German and Austrian-German Historical Thought

in the Modern Era Apr 09 2021 Every nation develops a narrative structure for thinking about history that is generated by its own historical experience. In this study, the German and Austrian-German "historias"—the way narratives of factual significance are structured as the "story" of events—are shown in their sameness from the late 1600s to the present. This "historia" shapes the emphasis of how meaning is articulated among the historians of a society. The author argues that German and Austrian-German societies would benefit from understanding the constrictions and oversights generated by the narrative style of their traditional historias.

Revolutionary Armies in the Modern Era Feb 07

2021 This presents a major re-evaluation of the standard view of revolutionary armies, the range of attitudes towards the role of heroic individuals, the formation and leadership of armies, and the differences and similarities between such armies. Beginning with an exploration of the New Model Army of the 1640s, a force whose name itself seems to denote its revolutionary credentials, the author presents ten case studies from around the globe,

including the American War of Independence, The French Revolution, The Zulu-Boer War, the Waffen SS and the Viet-Cong. Through a detailed analysis of source material, he examines the images connected with these armies, both historical and recent, and assesses these images in their socio-political and nationalist contexts.

Traditional and Indigenous Knowledge for the

Modern Era Apr 28 2020 While there is talk of the Fourth Industrial Revolution, old and new challenges bedevil the world – climate change, nutrition, and health poverty being at the top of the list. In seeking solutions to these and other problems which afflict the modern era, it is worthwhile to look into our collective past, to the traditions and knowledges of our ancestors. Such knowledge continues to exist in many parts of the world, though now marginalized by homogenous, Eurocentric ontology and epistemology. This book presents a compilation of reviews, case studies, and primary research attempting to locate the utility of traditional and Indigenous Knowledges in an increasingly complex

world. It assembles chapter authors from across the world to tackle topics ranging from traditional knowledge-based innovations and commercialization, traditional medicine systems as practiced around the world, ethnoveterinary practices, and food innovation to traditional governance and leadership systems, among others. This book is an important resource for policymakers; scholars and researchers of cultural studies, leadership, governance, ethnobotany, anthropology, plant genetic resources and technology innovation; and readers interested in the history of knowledge and culture, as well as cultural activists and political scientists. Features: Unique combination of social science and anthropological aspects with natural science perspectives Includes summaries aimed at policymakers to immediately see what would be relevant to their work Combines case studies illuminating important lessons learned with reviews and primary data Multidisciplinary in the scope of the topics tackled and assemblage of contributors Global footprint with contributions from Africa, Europe, North America, Asia, and the West Indies David R. English in Modern Times Nov 16 2021 English in Modern Times describes the development of the English language from 1700 until 1945, and argues that it is in the course of this later modern English period that the characteristics of 'modern' English evolved. This is the first undergraduate text to cover the whole of this important period, which has been called the 'Cinderella' of English historical linguistics because of its lack of representation in scholarly literature. This book is sociohistorical in orientation, arguing that social changes in the Anglophone world need to be taken into account if we are to understand the linguistic changes that occurred during this period. Further chapters deal with changes in vocabulary, syntax and morphology and phonology and with the attempts of lexicographers, grammarians and elocutionists to arrest and control these changes by codifying the language. Unlike

many earlier histories of English, 'English in Modern Times' does not define 'English' as confined to Standard (English) English, but also considers the development of extraterritorial Englishes and non-standard varieties of British English in the Later Modern period.

Men, Machines, and Modern Times Sep 02 2020

Men, Machines, and Modern Times, though ultimately concerned with a positive alternative to an Orwellian 1984, offers an entertaining series of historical accounts taken from the nineteenth century to highlight a main theme: the nature of technological change, the fission brought about in society by such change, and society's reaction to that change. Beginning with a remarkable illustration of resistance to innovation in the U.S. Navy following an officer's discovery of a more accurate way to fire a gun at sea, Elting Morison goes on to narrate the strange history of the new model steamship, the Wapanoag, in the 1860s. He then continues with the difficulties confronting the introduction of the pasteurization process for milk; he traces the development of the Bessemer process; and finally, he considers the computer. While the discussions are liberally sprinkled with amusing examples and anecdotes, all are related to the more profound and current problem of how to organize and manage system of ideas, energies, and machinery so that it will conform to the human dimension.

A History of Modern Africa Nov 04 2020 The new, fully-updated edition of the acclaimed textbook covering 200 years of African history *A History of Modern Africa* explores two centuries of the continent's political, economic, and social history. Audience and Reception in the Early Modern Period Mar 28 2020 "Early modern audiences, readerships, and viewerships were not homogenous. Differences in status, education, language, wealth, and experience (to name only a few variables) could influence how a group of people, or a particular person, received and made sense of sermons, public proclamations, dramatic and musical performances, images, objects, and spaces. The ways in which each of these were framed and executed could have a serious impact on their relevance and effectiveness. The chapters in this

volume explore the ways in which authors, poets, artists, preachers, theologians, playwrights, and performers took account of and encoded pluriform potential audiences, readers, and viewers in their works, and how these varied parties encountered and responded to these works. The contributors here investigate these complex interactions through a variety of critical and methodological lenses"--

The New Cambridge Modern History: Volume 2, The Reformation, 1520-1559 Jan 18 2022 This is the second, amended and enlarged edition of a familiar standard work, first published in 1958. Like its predecessor, it describes the open conflicts of the Reformation from Luther's first challenge to the uneasy peace of the 1560s. Reforming movements in all the principal countries are discussed against the background of constitutional development and the political struggles of the ruling dynasties. Europe's relations with the outside world are given due prominence. The second edition incorporates the results of some thirty years of further research and fills some of the gaps, especially in the history of central Europe, which beset the first edition. All chapters that remain from 1958 have been revised, some very substantially, while other contributions are wholly new. The only other volume of The New Cambridge History planned to appear in a second

edition is Volume I: The Renaissance scheduled for 1991.

Executing Magic in the Modern Era Feb 19 2022

This book is open access under a CC BY 4.0 license

This book explores the magical and medical history of executions from the eighteenth to the early twentieth century by looking at the afterlife potency of criminal corpses, the healing activities of the executioner, and the magic of the gallows site. The use of corpses in medicine and magic has been recorded back into antiquity. The lacerated bodies of Roman gladiators were used as a source of curative blood, for instance. In early modern Europe, a great trade opened up in ancient Egyptian mummies and the fat of executed criminals, plundered as medicinal cure-alls. However, this is the first book to consider the demand for the blood of the executed, the desire for human fat, the resort to the hanged man's hand, and the trade in hanging rope in the modern era. It ends by look at the spiritual afterlife of dead criminals.

American History Oct 03 2020

Socrates Jul 24 2022 A brilliant portrait of the Greek philosopher who personified philosophy. Socrates was undeniably one of the greatest thinkers of all time, yet he wrote nothing. Throughout his life, and indeed until his very last moment alive, Socrates fully embodied his philosophy in thought and deed. It is through the story of his life that we can fully grasp his powerful actions and ideas. In his highly acclaimed style, historian Paul Johnson masterfully disentangles centuries of scarce sources to offer a riveting account of a homely but charismatic middle-class man living in Athens in the fifth century b.c., and how what this man thought still shapes the way we decide how to act, and how we fathom the notion of body and soul. Johnson provides a compelling picture of the city and people Socrates reciprocally delighted in, as well as many enlightening and intimate analyses of specific aspects of his personality. Enchantingly portraying "the sheer power of Socrates's mind, and its unique combination of steel, subtlety, and frivolity," Paul Johnson captures the vast and intriguing life of a man who did nothing less than supply the basic

apparatus of the human mind.

Available in both one-volume and two-volume paperback editions, A History of Modern Europe presents a panoramic survey of modern Europe from the Renaissance to the present day. A single author lends a unified approach and consistent style throughout, with an emphasis on the connections of events and people over time. The Third Edition, like the two before it, is authoritative and up-to-date.

New to the Third Edition is the theme of empire. From the imperial rivalries between France and Spain in the sixteenth and seventeenth centuries, through the rise and fall of the Ottoman Turkish empire, and on into the imperial history of the twentieth century—decolonization, the spread of the Soviet empire, and the imperial power of the United States—the theme of empire helps students find commonalities among the events of European history.

Transnational Perspectives on Modern Irish History

Aug 01 2020 This book explores the benefits and challenges of transnational history for the study of modern Ireland. In recent years the word "transnational" has become more and more conspicuous in history writing across the globe, with scholars seeking to move beyond national and local frameworks when investigating the past. Yet transnational approaches remain rare in Irish historical scholarship. This book argues that the broader contexts and scales associated with transnational history are ideally suited to open up new questions on many themes of critical importance to Ireland's past and present. They also provide an important means of challenging ideas of Irish exceptionalism. The chapters included here open up new perspectives on central debates and events in Irish history. They illuminate numerous transnational lives, follow flows and ties across Irish borders, and trace networks and links with Europe, North America, the Caribbean, Australia and the British Empire. This book provides specialists and students with examples of different concepts and ways of doing transnational history. Non-specialists will be interested in the new perspectives offered here on a rich variety of topics, particularly the two major events in modern Irish history, the Great Irish Famine and the 1916 Rising.

The Curse of Ham in the Early Modern Era Oct 15 2021 For hundreds of years, the biblical story of the Curse of Ham was marshalled as a justification of serfdom, slavery and human bondage. According to the myth, having seen his father Noah naked, Ham's is cursed to have his descendants be forever slaves. In this new book the Curse of Ham is explored in its Reformation context, revealing how it became the cornerstone of the Christian defence of slavery and the slave trade for the next four hundred years. It shows how broader medieval interpretations of the story became marginalized in the early modern period as writers such as Annius of Viterbo and George Best began to weave the legend of Ham into their own books, expanding and adding to the legend in ways that established a firm connection between Ham, Africa, slavery and race. For although in the original biblical text Ham himself is not cursed and race is never mentioned, these writers helped develop the story of Ham into an ideological and theological defence for African slavery, at the

precise time that the Transatlantic Slave Trade began to establish itself as a major part of the European economy during the sixteenth and seventeenth centuries. Skilfully weaving together elements of theology, literature and history, this book provides a fascinating insight into the ways that issues of religion, economics and race could collide in the Reformation world. It will prove essential reading, not only for those with an interest in early modern history, but for anyone wishing to try to comprehend the origins of arguments used to justify slavery and segregation right up to the 1960s.
