The small city's seams are bursting with the pent up needs of thousands of gamblers, socialites and hangers-on who seek the excitement of the Sport of Kings and the mob-controlled casino-nightclubs where the likes of Bing Crosby, Bob Hope and Sophie Tucker entertain. City detective Tom Connor must contend with Jack and keep police commissioner Torrey off his back during an election year where Torrey faces a challenge from local attorney and war hero, Bobby Deliberto. Meanwhile, a reclusive nurse, Sonia Kosik, knows more than she's telling about the victim. Someone in the organization is ripping off the take from the numbers' racket and Doc must find him before mob boss Sammy Cohen does. [Crossroads at Clarksdale](#) Oct 23 2019 Weaving national narratives from stories of the daily lives and familiar places of local residents, Françoise Hamlin chronicles the slow struggle for black freedom through the history of Clarksdale, Mississippi. Hamlin paints a full picture of the town over fifty years, recognizing the accomplishments of its diverse African American community and strong NAACP branch, and examining the extreme brutality of entrenched power there. The Clarksdale story defies triumphant narratives of dramatic change, and presents instead a layered, contentious, untidy, and often disappointingly unresolved civil rights movement. Following the black freedom struggle in Clarksdale from World War II through the first decade of the twenty-first century allows Hamlin to tell multiple, interwoven stories about the town's people, their choices, and the extent of political change. She shows how members of civil rights organizations--especially local leaders Vera Pige and Aaron Henry--worked to challenge Jim Crow through fights against inequality, police brutality, segregation, and, later, economic injustice. With Clarksdale still at a

crossroads today, Hamlin explores how to evaluate success when poverty and inequality persist.

Something Left To Lose Apr 21 2022 Homelessness is usually discussed in terms of its origins or in terms of its amelioration. Media accounts focus on poverty, drug use, lack of shelter, the social safety net, or attempts by the homeless, social service agencies, and government to end homelessness by policy and direct action. Yet we never seem to get a clear picture of who the homeless are. We are exposed to them as a social problem, but we learn little about their daily existence. In *Something Left to Lose*, Gwendolyn A. Dordick gives us a dramatic portrait of the social and personal lives of the homeless. Through her extensive "hanging out" with homeless people, Dordick came to a profound understanding of the web of relationships that provides complex social structure in situations where, to the casual eye, there appears to be only chaos and paralysis. The author shows us that improvising shelter means working hard to co-exist with others. Lacking conventional private dwellings, the homeless find or create shelter in unconventional places -- on street corners adjoining bus stations, on empty lots of land, or in shelters, public or private -- and negotiate the rules of these places with authorities, passersby, and fellow homeless. The different environments lead to quite different social relations. The Armory, for example, is a frightening place, thanks to the authoritarian attitudes of the employees and cliques of homeless people in charge. In the Shanty, on the other hand, the difficult issues are those of a self-governing community concerned about safety -- controlling the drug use of some residents, deciding who is allowed to tap into the electricity, and worrying about intruders. In all settings, daily life for people without homes, like daily life for people with homes, is full of the concerns of personal relationships. How will we share our goods and emotions, speak respectfully to each other, love and joke and work out our disputes, and act in a trustworthy fashion? This book is also a miniature research odyssey, complete with moments of fear, frustration, blunders, distrust, and trust. In order to gather these interviews, Dordick had to not only win the confidence of the homeless people she visited (the women at the Station thought she was interested in their boyfriends) but also negotiate with unsympathetic police and shelters employees or defy them.

Trunking Scanners for Beginners Feb 25 2020 "I think we need a new crystal for this thing." --Scanner guy from the 70s Scanners were a lot simpler in decades past, when everything was analog, had a fixed frequency, and was unencrypted. Nowadays, we have those old analog stations as well as digital, trunking systems, protocols, sites, talk groups, and who-knows-what coming down the road for next year. There are a lot of frequencies, systems, groups, codes, and little nit-picky details that have to go into our radios before we can even pick up a single call. On the other hand, radios continue to get more and more powerful, and unfortunately, more complicated to handle all the new options. This doesn't make programming them any easier. Fortunately, we have computers to handle all the programming stuff for us. Just hook the radio up to the computer, find your location on a website, transfer the frequency and channel data into the radio, and you're good to go. Sounds simple, doesn't it? If you've tried to program a digital trunking system, you know how complicated these things can get, and just how unhelpful the manuals can be. Wouldn't it be nice to just have someone go through the process and just "get the damned thing working" without all the theory? Fortunately, there are a combination of tools that you need to master to even begin. FreeSCAN is free software that works with a large number of common scanners and works for both analog and digital systems. FreeSCAN even has tools to import and set up all the frequencies automatically. If you're already comfortable programming digital trunked systems through the number pad, or have no trouble working with whatever software came with your radio, then maybe this book isn't for you. If you aren't good with computers, or you're having trouble with the basic process, don't know the difference between a talk group, site, and system, or are otherwise pulling your hair out trying to get your radio programmed, then this book is for you! We'll walk through getting the software installed and set up, connecting your radio with an appropriate cable and communications port, reading data from the radio, downloading and fine-tuning new frequency data, setting quick keys and locking out extraneous frequencies, and writing that data back out to the radio.

Living Politics in South Africa's Urban Shacklands Jun 30 2020 While much has been written on post-apartheid social movements in South Africa, most discussion centers on ideal forms of movements, disregarding the reality and agency of the activists themselves. In *Living Politics*, Kerry Ryan Chance radically flips the conversation by focusing on the actual language and humanity of post-apartheid activists rather than the external, idealistic commentary of old. Tracking everyday practices and interactions between poor residents and state agents in South Africa's shack settlements, Chance investigates the rise of nationwide protests since the late 1990s. Based on ethnography in Durban, Cape Town, and Johannesburg, the book analyzes the criminalization of popular forms of politics that were foundational to South Africa's celebrated democratic transition. Chance argues that we can best grasp the increasingly murky line between "the criminal" and "the political" with a "politics of living" that casts slum and state in opposition to one another. *Living Politics* shows us how legitimate domains of politics are redefined, how state sovereignty is forcibly enacted, and how the production of new citizen identities crystallize at the intersections of race, gender, and class.

Fanon and the Decolonization of Philosophy Oct 15 2021 Fanon and the Decolonization of Philosophy explores the range of ways in which Frantz Fanon's decolonization theory can reveal new answers to perennial philosophical questions and new paths to social justice. The aim is to show not just that Fanon's thought remains philosophically relevant, but that it is relevant to an even wider range of philosophical issues than has previously been realized. The essays in this book are written by both renowned Fanon scholars and new scholars who are emerging as experts in aspects of Fanonian thought as diverse as humanistic psychiatry, the colonial roots of racial violence and marginalization, and decolonizing possibilities in law, academia, and tourism. In addition to examining philosophical concerns that arise from political decolonization movements, many of the essays turn to the discipline of philosophy itself and take up the challenge of suggesting ways that philosophy might liberate itself from colonial_ and colonizing_ assumptions. This collection will be useful to those interested in political theory, feminist theory, existentialism, phenomenology, Africana studies, and Caribbean philosophy. Its Fanon-inspired vision of social justice is endorsed in the foreword by his daughter, Mireille Fanon-Mend_ s France, a noted human rights defender in the French-speaking world.
