The NexStar User's Guide II Sep 28 2019 Michael Swanson's online discussions with literally thousands of NexStar owners made it clear that there was a desperate need for a book such as this - one that provides a complete, detailed guide to buying, using and maintaining NexStar telescopes. Although this book is highly comprehensive, it is suitable for beginners - there is a chapter on "Astronomy Basics" - and experts alike. Celestron's NexStar telescopes were introduced in 1999, beginning with their first computer controlled "go to" model, a 5-inch. More models appeared in quick succession, and Celestron's new range made it one of the two dominant manufacturers of affordable "go to" telescopes.

Special Economic Zones in Africa Jan 31 2020 "This book, designed for policymakers, academics and researchers, and SEZ program practitioners, provides the first systematic and comprehensive analysis of SEZ programs in Sub-Saharan Africa. It is the result of detailed surveys and case studies conducted during 2009 in ten developing countries, including six in Sub-Saharan Africa. The book provides quantitative evidence of the performance of SEZs, and of the factors which contribute to that performance, highlighting the critical importance not just of the SEZ itself but of the wider national investment climate in which it functions. It also provides a comprehensive guide to the key policy questions that confront governments establishing SEZ programs, including: if and when to launch an SEZ program, what form of SEZ is most appropriate, and how to go about implementing it. Among the most important findings from the study that is stressed in the book is the shift from traditional enclave models of zones to SEZs that are integrated with national trade and industrial strategies, with core trade and social infrastructure, with domestic suppliers, and with local labor markets. Although the book focuses primarily on the experience of Sub-Saharan Africa, its lessons will be applicable to developing countries around the world."

A Guide to the Birds of East Africa Jan 01 2020 For lovers of Alexander McCall Smith, Nicholas Drayson introduces the charming Mr Malik and the East African Ornithological Society in A Guide to the Birds of East Africa. Reserved, honourable Mr Malik. You wouldn't notice him in a Nairobi street - except, perhaps, to comment on his carefully sculpted comb-over - but beneath his unprepossessing exterior lie a warm heart and a secret passion. Not even his closest friends know it, but Mr Malik is head-over-heels in love with the leader of the local Tuesday-morning bird walk, Rose Mbikwa. Little can he imagine the hurdles that lie before him. Even as he plucks up the courage to ask for Rose's hand, thieves, potential kidnappers and corrupt officials, not to mention one particularly determined love rival, seem destined to thwart Mr Malik's chances. Will an Indian gentleman in the heart of Africa be defeated by the many obstacles that stand between him and his heart's desire? Or will honour and decency prevail? 'A funny, ingenious and touching love story' Joanne Harris, The Times 'A delightful comedy... It invites comparison to The No.1 Ladies' Detective Agency books, but it's original and, if anything, has more depth' Daily Mail 'Sweet, charming and utterly wonderful on the subject of birds' Metro Nicholas Drayson was born in England and has lived in Australia since 1982, where he studied zoology and a PhD in 19th century Australian natural history writing. He has worked as a journalist in the UK, Kenya and Australia, writing for publications such as the Daily Telegraph and Australian Geographic. He is the author of three other novels, Confessing a Murder, Love and the Platypus and A Guide to the Beasts of East Africa.

The Motor Cyclist's Handbook the Classic 1911 Guide to the Construction and Management of Motorcycles Dec 24 2021 "It has been said, with truth, that an inherent love of things mechanical finds a more or less definitive place in the character of every Englishman..." So begins The Motor Cyclist's Handbook, a wonderful text from 1911 that describes

in detail the operation of early motorcycles. Created by Charles S. Lake, who wrote weekly columns in *The Model Engineer* magazine, the book was an instant classic. Today it is just as readable. Lavishly illustrated, the book includes chapters on the engine, including two-stroke and four cylinder, compression, carburetor, ignition, transmission, lubrication, accessories, and so on. Some of the bikes featured include the Rudge, Triumph, Hudson, Indian, Scott, and others. It's a delightful trip back in time for any biker - from the collector to the weekend rider. This easy-to-read reprint of this exceptionally rare book is presented in 8.5x11 format, slightly larger than the original. Care has been taken to preserve the integrity of the text.

Reclaiming Development Jun 05 2020 The authors of this book challenge prevailing ideas about free markets and globalization. They question whether globalization is a technological reality that cannot be stopped and ask if the US economy really outperformed its competitors in the 1990s. They show how in each key area--trade and industrial policy, privatization, intellectual property rights, investment and financial policies, exchange rate and currency policy, labour and social welfare -- there are alternatives to neoliberal policies that the historical experience of particular countries prove really works.

Practical Benchmarking: The Complete Guide Feb 23 2022 by Bob Camp The business improvement topic and quality tool called benchmarking is becoming widely understood and broadly applied. There are now applications in almost all segments of the economy including industrial either produce a product or a service, non-profit organizations such as healthcare, government and education. The approach is starting to spread around the globe with initiatives in Europe, Asia Pacific and South America. This is commendable and reassuring and must show that there is significant interest in the approach and that it works. What is missing, however, are books and reference material that are not solely prepared in the US where benchmarking started. These would include examples of applications relevant to the local area and industries. They would include references to articles written about benchmarking appearing in local publications. In this fashion those interested would have near hand case histories of the use of benchmarking and therefore become encouraged to use the technique. Zairi and Leonard have done the benchmarking community a real service by documenting the European view and application of benchmarking to a wide range of examples. But they have not stopped there. Their text includes treatment of a number of related facets of benchmarking that makes this a fairly thorough text.
