Social Skills for Teenagers with Developmental and Autism Spectrum Disorders Dec 22 2021 This book is essential reading for any clinician or researcher working with teens with autism spectrum disorders. This parent-assisted intervention for teens is based on a comprehensive, evidence-based, 14-week program at UCLA's Semel Institute for Neuroscience and Human Behavior, the manualization of the popular UCLA PEERS Program, and the success of the Children's Friendship Training (Routledge, 2002) manual for children. After reviewing techniques designed to help parents and therapists tailor the manual to the needs of the teens with whom they are working, the text moves on to the individual treatment sessions and strategies for tackling issues such as developing conversational skills, choosing friends, using humor, get-togethers, teasing, bullying, gossiping, and handling disagreements. Each session chapter includes handouts, homework assignments, descriptions of what to expect (and how to handle challenges in delivering the intervention), and customized tips for both parents and therapists.

The War of My Generation May 27 2022 Following the 9/11 attacks, approximately four million Americans have turned eighteen each year and more than fifty million children have been born. These members of the millennial and post-millennial generation have come of age in a moment marked by increased anxiety about terrorism, two protracted wars, and policies that have raised questions about the United States's role abroad and at home. Young people have not been shielded from the attacks or from the wars and policy debates that followed. Instead, they have been active participants—as potential military recruits and organizers for social justice anti-immigration policies, as students in schools learning about the attacks or readers of young adult literature about wars. The War of My Generation is the first essay collection to focus specifically on how the terrorist attacks and their aftermath have shaped these new generations of Americans. Drawing from a variety of disciplines, including anthropology, sociology, cultural studies, and literary studies, the essays cover a wide range of topics, from graphic war images in the classroom to computer games designed to promote military recruitment to emails from parents in the combat zone. The collection considers what cultural factors and products have shaped young people's experience of the 9/11 attacks, the wars that have followed, and their experiences as emerging citizen-subjects in that moment. Revealing how young people understand the War on Terror—and how adults understand the way young people think—*The War of My Generation* offers groundbreaking research on catastrophic events still fresh in our minds.

Fieldnotes on a Study of Young People's Perceptions of Crime and Justice Jul 25 2019 This book is an ethnographic examination of the young people who serve voluntarily as judges, advocates and other court personnel at the Red Hook Youth Court (RHYC) in Brooklyn, New York—a juvenile diversion program designed to prevent the formal processing of juvenile offenders—usually first-time offenders—for low-level offenses (such as fare evasion, truancy, vandalism) within the juvenile justice system. Focusing on the nine-to-ten-week long unpaid training program that the young people undergo prior to becoming RHYC members, this book offers a detailed description of young people's experiences learning about crime, delinquency, justice, and law. Combining moments of self-reflection and autobiographical elements into largely "uncooked" fieldnotes, the book seeks to demonstrate the hegemonic operations of a court (the Red Hook Community Justice Center (RHCJC)—a multi-jurisdictional problem-solving court and community center where the RHYC is housed), the processes in which it secures belief in formal justice and the rule of law, ensures consent to be governed, and reproduces existing social structures. An accessible and compelling read, this book will appeal to students and scholars of criminology, law, sociology, and youth justice, as well as to those undertaking ethnographic research on young people, crime and justice.

Teens in Crisis Nov 20 2021 In recent years a dizzying array of programs has emerged to meet the needs of struggling teens and their families—wilderness therapy programs, therapeutic boarding schools, alternative schools, mentoring and court diversion programs, independent living programs, and myriad day treatment and partial hospitalization services. Yet not all of these offerings employ mental health professionals or follow evidence-based treatment protocols. Some programs are licensed and accredited, but many are not, and some use techniques that are highly controversial, even abusive, resulting in injury and accidental death. Frederic G. Reamer and Deborah H. Siegel have written the first scholarly book on this influential and controversial industry. They begin with a time line of Americans' changing attitudes toward challenging teens and the programs and schools established to handle this population. Then they summarize reputable organizations, including a selection of community-based and residential programs and schools, and provide brief descriptions of typical services. The authors candidly discuss a number of troubling scandals and tragedies, exposing the tragic consequences of emotionally and physically abusive practices, and recommend a range of empirically sound interventions for the clinical challenges of adolescent depression, bipolar disorder, anxiety, oppositional behavior, eating disorders, and attention-deficit/hyperactivity disorder. The authors conclude with a blueprint for reform and twenty "best practice" principles relating to harm prevention, program-based discipline, industry regulation, quality assurance, parental involvement, staff education, and after-care services.

What Are Teens Thinking? Parent-Teen Conflict and Argument From the Teen Perspective Oct 20 2021 *This study explored the embodied teen experience of parent-teen conflict and argument using a hermeneutic-phenomenological approach. Teens self-identified as (a) living in a family with everyday conflict, (b) not seeing a psychologist or counselor, (c) not having been in any drug or alcohol treatment programs, (d) not knowing the researcher ahead of time, and (e) being between the ages of 13 to 19 at the time the interview took place. The following themes emerged: (a) feeling powerless, small, devalued, and oppressed; (b) experiencing irritation, frustration, hypocrisy, pettiness, and defiance; (c) wanting freedom and autonomy and the battle for control; and (d) needing safe space and me time. Each theme and the whole embodied essence of this experience were interpreted through teens' as well as the researcher's lenses. The interpretations provide insight for teens, parents, and parent educators that may help improve parent-teen relationships and provide strategies to use in the classroom setting.*

The Transgender Teen Dec 10 2020 *What do you do when your son announces he is transgender and asks that you call her by a new name? Or what if your child uses a term you've never heard of to describe themselves (neutrois, agender, non-binary, genderqueer, androgynous...) and when you didn't know what they meant, they left the room and now won't speak to you about it? Perhaps your daughter recently asked you not to use gendered pronouns when referring to 'her' anymore, preferring that you use "they"; you're left wondering if this is just a phase, or if there's something more that you need to understand about your child. There is a generational divide in our understandings of gender. This comprehensive guidebook helps to bridge that divide by exploring the unique challenges that thousands of families face every day raising a teenager who may be transgender, non-binary, gender-fluid or otherwise gender-expansive. Combining years of experience working in the field with extensive research and personal interviews, the authors cover pressing concerns relating to physical and emotional development, social and school pressures, medical considerations, and family communications. Learn how parents can more deeply understand their children, and raise their non-binary or transgender adolescent with love and compassion.*

Homelessness in America [3 volumes] Jun 27 2022 *Homelessness is one of the most compelling social problems in the United States. Dating from the early years in Colonial America to the current problems relating to homeless women and children, homelessness has been the topic of discussion of scholars, social activists, and policy makers. Many types of social problems are linked to homelessness, including poverty, substance abuse, foster care, and crime. As a result, unpacking the issues has proven to be a challenge for anyone interested in this topic. Homelessness in America offers an assessment of what is known about each segment of the homeless population, which contrary to conventional belief, is comprised of a wide variety of faces from many backgrounds. It explains linkages to other social issues and provides a balanced overview of homelessness in light of the varying perspectives on the topic. While much of what has been written about homelessness has come from the academic perspective, agendas often interfere with an accurate understanding of the problem. Clearly, there is a place for other types of perspectives, including those that view homelessness through political and legal lenses. These groups have provided us with a robust body of information within which we may better understand the questions relating to homelessness. McNamara has brought together the voices of these groups in order to reveal the numerous political, economic, and social constraints that beset current attempts to solve homelessness. In addition, the commonly held belief that homelessness is a result of laziness or a poor work ethic is turned on its head to reveal that homelessness is truly a multifaceted and complex issue.*

The Birthday Rules Mar 01 2020 *"In our fast-paced world consisting of ever-changing technology and evolving social norms, parents are finding the traditional challenges of raising well-adjusted, self-confident and socially responsible children ever more difficult. As parents, we struggle with when to grant certain permissions and when to have difficult conversations. We often avoid such decisions, waiting until an external event forces the conversation or too many kids at school have been granted the same permission. To meet these challenges, parents need a framework that can adjust to the development needs of each child, the values of each community and the means of each family. The Birthday Rules provides that framework. The Birthday Rules provides a fun and flexible framework of an annual review process combined with a structure for increasing permissions, responsibilities and conversations. We suggest using a child's birthday as not only a time to celebrate, but also as an excellent opportunity to have important conversations, grant desired permissions and explain the responsibilities that go along with those permissions."--Back cover.*

The book also provides essential guidance on connecting with aggressive teens--many whom have endured traumas of their own--managing difficult situations that are likely to arise in therapy.*
