Link Arms with Toads! Oct 10 2020 Self-reflective mirrors looking for their own reflections. Towns that migrate to the moon. Prisoners of elaborate dungeons and gigantic miniature solar systems. Robots, ghosts, rascals, explorers, troubadours, apemen and yetis. All are present in the multiverse of inversion and invention that is *Link Arms with Toads!* Rhys Hughes is a unique figure in contemporary fiction whose speculative whimsicality is not so much balanced as trampolined by tensile prose and puckish pensiveness. *Link Arms with Toads!* forms the ideal introduction to his work.

The Return of Carvajal Jul 19 2021 In 2017, the New York Times announced that the long-lost memoir of Luis de Carvajal the Younger had been rediscovered. Considered the first autobiography by a Jew in the Americas, the book had been stolen decades earlier from Mexico's National Archives. Here, Ilan Stavans recounts the extraordinary and entertaining story of the reappearance of this precious object and how its discovery opened up new vistas onto the world of secret Jews escaping the Spanish Inquisition. Called *el Mozo* (the Younger) to distinguish him from an uncle of the same name who was governor of Nuevo León, Luis de Carvajal learned of his Jewishness after being raised a Catholic. He came to recognize himself as a messiah for fellow crypto-Jews, and he was burned at the stake on December 8, 1596, in the biggest auto-da-fé in all of Latin America. His memoir—a 180-page manuscript written by a crypto-Jew targeted by the Holy Office of the Inquisition for unlawful proselytizing activities—was not only distinct but of enormous value. With characters such as conniving academics embroiled in a scholarly feud, a magnanimous philanthropist, naïve booksellers, and a secondary cast that could be taken from a David Lynch film, *The Return of Carvajal* recounts the global intrigue that placed crypto-Jewish culture at the heart of contemporary debates on religion and identity.

Risk Profiling and Tolerance: Insights for the Private Wealth Manager Jun 05 2020 If risk aversion and willingness to take on risk are driven by emotions and we as humans are bad at correctly identifying them, the finance profession has a serious challenge at hand—how to reliably identify the individual risk profile of a retail investor or high-net-worth individual. In this series of CFA Institute Research Foundation briefs, we have asked academics and practitioners to summarize the current state of knowledge about risk profiling in different key areas.

International Reflections on the Netherlands Didactics of Mathematics Jan 25 2022 This open access book, inspired by the ICME 13 Thematic Afternoon on “European Didactic Traditions”, takes readers on a journey with mathematics education researchers, developers and educators in eighteen countries, who reflect on their experiences with Realistic Mathematics Education (RME), the domain-specific instruction theory for mathematics education developed in the Netherlands since the late 1960s. Authors from outside the Netherlands discuss what aspects of RME appeal to them, their criticisms of RME and their past and current RME-based projects. It is clear that a particular approach to mathematics education cannot simply be transplanted to another country. As such, in eighteen chapters the authors describe how they have adapted RME to their individual circumstances and view on mathematics education, and tell their personal stories about how RME has influenced their thinking on mathematics education.

Classroom Wars Feb 11 2021 Natalia Petrzela explores how in the late 1960s and 1970s, a growing number of Americans fused conventional values about family and personal morality with an Anglo jingoism, specifically marrying concerns about sexuality and language and blurring the distinction between public and private. Focusing on Spanish-bilingual and sex education in California, this book charts how during a time of extraordinary social change, grass-roots citizens defined the schoolhouse and family as politicized sites.

Assyria to Iberia at the Dawn of the Classical Age Jun 25 2019 Bringing together the research of internationally renowned scholars, *Assyria to Iberia at the Dawn of the Classical Age* contributes significantly to our understanding of the epoch-making artistic and cultural exchanges that took place across the Near East and Mediterranean in the early first millennium B.C. This was the world of Odysseus, in which seafaring Phoenician merchants charted new nautical trade routes and established prosperous trading posts and colonies on the shores of three continents; of kings Midas and Croesus, legendary for their wealth; and of the Hebrew Bible, whose stories are brought vividly to life by archaeological discoveries. Objects drawn from collections in the Middle East, Europe, North Africa, and the United States, reproduced here in sumptuous detail, reflect the cultural encounters of diverse populations interacting through trade, travel, and migration as well as war and displacement. Together, they tell a compelling story of the origins and development of Western artistic traditions that trace their roots to the ancient Near East and across the Mediterranean world. Among the masterpieces brought together in this volume are stone reliefs that adorned the majestic palaces of ancient Assyria; expertly crafted Phoenician and Syrian bronzes and worked ivories that were stored in the treasuries of Assyria and deposited in tombs and sanctuaries in regions far to the west; and lavish personal adornments and other luxury goods, some imported and others inspired by Near Eastern craftsmanship. Accompanying texts by leading scholars position each object in cultural and historical context, weaving a narrative of crisis and conquest, worship and warfare, and epic and empire that spans both continents and millennia. Writing another chapter in the story begun in *Art of the First Cities* (2003) and *Beyond Babylon* (2008), *Assyria to Iberia* offers a comprehensive overview of art, diplomacy, and cultural exchange in an age of imperial and mercantile expansion in the ancient Near East and across the Mediterranean in the first millennium B.C.—the dawn of the Classical age.

The Spacious Word Nov 30 2019 *The Spacious Word* explores the history of Iberian expansion into the Americas as seen through maps and cartographic literature, and considers the relationship between early Spanish ideas of the world and the origins of European colonialism. Spanish mapmakers and writers, as Padrón shows, clung to a much older idea of space that was based on the itineraries of travel narratives and medieval navigational techniques. Padrón contends too that maps and geographic writings heavily influenced the Spanish imperial imagination. During the early modern period, the idea of "America" was still something being invented in the minds of Europeans. Maps of the New World, letters from explorers of indigenous civilizations, and poems dramatizing the conquest of distant lands, then, helped Spain to redefine itself both geographically and imaginatively as an Atlantic and even global empire. In turn, such literature had a profound influence on Spanish ideas of nationhood, most significantly its own. Elegantly conceived and meticulously researched, *The Spacious Word* will be of enormous interest to historians of Spain, early modern literature, and cartography.

Ascent to Glory Sep 08 2020 Gabriel García Márquez's novel *One Hundred Years of Solitude* seemed destined for obscurity upon its publication in 1967. The little-known author, small publisher, magical style, and setting in a remote Caribbean village were hardly the usual ingredients for success in the literary marketplace. Yet today it ranks among the best-selling books of all time. Translated into dozens of languages, it continues to enter the lives of new readers around the world. How did *One Hundred Years of Solitude* achieve this unlikely success? And what does its trajectory tell us about how a work of art becomes a classic? *Ascent to Glory* is a groundbreaking study of *One Hundred Years of Solitude*, from the moment García Márquez first had the idea for the novel to its global consecration. Using new documents from the author's archives, Álvaro Santana-Acuña shows how García Márquez wrote the novel, going beyond the many legends that surround it. He unveils the literary ideas and networks that made possible the book's creation and initial success. Santana-Acuña then follows this novel's path in more than seventy countries on five continents and explains how thousands of people and organizations have helped it to become a global classic. Shedding new light on the novel's imagination, production, and reception, *Ascent to Glory* is an eye-opening book for cultural sociologists and literary historians as well as for fans of García Márquez and *One Hundred Years of Solitude*.

Migrant Daughter May 05 2020 Taking us from the open spaces of rural New Mexico and the fields of California's Great Central Valley to the intellectual milieu of student life in Berkeley during the 1950s, this memoir, based on an oral history by Mario T. García, is the powerful and moving testimonio of a young Mexican American woman's struggle to rise out of poverty. *Migrant Daughter* is the coming-of-age story of Frances Esquibel Tywoniak, who was born in Spanish-speaking New Mexico, moved with her family to California during the Depression to attend school and work as a farm laborer, and subsequently won a university scholarship, becoming one of the few Mexican Americans to attend the University of California, Berkeley, at that time. Giving a personal perspective on the conflicts of living in and between cultures, this eloquent story provides a rare glimpse into the life of a young Mexican American woman who achieved her dreams of obtaining a university education. In addition to the many fascinating details of everyday life the narrative provides, Mario T. García's introduction contextualizes the place and importance of Tywoniak's life. Both introduction and narrative illustrate the process by which Tywoniak negotiated her relation to ethnic identity and cultural allegiances, the ways in which she came to find education as a channel for breaking with fieldwork patterns of life, and the effect of migration on family and culture. This deeply personal memoir portrays a courageous Mexican American woman moving between many cultural worlds, a life story that at times parallels, and at times diverges from, the real life experiences of thousands of other, unnamed women.

Cities and Nationhood Jan 31 2020 The Treaty of Paris in 1898 initiated America's administration of the Philippines. By 1905, Manila had been replanned and the city of Baguio built as expressions of colonial sovereignty and as symbols of a society disassociating itself from its hitherto "uncivilized" existence. Against this historical backdrop, Ian Morley undertook a thorough investigation to elucidate the meaning of modern American city planning in the Philippines and examine its dissemination throughout the archipelago with respect to colonial governmental ideals, social advancement, and the shaping of national identity. By focusing on the forces of the early years of American colonial rule, *Cities and Nationhood* offers a historical paradigm that not only re-grounds our grasp of Philippine cities, but also illuminates complex national identity movements and city design practices that were evident elsewhere during the early 1900s. *Cities and Nationhood* places the design of Philippine cities within a framework of America's distinct religious and racial identity, colonial politics, and local cultural expansion. In doing so, it expands knowledge about city planning—its influence and role—within national development by providing valuable insights into the nature of Philippine society during an era when America felt morally compelled to enact progressive civilization by instruction and example. Producing a new understanding of the role of America's colonial mission, the City Beautiful modern of urban design and Philippine cities, and the inclusions and exclusions

designed into their built forms, the author addresses two fundamental intellectual matters. First, the work recontextualizes the planning history of Philippine cities. Analysis of the ideals of nationalism and civility at a key period in Philippine history shifts scholarship on the plans of Philippine cities. Second, the book offers an example of how studies of city design can profitably embrace additional geographical, cultural, and chronological territories in order to rethink the abstract and tangible meaning of arranging urban places after major governmental changes and identity transitions have occurred.

General Alonso de León's Expeditions into Texas, 1686-1690 Apr 15 2021 In the late seventeenth century, General Alonso de León led five military expeditions from northern New Spain into what is now Texas in search of French intruders who had settled on lands claimed by the Spanish crown. Lola Orellano Norris has identified sixteen manuscript copies of de León's meticulously kept expedition diaries. These documents hold major importance for early Texas scholarship. Some of these early manuscripts have been known to historians, but never before have all sixteen manuscripts been studied. In this interdisciplinary study, Norris transcribes, translates, and analyzes the diaries from two different perspectives. The historical analysis reveals that frequent misinterpretations of the Spanish source documents have led to substantial factual errors that have persisted in historical interpretation for more than a century. *General Alonso de León's Expeditions into Texas* is the first presentation of these important early documents and provides new vistas on Spanish Texas.

The Death and Life of Great American Cities Sep 28 2019 In this classic text, Jane Jacobs set out to produce an attack on current city planning and rebuilding and to introduce new principles by which these should be governed. The result is one of the most stimulating books on cities ever written. Throughout the post-war period, planners temperamentally unsympathetic to cities have been let loose on our urban environment. Inspired by the ideals of the Garden City or Le Corbusier's Radiant City, they have dreamt up ambitious projects based on self-contained neighbourhoods, super-blocks, rigid 'scientific' plans and endless acres of grass. Yet they seldom stop to look at what actually works on the ground. The real vitality of cities, argues Jacobs, lies in their diversity, architectural variety, teeming street life and human scale. It is only when we appreciate such fundamental realities that we can hope to create cities that are safe, interesting and economically viable, as well as places that people want to live in. 'Perhaps the most influential single work in the history of town planning... Jacobs has a powerful sense of narrative, a lively wit, a talent for surprise and the ability to touch the emotions as well as the mind' *New York Times Book Review*

New Mexico's Spanish Livestock Heritage Aug 27 2019 The Spanish introduced European livestock to the New World—not only cattle and horses but also mules, donkeys, sheep, goats, pigs, and poultry. This survey of the history of domestic livestock in New Mexico is the first of its kind, going beyond cowboy culture to examine the ways Spaniards, Indians, and Anglos used animals and how those uses affected the region's landscapes and cultures. The author has mined the observations of travelers and the work of earlier historians and other scholars to provide a history of livestock in New Mexico from 1540 to the present. He includes general background on animal domestication in the Old World and the New during pre-Columbian times, along with specific information on each of the six livestock species brought to New Mexico by the early Spanish colonists. Separate chapters deal with the impacts of Spanish livestock on the state's native population and upon the land itself, and a final chapter explains New Mexico's place in the larger American livestock scene.

Into the Black Jan 01 2020 In the decades since the mid-1970s, the Jet Propulsion Laboratory in Pasadena, California, has led the quest to explore the farthest reaches of the solar system. JPL spacecraft—Voyager, Magellan, Galileo, the Mars rovers, and others—have brought the planets into close view. JPL satellites and instruments also shed new light on the structure and dynamics of earth itself, while their orbiting observatories opened new vistas on the cosmos. This comprehensive book recounts the extraordinary story of the lab's accomplishments, failures, and evolution from 1976 to the present day. This history of JPL encompasses far more than the story of the events and individuals that have shaped the institution. It also engages wider questions about relations between civilian and military space programs, the place of science and technology in American politics, and the impact of the work at JPL on the way we imagine the place of humankind in the universe./DIV

Powerful Geography Aug 20 2021 In recent years the emphasis has shifted away from a focus on pedagogy (the how of teaching) and towards curriculum (the what of teaching). Ofsted's revised inspection framework reflects this shift, and their plans to -deep dive- into subject areas - meaning that teachers and department heads now need a much

greater understanding of curricular structures - leave many educators having to think about their subject in new ways. Luckily for geography teachers, however, bestselling author Mark Enser provides plenty of insightful, subject-specific guidance in this all-encompassing book. Mark explores both the purpose of the geography curriculum and its various applications in practice. He details how teachers can take their students' learning beyond the acquisition of knowledge to transform how they see the world. He also tackles the changing nature of school geography, shares a variety of case studies, and offers his take on how best to facilitate geographical enquiry and fieldwork. The first part of the book considers the issue of purpose by looking at the role of the school in society and then shows the place that geography occupies within it. It also considers the history of the subject so as to help geography teachers better understand where they stand today, and concludes by discussing how the concepts of powerful knowledge and GeoCapabilities can help them find their way again. The second part is a practical guide which illustrates how to put this theory of curriculum purpose into practice. It explores the steps which must be taken to create a powerful geography curriculum by deciding on content and places to be studied, putting the components into a sequence and then using all this to do geography. It will also discuss the extent to which teachers need to consider the future and respond to the concerns of the wider world when planning the curriculum. Suitable for department heads and classroom teachers of geography in secondary schools and subject leads in primary schools. Powerful Geography was Highly Commended in the Geographical Association Awards 2022.

The Catalogue of Shipwrecked Books Jun 17 2021 This impeccably researched and “adventure-packed” (The Washington Post) account of the obsessive quest by Christopher Columbus’s son to create the greatest library in the world is “the stuff of Hollywood blockbusters” (NPR) and offers a vivid picture of Europe on the verge of becoming modern. At the peak of the Age of Exploration, Hernando Colón sailed with his father Christopher Columbus on his final voyage to the New World, a journey that ended in disaster, bloody mutiny, and shipwreck. After Columbus’s death in 1506, eighteen-year-old Hernando sought to continue—and surpass—his father’s campaign to explore the boundaries of the known world by building a library that would collect everything ever printed: a vast holding organized by summaries and catalogues; really, the first ever database for the exploding diversity of written matter as the printing press proliferated across Europe. Hernando traveled extensively and obsessively amassed his collection based on the groundbreaking conviction that a library of universal knowledge should include “all books, in all languages and on all subjects,” even material often dismissed: ballads, erotica, news pamphlets, almanacs, popular images, romances, fables. The loss of part of his collection to another maritime disaster in 1522, set off the final scramble to complete this sublime project, a race against time to realize a vision of near-impossible perfection. “Magnificent...a thrill on almost every page” (The New York Times Book Review), The Catalogue of Shipwrecked Books is a window into sixteenth-century Europe’s information revolution, and a reflection of the passion and intrigues that lie beneath our own insatiable desires to bring order to the world today.
