition also features case studies covering real-life practice scenarios.

Manual of Numerical Methods in Concrete Oct 03 2022 Manual of numerical methods in concrete aims to present a unified approach for the available mathematical models of concrete, linking them to finite element analysis and to computer programs in which special provisions are made for concrete plasticity, cracking and crushing with and without concrete aggregate interlocking. Creep, temperature, and shrinkage formulations are included and geared to various concrete constitutive models.

Manual of Pediatric Intensive Care Jul 20 2021 Complete with Free CD-rom!!! This new manual is a practical, bedside guide to care of patients in the Paediatric ICU. Paediatric patients are very different than adults, and knowing this difference is never more critical than in the ICU. The fundamentals come first: sepsis, managing fluids and electrolytes, maintaining the airway and assessment of cardiovascular performance. After this, problems are organised by system: neurology, endocrine disorders, and the acute abdomen are a few of the topics covered. Trauma

has a separate section, covering injuries to major body systems and injuries caused by burns, accidents, frostbite, lightning strikes and other events. Following this, the manual has three outstanding features: a section on procedures, such as chest tube insertion and subdural taps; a pharmacopoeia, detailing the critical dosing numbers needed for safe, effective therapy; and a section with algorithms, including decision trees from the American Heart Association. In all, few manuals pack as much information, for such an attractive price, as this one.
