[The Heron's Cry](#) Oct 31 2022 New York Times bestseller Ann Cleeves returns with *The Heron's Cry*, the extraordinary follow-up to *The Long Call*, soon to be a major TV series, alongside her two hit TV shows *Shetland* and *Vera*. "In Matthew Venn, Ann has created a complex, daring, subtle character." --Louise Penny
A complex mystery full of surprises . . . this character-driven exploration of people's darkest flaws is a sterling example of Cleeves' formidable talents. --Kirkus Reviews
North Devon is enjoying a rare hot summer with tourists flocking to its coastline. Detective Matthew Venn is called out to a rural crime scene at the home of a group of artists. What he finds is an elaborately staged murder--Dr Nigel Yeo has been fatally stabbed with a shard of one of his glassblower daughter's broken vases. Dr. Yeo seems an unlikely murder victim. He's a good man, a public servant, beloved by his daughter. Matthew is unnerved, though, to find that she is a close friend of Jonathan, his husband. Then another body is found--killed in a similar way. Matthew soon finds himself treading carefully through the lies that fester at the heart of his community and a case that is dangerously close to home. DI Matthew Venn returns in *The Heron's Cry*, in Ann Cleeves powerful next novel, proving once again that she is a master of her craft. A Macmillan Audio production from Minotaur Books

[God in the Enlightenment](#) Sep 25 2019 We have long been taught that the Enlightenment was an attempt to free the world from the clutches of Christian civilization and make it safe for philosophy. The lesson has been well learned. In today's culture wars, both liberals and their conservative enemies, inside and outside the academy, rest their claims about the present on the notion that the Enlightenment was a secularist movement of philosophically driven emancipation. Historians have had doubts about the accuracy of this portrait for some time, but they have never managed to furnish a viable alternative to it--for themselves, for scholars interested in matters of church and state, or for the public at large. In this book, William J. Bulman and Robert G. Ingram bring together recent scholarship from distinguished experts in history, theology, and literature to make clear that God not only survived the Enlightenment but thrived within it as well. The Enlightenment was not a radical break from the past in which Europeans jettisoned their intellectual and institutional inheritance. It was, to be sure, a moment of great change, but one in which the characteristic convictions and traditions of the Renaissance and Reformation were perpetuated to the point of transformation, in the wake of the Wars of Religion and during the early phases of globalization. The Enlightenment's primary imperatives were not freedom and irreligion but peace and prosperity. As a result, Enlightenment could be Christian, communitarian, or authoritarian as easily as it could be atheistic, individualistic, or libertarian. Honing in on the intellectual crisis of the late seventeenth and early eighteenth centuries while moving from Spinoza to Kant and from India to Peru, *God in the Enlightenment* takes a prism to the age of lights.

Principles for Dealing with the Changing World Order Jul 04 2020 From legendary investor Ray Dalio, author of the international bestseller *Principles*, who has spent half a century studying global economies and markets, *Principles for Dealing with the Changing World Order* examines history's most turbulent

economic and political periods to reveal why the times ahead will likely be radically different from those we've experienced in our lifetimes - but similar to those that have happened many times before. A few years ago, Ray Dalio noticed a confluence of political and economic conditions he hadn't encountered before. They included huge debts and zero or near-zero interest rates that led to massive printing of money in the world's three major reserve currencies; big political and social conflicts within countries, especially the US, due to the largest wealth, political and values disparities in more than 100 years; and the rising of a world power (China) to challenge the existing world power (US) and the existing world order. The last time that this confluence occurred was between 1930 and 1945. This realisation sent Dalio on a search for the repeating patterns and cause/effect relationships underlying all major changes in wealth and power over the last 500 years. In this remarkable and timely addition to his *Principles* series, Dalio brings readers along for his study of the major empires - including the Dutch, the British and the American - putting into perspective the 'Big Cycle' that has driven the successes and failures of all the world's major countries throughout history. Dalio reveals the timeless and universal forces behind these shifts and uses them to look into the future, offering practical principles for positioning oneself for what's ahead.

[Why Popcorn Costs So Much at the Movies](#) Aug 29 2022 This entertaining book seeks to unravel an array of pricing puzzles from the one captured in the book's title to why so many prices end with "9" (as in \$2.99 or \$179). Along the way, the author explains how the 9/11 terrorists have, through the effects of their heinous acts on the relative prices of various modes of travel, killed more Americans since 9/11 than they killed that fateful day. He also explains how well-meaning efforts to spur the use of alternative, supposedly environmentally friendly fuels have starved millions of people around the world and given rise to the deforestation of rainforests in Malaysia and Indonesia.

Human Rights Litigation against Multinationals in Practice May 02 2020 This book provides a thorough review of multinational human rights litigation in various countries where such litigation has been pursued, predominantly on behalf of victims in the Global South. It covers cases relating to environmental damage, occupational disease, human rights abuses involving complicity with state security, and in the context of supply chains. The volume is edited by Richard Meeran, who pioneered the first series of tort-based multinational parent company cases in the 1990s and whose firm, Leigh Day, has been at the forefront of this area for almost 30 years. Contributions come from highly experienced legal practitioners in the countries in question who have run many of the key ground-breaking cases, and who understand the opportunities and hurdles that arise in practice. They provide their perspectives and insights into the features of the relevant laws, procedures, and practical considerations in their respective legal systems. Chapters address the potential legal remedies that are available; the legal, procedural, and practical obstacles to justice including funding; as well as strategic issues. This developing area of corporate legal accountability has increasingly become an integral part of the field of business and human rights, which has grown significantly in recent decades. This collection is an essential guide to the field.

Code and the City Dec 09 2020 Software has become essential to the functioning of cities. It is deeply embedded into the systems and infrastructure of the built environment and is entrenched in the management and governance of urban societies. Software-enabled technologies and services enhance the ways in which we understand and plan cities. It even has an effect on how we manage urban services and

utilities. Code and the City explores the extent and depth of the ways in which software mediates how people work, consume, communication, travel and play. The reach of these systems is set to become even more pervasive through efforts to create smart cities: cities that employ ICTs to underpin and drive their economy and governance. Yet, despite the roll-out of software-enabled systems across all aspects of city life, the relationship between code and the city has barely been explored from a critical social science perspective. This collection of essays seeks to fill that gap, and offers an interdisciplinary examination of the relationship between software and contemporary urbanism. This book will be of interest to those researching or studying smart cities and urban infrastructure.

Race and Arab Americans Before and After 9/11 Jun 26 2022 Bringing the rich terrain of Arab American histories to bear on conceptualizations of race in the United States, this groundbreaking volume fills a critical gap in the field of U.S. racial and ethnic studies. The articles collected here highlight emergent discourses on the distinct ways that race matters to the study of Arab American histories and experiences and asks essential questions. What is the relationship between U.S. imperialism in Arab homelands and anti-Arab racism in the United States? In what ways have the axes of nation, religion, class, and gender intersected with Arab American racial formations? What is the significance of whiteness studies to Arab American studies? Transcending multiculturalist discourses that have simply added on the category "Arab-American" to the landscape of U.S. racial and ethnic studies after the attacks of September 11, 2001, this volume locates September 11 as a turning point, rather than as a beginning, in Arab Americans'

God's Feminist Movement Oct 07 2020 Experience True Liberation by Seeing Your Beauty, Femininity, and Freedom From Heavens Point of View Has Christianity kept women trapped in the stone age? In many ways, yes; but this is not by God's design. As society offers women opportunities to explore outer-space and govern nations, the church often stifles and limits them. The tide is changing, though. Amber Picotas God's Feminist Movement is a new covenant manifesto calling women to embrace their true identity in Christ and fulfill their destiny as revolutionaries who shape the course of history with the Kingdom of God. There is a powerful new feminist movement emerging in the body of Christ. Its not politically driven and its not being championed by an uprising of angry man-haters. Based on an intense study of Scripture, factoring in historical and contextual hermeneutics and original languages, Picota shares a practical, non-legalistic, and non-traditional (yet deeply Biblical) look at topics that women commonly face, such as: Dating and Modesty Female Leaders in the Church Submission in Marriage Beauty and Self-Image Celebrate the power and beauty of womanhood. God has given you permission to change the world by being you! Break off religious traditions that keep women trapped in old school legalism and move beyond Christian clichés that minimize a woman's true position in Christ!
