Content-Area Reading, Writing, Vocabulary for Language Arts May 15 2021 Builds writing skills. Models good writing. Strengthens writing proficiency through practice. Demystifies the writing process.

Portfolio Planner Sep 06 2020 Provides teachers with a user-tested, prepackaged, step-by-step portfolio assessment method.

School Peer Review for Educational Improvement and Accountability May 27 2022 This book explores how peer reviews are used in school improvement, accountability and education system reform. Importantly, these issues are studied through numerous international cases and new empirical evidence. This volume also identifies and describes barriers and facilitators to the development, use, sustainability and expansion of school peer review. School peer reviews are a form of internal evaluation driven by schools themselves rather than externally imposed, such as with school inspections. Schools collaborate with other schools in networks, collect data through self-evaluation and in school review visits. They provide feedback, challenge and support to each other. Despite the increased use of school peer review in system reform and school improvement, very little research has been conducted on this model and there is a dearth of literature that looks at the phenomenon internationally. This book fills this gap and will be an invaluable source for academics in school leadership and educational evaluation and accountability, as well as those working at the level of executive leadership in school networks, NGOs and in government policy-making.

Great Writing 2: Great Paragraphs Nov 20 2021 The new edition of the Great Writing series provides clear explanations, extensive models of academic writing and practice to help learners write great sentences, paragraphs, and essays. With expanded vocabulary instruction, sentence-level practice, and National Geographic content to spark ideas, students have the tools they need to become confident writers. Updated in this Edition: Clearly organized units offer the practice students need to become effective independent writers. Each unit includes: Part 1: Elements of Great Writing teaches the fundamentals of organized writing, accurate grammar, and precise mechanics. Part 2: Building Better Vocabulary provides practice with carefully-selected, level-appropriate academic words. Part 3: Building Better Sentences helps writers develop longer and more complex sentences. Part

4: Writing activities allow students to apply what they have learned by guiding them through writing, editing, and revising. Part 5: New Test Prep section gives a test-taking tip and timed task to prepare for high-stakes standardized tests, including IELTS and TOEFL. The new guided online writing activity takes students through the entire writing process with clear models for reference each step of the way. Written Corrective Feedback in Second Language Acquisition and Writing Apr 01 2020 What should language and writing teachers do about giving students written corrective feedback? This book surveys theory, research, and practice on the important and sometimes controversial issue of written corrective feedback, also known as "error/grammar correction," and its impact on second language acquisition and second language writing development. Offering state-of-the-art treatment of a topic that is highly relevant to both researchers and practitioners, it critically analyzes and synthesizes several parallel and complementary strands of research -- work on error/feedback (both oral and written) in SLA and studies of the impact of error correction in writing/composition courses -- and addresses practical applications. Drawing from both second language acquisition and writing/composition literature, this volume is the first to intentionally connect these two separate but important lines of inquiry. -- Book Description.

Peer Review, Peer Education, and Modeling in the Practice of Clinical Ethics Consultation: The Zadeh Project Jul 25 2019 This open access book about the Zadeh Project demonstrates and explores a core question in clinical ethics: how can ethics consultants be accountable in the face of a robust plurality of ethical standpoints, especially those that underwrite practices and methods for doing ethics consultation as well as those viewpoints and values encountered in daily clinical ethics practice? Underscoring this question is the recognition that the field of clinical ethics consultation has arrived at a crucial point in its maturation. Many efforts are underway to more formally "professionalize" the field, with most aimed toward stabilizing a specific set of institutional considerations. Stretched between these institutional and practical initiatives resides a crucial set of ethical considerations, chief among them the meaning and scope of responsibility for clinical ethics consultants. Developed around a long-form case scenario, the Zadeh Project provides a multi-layered series of "peer-reviews": critique of the actions of the case scenario's ethics consultant; reflection on clinical ethics method; examination of the many ways that commitments to method and practice can, and do, intersect, overlap, and alter one another. The design and format of this book thus models a key element for clinical ethics practice: the need and ability to provide careful and thoughtful explanation of core moral considerations that emerge among diverse standpoints. Specifically designed for those studying to become and those who are ethics consultants, this book, with its innovative and multi-layered approach, allows readers to share a peer-review-like experience that shows accountability to be what it is, an ethical, not merely procedural or administrative, undertaking.

Editorial Peer Review Dec 22 2021 This book is the first to provide an in-depth analysis of the peer review process in scholarly publishing. Author Weller offers a systematic review of published studies of editorial peer review in the following broad categories: general studies of rejection rates, studies of editors, studies of authors, and studies of reviewers. The book concludes with an examination of new models of editorial peer review intended to enhance the scientific communication process as it moves from a print to an electronic environment.

Peer Review of Learning and Teaching in Higher Education Apr 25 2022 Incorporating both theoretical and practical perspectives, this volume of papers explores varied aspects of peer review of teaching in higher education. The section on theory features contributions from academics based in Europe, North America and Australia. It provides a number of models demonstrating ways in which collegial peer commentary can enhance the quality of learning and teaching. The chapters examine in detail the importance of communication and leadership, and deploy evidence from one-on-one interviews that evince the value of considering collegiality, emotions, attitudes, and spaces in peer review. The analysis shows how these factors are central to the ways in which lecturers and teachers

communicate with each other to create constructive opportunities for learning. The chapters on practical considerations detail the peer review process and include case studies from institutions in Africa, Europe, North America and Australia, which focus on different areas of the topic, including peer review as a quality assurance mechanism, peer review in distance education, peer review in foundation courses, and peer review embedded within a department and across a university. The book ends with an international perspective on the role of peer review in ensuring a holistic approach to quality enhancement in learning and teaching.

Journal Peer Review Jan 23 2022 I. PEER REVIEWER COURSE Join LBP Publication course today to get practical knowledge on writing review report and build up your career as Master researcher. The benefits of our peer review training course could be perceived from the below mentioned points. AIMS 1. Develop an aspiration for research study 2. Inspire to learn peer review with confidence 3. Provide practical experience in peer review 4. Train and mould the next generation of peer reviewers. OBJECTIVES 1. To understand the basic principles of reviewing a paper. 2. To be aware of the responsibilities of a reviewer. 3. To know how to write feedback for authors and the editor.

Peer Review in Nursing Aug 30 2022 Peer Review in Nursing: Principles for a Successful Practice is the first nursing publication that approaches the definition and implementation strategies for peer review within an organizational setting. Using a professional model, with shared governance as a framework, the authors discuss the difference between manager initiated staff performance evaluation of the past and the true peer review aspects of professional practice for the future. This text follows in line with the Magnet program requirement “that nurses at all levels use self appraisal performance review and peer review, including annual goal settings, for the assurance of competence and professional development” page 30 of the 2008 Magnet manual. This unique text teaches nurses the skills they need to demonstrate organizational processes, structures, and outcomes that help insure accountability, competence and autonomy.

Virtual Peer Review Nov 01 2022 Offers a thorough look at peer review in virtual environments.

Integrating Technology into the Writing Process Sep 18 2021

Student-Led Peer Review Aug 25 2019 Student-led peer review can be a powerful learning experience for both giver and receiver, developing evaluative judgment, critical thinking, and collaborative skills that are highly transferable across disciplines and professions. Its success depends on purposeful planning and scaffolding to promote student ownership of the process. With intentional and consistent implementation, peer review can engage students in course content and promote deep learning, while also increasing the efficiency and effectiveness of faculty assessment. Based on the authors’ extensive experience and research, this book provides a practical introduction to the key principles, steps, and strategies to implement student peer review – sometimes referred to as “peer critique” or “workshopping”. It addresses common challenges that faculty and students encounter. The authors offer an easy-to-follow and rigorously tested three-part protocol to use before, during, and after a peer review session, and advice on adapting each step to individual courses. The process is applicable across all disciplines, content types, and modalities, face-to-face and online, synchronous and asynchronous. Instructors can guide students in peer review in one course, across two or more courses that are team-taught, or across programs or curriculums. When instructors, students, and university stakeholders create a culture of peer review, it enhances learning benefits for students and allows faculty to share pedagogical resources. Student peer review is a high-impact pedagogy that’s easily implemented, inculcates lifelong learning skills in students, and relieves the assessment burden on faculty as students collaborate to improve their own work.

Great Writing 1: Great Sentences for Great Paragraphs Jun 03 2020 The new edition of the Great Writing series provides clear explanations, extensive models of academic writing and practice to help learners write great sentences, paragraphs, and essays. With expanded vocabulary instruction, sentence-level practice, and National Geographic content to spark ideas, students have the tools they need to become confident writers. Updated in this Edition: Clearly organized units offer the practice students need to become effective independent writers. Each unit includes: Part 1: Elements of Great Writing teaches the fundamentals of organized writing, accurate grammar, and precise mechanics. Peer Review in an Era of Evaluation Jun 27 2022 This open access volume explores peer review in the scientific community and academia. While peer review is as old as modern science itself, recent changes in the evaluation culture of higher education systems have increased the use of peer review, and its purposes, forms and functions have become more diversified. This book put together a comprehensive set of conceptual and empirical contributions on various peer review practices with relevance for the scientific community and higher education institutions worldwide. Consisting of three parts, the editors and contributors examine the history, problems and developments of peer review, as well as the specificities of various peer review practices. In doing so, this book gives an overview on and examine peer review , and asks how it can move forward. Eva Forsberg is Professor of Education at Uppsala University, Sweden. Her research focuses education governance and evaluation, academic work and the interface between educational policy, practice and research. Lars Geschwind is Professor in Engineering Education Policy and Management at KTH Royal Institute of Technology, Sweden. His main research interests are higher education policy, institutional governance, academic leadership and academic work. Sara Levander is Senior Lecturer and Researcher in Education at Uppsala University, Sweden. Her research interests are higher education, academic work and faculty evaluation in academic recruitment and promotion. Wieland Wermke is Associate Professor in Special Education at Stockholm University, Sweden. His research interest focuses on comparative education methodology, and teacher practice at different levels of education.

The Journey of an Immigrant Oct 27 2019 Khetam Dahi captures the often-ignored voices and painful experiences of Syrian migrant children and families. In a simple yet honest and powerful prose, Dahi, through the eyes a child turning adolescent, narrates the everyday existence of immigrant and working-class families. Although the family faced extreme hardships and poverty, their love for each other and determination to succeed served as a catalyst to infuse them with optimism and a love for life. Her inspirational journey of breaking through despite all obstacles certainly lets readers vicariously experience her joy and sorrow, regrets and hopes. Dahi's artfully weaved narratives provide young adult learners an opportunity to become personally enmeshed in her stories, but most importantly, it creates a space where students can feel free to relate, relive, and learn. The simple language makes this book an excellent choice for reluctant readers and ESL students, especially because the author includes many exercises to give students the opportunity to share their own experiences and identify with the characters in her stories.

Great Writing 5: From Great Essays to Research Jul 29 2022 The new edition of the Great Writing series provides clear explanations, extensive models of academic writing and practice to help learners write great sentences, paragraphs, and essays. With expanded vocabulary instruction, sentence-level practice, and National Geographic content to spark ideas, students have the tools they need to become confident writers. Updated in this Edition: Clearly organized units offer the practice students need to become effective independent writers. Each

unit includes: Part 1: Elements of Great Writing teaches the fundamentals of organized writing, accurate grammar, and precise mechanics. Shaping Policy Reform and Peer Review in Southeast Asia Integrating Economies Amid Diversity May 03 2020 This publication examines the possible application of peer reviews to address regional and domestic challenges in Southeast Asia.

How to Conduct an Effective Peer Review Oct 20 2021 This crucial book guides academics and researchers through the process of peer reviewing manuscript articles, outlining the methods and proficiencies required to write a high-quality review. Gloria Barczak and Abbie Griffin specifically highlight the importance of becoming a first-rate reviewer to early career scholars.

Peer Review and Manuscript Management in Scientific Journals Mar 01 2020 This comprehensive yet concise book provides a thorough and complete guide to every aspect of managing the peer review process for scientific journals. Until now, little information has been readily available on how this important facet of the journal publishing process should be conducted properly. Peer Review and Manuscript Management in Scientific Journals fills this gap and provides clear guidance on all aspects of peer review, from manuscript submission to final decision. Peer Review and Manuscript Management in Scientific Journals is an essential reference for science journal editors, editorial office staff and publishers. It is an invaluable handbook for the set-up of new Editorial Offices, as well as a useful reference for well-established journals which may need guidance on a particular situation, or may want to review their current practices. Although intended primarily for journals in science, much of its content will be relevant to other scholarly areas. This wonderful work by Dr. Hames can be used as a textbook in courses for both experienced and novice editors, and I trust that it is what Dr. Hames intended when she prepared this beautiful book. Every scientific editor should read it. Journal of Educational Evaluation for Health Professionals, 2008 This book is co-published with the Association of Learned and Professional Society Publishers (ALPSP) (www.alpsp.org) ALPSP members are entitled to a 30% discount on this book.

Practical Strategies for Improving Instruction Jun 23 2019 Middle level teachers are unique not just by virtue of the level of students they teach but also by the ways in which they teach. This monograph emphasizes strategies that actively engage students of all ability levels, promote collaboration, provide for various levels of concrete and abstract thought, and foster student inquiry. The monograph presents approaches to assessing reading and writing, cooperative learning, vocabulary development, reading comprehension, and critical thinking and to other topics that are directly reflective of current research. It provides step-by-step procedures along with classroom examples in a convenient and serviceable format, and its research-based teaching strategies are applicable to all subject areas. The introduction offers an overview of the research on prevailing versus preferred instructional practices in middle schools and discusses what can be done to improve instruction in five basic areas: (1) approaches to teaching; (2) lesson planning and implementation; (3) classroom instructional resources; (4) instructional activities and arrangements; and (5) promotion of higher order thinking. The monograph emphasizes the following groups of strategies: 1 and 2 are concerned with assessing reading and writing performance; 3 through 9 center around cooperative learning as it relates to various topics; 10 through 13 show practical ways to develop students' vocabulary with example spanning curricular areas. The remaining strategies deal with improving students' comprehension and appreciation of what they read. (NKA)

Content-area Writing Strategies Sep 26 2019

Peer Interaction and Second Language Learning Jan 29 2020 Peer Interaction and Second Language Learning synthesizes the existing body of research on the role of peer interaction in second language learning in one comprehensive volume. In spite of the many hours that language learners spend interacting with peers in the classroom, there is a tendency to evaluate the usefulness of this time by comparison to whole class interaction with the teacher. Yet teachers are teachers and peers are peers – as partners in interaction, they are likely to offer very different kinds of learning opportunities. This book encourages researchers and instructors alike to take a new look at the potential of peer interaction to foster second language development. Acknowledging the context of peer interaction as highly dynamic and complex, the book considers the strengths and limitations of peer work from a range of theoretical perspectives. In doing so, Peer Interaction and Second Language Learning clarifies features of effective peer interaction for second language learning across a range of educational contexts, age spans, proficiency levels, and classroom tasks and settings.

Great Writing 4: Great Essays Jul 05 2020 The new edition of the Great Writing series provides clear explanations, extensive models of academic writing and practice to help learners write great sentences, paragraphs, and essays. With expanded vocabulary instruction, sentence-level practice, and National Geographic content to spark ideas, students have the tools they need to become confident writers. Updated in this Edition: Clearly organized units offer the practice students need to become effective independent writers. Each unit includes: Part 1: Elements of Great Writing teaches the fundamentals of organized writing, accurate grammar, and precise mechanics. Part 2: Building Better Vocabulary provides practice with carefully-selected, level-appropriate academic words. Part 3: Building Better Sentences helps writers develop longer and more complex sentences. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Do We Still Need Peer Review? Jul 17 2021 The current peer review process is broken and unless changes are made it will soon die. In *Do We Still Need Peer Review?*, author Thomas H.P. Gould examines the evolution of peer review from the earliest attempts by the Church to evaluate scholarly works to the creation of academic peer review and finally to the current status of the process. Gould argues that without an immediate effort by scholars to institute reform, the future of peer review may cease to exist. As new technology provides authors with a direct, unsupervised route to publication, the peer review situation is nearing a tipping point, beyond which the nature of academic research will be profoundly altered. This book proposes that rather than tossing out peer review altogether, the process can be saved and made stronger, offering suggestions on how to do just that.

National Science Foundation Peer Review Jan 11 2021

Peer review in scientific publications Mar 13 2021 This report indicates that the oversight of research integrity in the UK is unsatisfactory. The Science and Technology Committee concludes that in order to allow others to repeat and build on experiments, researchers should aim for the gold standard of making their data fully disclosed and made publicly available. The report examines the current peer-review system as used in scientific publications and the related issues of research impact, data management, publication ethics and research integrity. The UK does not seem to have an oversight body for research integrity covering advice and assurance functions across all disciplines and the Committee recommends the creation of an external regulator. It also says all UK research institutions should have a specific member of staff leading on research integrity. The report highlights concerns about the use of journal Impact Factor as a proxy measure for the quality of research or of individual articles. Innovative ways to improve current pre-publication peer-review practices are highlighted in the report, including the use of pre-print servers, open peer review, increased transparency and online repository-style journals. The

growth of post-publication peer review and commentary also represents an enormous opportunity for experimentation with new media and social networking tools, which the Committee encourages. There should also be greater recognition of the work-sometimes considered to be a burden-carried out by reviewers, by both publishers and employers. In order to do this, publishers need to have in place systems for recording and acknowledging the contribution of those involved in peer review.
