Plant Systematics Nov 23 2021 This fourth edition of Plant Systematics is completely revised and updated. It incorporates the updated International Code of Nomenclature for Algae, Fungi and Plants (Shenzhen Code, 2018), the new version of PhyloCode (Beta version of PhyloCode 5, 2014), APweb version 14 (September, 2018), revised Angiosperm Phylogeny Group classification (APG IV, 2016), new Pteridophyte Phylogeny Group Classification (PPG I, 2016), besides the updates since the publication of third edition. The book is a blend of classical fundamental aspects and recent developments, especially in the field of molecular systematics, cladistics and computer identification. Special attention has been given to information on botanical nomenclature, identification, molecular systematics and phylogeny of angiosperms. The complicated concepts of phylogeny, taxometrics and cladistics have been explained with a view to providing a comparison between these diverse but interactive fields of study. An attempt has been made to build upon a common example when exploring different methods, especially in procedures of identification, taxometrics and cladistics. The major systems of classification are evaluated critically. Discussion on major families of Pteridophytes, Gymnosperms and Angiosperms, especially those of major phylogenetic interest, form a major portion of this edition. The ebook includes nearly 500 color photographs set out in 36 pages covering plants from different parts of the world.

In addition, 305 black & white illustrations have been included to provide a better understanding of the plants covered in the book.

India Unbound Jul 08 2020 India Unbound is the riveting story of a nation's rise from poverty to prosperity and the clash of ideas that occurred along the way. Gurcharan Das examines the highs and lows of independent India through the prism of history, his own experiences and those of numerous others he has met—from young people in sleepy UP villages to chiefs of software companies in Bangalore. Defining and exploring the new mindset of the nation, India Unbound is the perfect introduction to contemporary India.

The Difficulty of Being Good Jan 26 2022 Why should we be good? How should we be good? And how might we more deeply understand the moral and ethical failings--splashed across today's headlines--that have not only destroyed individual lives but caused widespread calamity as well, bringing communities, nations, and indeed the global economy to the brink of collapse? In *The Difficulty of Being Good*, Gurcharan Das seeks answers to these questions in an unlikely source: the 2,000 year-old Sanskrit epic, Mahabharata. A sprawling, witty, ironic, and delightful poem, the Mahabharata is obsessed with the elusive notion of dharma--in essence, doing the right thing. When a hero does something wrong in a Greek epic, he wastes little time on self-reflection; when a hero falters in the Mahabharata, the action stops and everyone weighs in with a different and often contradictory take on dharma. Each major character in the epic embodies a significant moral failing or virtue, and their struggles mirror with uncanny precision our own familiar emotions of anxiety, courage, despair, remorse, envy, compassion, vengefulness, and duty. Das explores the Mahabharata from many perspectives and compares the successes and failures of the poem's characters to those of contemporary individuals, many of them highly visible players in the world of economics, business, and politics. In every case, he finds striking parallels that carry lessons for everyone faced with ethical and moral dilemmas in today's complex world. Written with the flair and seemingly effortless erudition that have made Gurcharan Das a bestselling author around the world--and enlivened by Das's forthright discussion of his own personal search for a more meaningful life--*The Difficulty of Being Good* shines the light of an ancient poem on the most challenging moral ambiguities of modern life.

Echoes of Gasping Souls Jan 14 2021 Four strangers are stuck in a hotel in Mumbai. Sitam, a Nepali speaking man from Sikkim, works in the dusty offices of Indian bureaucracy. He has seen racism at its worst during his University days. He is a frustrated Indian bureaucrat. Kulawant Kaur from Amritsar is on her first solo trip at the age of 62, under the pretence of a pilgrimage. This trip is her revolt against the inescapable North-Indian patriarchy. Razia is a Malayali Muslim married to a Hindu. The only identity that matters to her is that of a woman. She hates it when others want her to be a Muslim or a Malayali. Manoj is a typical Engineer-MBA, highly driven, ambitious and suave. His superiority complex is nauseating. Sunil Paswan, a Dalit from Bihar is the hotel manager. He survived caste riots in his native village 30 years ago, after which he moved to Mumbai and has never gone back home. They hate each other, hate being forced to live together and hate that the torment will last almost a month. How do things play out and what happens at the end? The story changes when hearts and minds slowly begin to open

The 21 Stages of Meditation May 30 2022 The 21 Stages of Meditation clarifies the process and outlines the steps toward your own progress in meditation. Defined by Yogi Bhanan and elucidated by Gurucharan Singh, "The 21 Stages of Meditation" is a key work in deepening your understanding and experience of meditation. Ranging from Upset and Boredom to Humility, Graceful Enlightenment and the Sage, explore these stages and the three distinct meditative journeys, which culminate in the pinnacle of contemplative awareness, the Stage 21st, also described as The Infinite Pulse. This is an essential book for those interested in deepening their process of meditation and their experience with Jappa Yoga. The teachings presented in this book have been developed with love and care and genuine reverence. Yogi Bhanan said, "Now we are entering the Age of Aquarius and we have to have the science of mind totally brought into a geometry so that you can understand this is depression, this is expression; this is what you are doing and this is what you have to do. So for that reason, we are trying to create all this work for you." Every living thing has its own time to grow from a seed to its innate maturity. May it provide a foundation for elevation and enlightenment to all who love meditation.

Evolution of Markets and Institutions Oct 11 2020 The new institutional economics has been one of the most influential schools of thought to emerge in the past quarter century. Taking its roots in the transaction cost theory of the firm as an economic organization rather than purely a production function, it has been developed further by scholars such as Oliver Williamson, Douglas North and their followers, leading to the rich and growing field of the new institutional economics. This branch of economics stresses the importance of institutions in the functioning of free markets, which include elaborately defined and effectively enforced property rights in the presence of transaction costs, large corporate organizations with agency and hierarchical controls, formal contracts, bankruptcy laws, and regulatory institutions. In this timely volume, Murali Patibandla applies some of the precepts of the new institutional economics to India - one of the world's most promising economies.

Kabeer In Korporates Corporate Lessons From A Great Mystic Aug 21 2021 Kabeer in Korporates addresses the trials and tussles of the workplace faced by the modern day employee, using Kabeer as the deep font of practical wisdom that balances philosophy with action, theory with practice. It puts into perspective the multiple conundrums of working life: o the balance between success and joy o the tension between methods and results o the impasse between choosing the right coach and being the right coach o decrypting the enigma called leadership. It defines with compassionate wisdom the fine line between dealing with things and dealing with the self. Kabeer In Korporates demystifies the angst and challenges of modern employees, providing lessons, insights and solutions to problems using the wisdom of Kabeer in four ways: o by questioning the individual before he is allowed to question the world around him o asking pertinent questions rather than offering pat solutions o by being simple and matter-of-fact and not hiding behind theories and constructs. o by outlining dilemmas and providing insights on dealing with them. Kabeer is a willing ally; he teaches you the art of untangling the knots till you can breathe and live your own life – fully.

Selected Stories of Sharatchandra Apr 16 2021 Sharatchandra is one of the greatest and most widely read Bengali writers in Indian literature. It would not be an exaggeration to say that he is pioneer of women's empowerment in India. Most of his novels and stories have women as the protagonist. His stories were mostly related to the rural areas and the struggles that a villager has to undergo. Simplicity is one of the striking features of Sharatchandra's stories. He wrote stories in a very simple format, which found immense popularity amongst his readers. He crafted his stories on human relationships in such a way that there were no heroes or villains

The Saratchandra Omnibus: Srikanta Feb 24 2022 'He touched the core of the Bengalis' pain with his words' - Rabindranath Tagore. Saratchandra Chattopadhyay is widely acknowledged as one of the greatest Indian novelists of the twentieth century. His novels, serialized in periodicals and later published in book form, established him as Bengal's master storyteller. Even today, seven decades after his death, Saratchandra remains one of the most popular novelists in Bengal, and is widely read in translation across India as well. This collector's edition of Saratchandra's works in English translation brings together the writer's most renowned and best-loved novels in two omnibus volumes. The first volume features five novels: Srikanta, Devdas, Parineeta, Palli Samaj and Nishkriti. Srikanta is the story of a wanderer who observes the people around him; through them - especially the women he loves and respects, from the sacrificing Annada Didi and the rebellious Abhaya to the housewife Rajlakshmi and the courtesan Pyari Bai - he tries to arrive at an understanding of life. Devdas is the tragic tale of a man who drives himself to drink and debilitation when he is unable to marry his childhood sweetheart Paro. guardian Shekhar, but circumstances conspire to drive the two apart. Palli Samaj (The Village Life) has Ramesh, an engineer, returning to the village of his birth to try and rid it of the backwardness that plagues it, even as he tries to revive his childhood ties with Rama, now a widow. In Nishkriti (Deliverance), the strong-willed Shailaja, the youngest daughter-in-law in a joint family, is made an outcast as a result of a misunderstanding; much later, her elders realize their mistake, just in time to save the family from disintegration. Each of the novels showcases the qualities Saratchandra is famous for: everyday stories told in a simple yet gripping style, strong characters, meticulous plotting, true-to-life dialogue, and unforgettable depictions of life in turn-of-the-century Bengal. Translated especially for Penguin, these classic novels will delight those new to Saratchandra's works as well as those who want to return to them again.

Parineeta Aug 01 2022 In this novel, Sharat Chandra has portrayed the external beauty as well as the internal beauty and mental feelings of the Indian woman with amazing dexterity. He has done so in such a perfect manner that no other novelist of Indian languages has been able to reach his level. Lolita of 'Parineeta', like every female characters of other novels penned by Sharat Chandra, depicts live images of the problems related to the life of women, the internal clashes among them and their innate feelings Among many novels of Sharat Chandra, 'Parineeta' is a superior novel. Many successful movies have been made by taking this novel as a script base.

Fiction Review Nov 11 2020

Irrigation Engineering Jun 30 2022 The subject "Irrigation Engineering" has assumed importance since last 30 to 40 years. Continued increase in population, particular in developing countries, at a very fast rate has caused scarcity of food. The real answer to food problem, is increased production of food articles; which is possible only by artificial irrigation of fields. India has a very large potential for irrigation, because area and water resources both are abundantly available. Abundance of area for irrigation and availability of lot of water resources are probably the reasons that most of the early irrigation practices and theories were developed in India. There is lot of variations in rainfall in different regions of India. Some of the areas have very little rainfall insufficient to grow any crop. Other areas have sufficient rainfall but its distribution is not as required by the crops. Scanty rainfall and erratic distribution both necessitate artificial irrigation. The purpose of this book is to present the subject in most concise form. Simplicity of language is the main feature of the book. The book is completely in MKS units and covers the syllabus of all the Indian Universities, State Technical Boards, and A.M.I.E. (India) examinations. The book should be equally useful to practicing Engineers as reference book. Examples of almost all the important irrigation works have been solved and then illustrated in neat drawing charts. Khosla's Charts, Lacey's and Garret diagrams all are in MKS units. Rajsons Publications Pvt. Ltd. Every effort was made to eliminate printing errors. I would appreciate if printing errors are brought to my notice and Suggestions to bring about improvements in the book are most welcome. I am thankful to all my friends who have rendered great help by their valuable suggestions. In last I am

thankful to Shri R.K. Jain, Prop. Standard Book House, without whose efforts this venture would not have reached the readers.

World Development Report 2016 Sep 09 2020 Digital technologies are spreading rapidly, but digital dividends--the broader benefits of faster growth, more jobs, and better services--are not. If more than 40 percent of adults in East Africa pay their utility bills using a mobile phone, why can't others around the world do the same? If 8 million entrepreneurs in China--one third of them women--can use an e-commerce platform to export goods to 120 countries, why can't entrepreneurs elsewhere achieve the same global reach? And if India can provide unique

digital identification to 1 billion people in five years, and thereby reduce corruption by billions of dollars, why can't other countries replicate its success? Indeed, what's holding back countries from realizing the profound and transformational effects that digital technologies are supposed to deliver? Two main reasons. First, nearly 60 percent of the world's population are still offline and can't participate in the digital economy in any meaningful way. Second, and more important, the benefits of digital technologies can be offset by growing risks. Startups can disrupt incumbents, but not when vested interests and regulatory uncertainty obstruct competition and the entry of new firms. Employment opportunities may be greater, but not when the labor market is polarized. The internet can be a platform for universal empowerment, but not when it becomes a tool for state control and elite capture. The World Development Report 2016 shows that while the digital revolution has forged ahead, its 'analog complements'--the regulations that promote entry and competition, the skills that enable workers to access and then leverage the new economy, and the institutions that are accountable to citizens--have not kept pace. And when these analog complements to digital investments are absent, the development impact can be disappointing. What, then, should countries do? They should formulate digital development strategies that are much broader than current information and communication technology (ICT) strategies. They should create a policy and institutional environment for technology that fosters the greatest benefits. In short, they need to build a strong analog foundation to deliver digital dividends to everyone, everywhere.

Real International Cricket Jul 28 2019 Real International Cricket charts cricket's global evolution across the last 175 years. Author Roy Morgan selects 100 different scorecards from matches involving non-Test-playing nations, played between 1840 and the modern day. From early adopters Canada and USA, to top associates Ireland and Afghanistan; from countries where cricket's the national sport, such as Fiji and Papua New Guinea, to outposts like Saint Helena and New Caledonia, or Hungary and Romania, where cricket is in its infancy. Each scorecard is accompanied by a match report, setting each match in an historical context. Tracing changes in the atmosphere, the size of the crowds, the style of hospitality, methods of transport, the roles of expats and local players, how the standards have risen or fallen over time, and the increasing importance of women's internationals. From the early years, through the Golden Age, the decline prior to, and revival after the Second World War, to the present-day struggle to maintain multi-innings cricket against the excitement of one-day internationals and Twenty20. This is a tribute to the game's pioneers, enthusiasts and eccentrics and shows how cricket has developed as a global sport.
