The Columbia Companion to American History on Film Oct 31 2019 American history has always been an irresistible source of inspiration for filmmakers, and today, for good or ill, most Americans'sense of the past likely comes more from Hollywood than from the works of historians. In important films such as The Birth of a Nation (1915), Roots (1977), Apocalypse Now (1979), and Saving Private Ryan (1998), how much is entertainment and how much is rooted in historical fact? In The Columbia Companion to American History on Film, more than seventy scholars consider the gap between history and Hollywood. They examine how filmmakers have presented and interpreted the most important events, topics, eras, and figures in the American past, often comparing the film versions of events with the interpretations of the best historians who have explored the topic. Divided into eight broad categories--Eras; Wars and Other Major Events; Notable People; Groups; Institutions and Movements; Places; Themes and Topics; and Myths and Heroes--the volume features extensive cross-references, a filmography (of discussed and relevant films), notes, and a bibliography of selected historical works on each subject. The Columbia Companion to American History on Film is also an important resource for teachers, with extensive information for research or for course development appropriate for both high school and college students. Though each essay reflects the unique body of film and print works covering the subject at hand, every essay addresses several fundamental questions: What are the key films on this topic? What sources did the filmmaker use, and how did the film deviate (or remain true to) its sources? How have film interpretations of a particular historical topic changed, and what sorts of factors--technological, social, political, historiographical--have affected their evolution? Have filmmakers altered the historical record with a view to enhancing drama or to enhance the "truth" of their putative message?

[The Columbia Guide to African American History Since 1939](#) Dec 14 2020 This book is a multifaceted approach to understanding the central developments in African American history since 1939. It combines a historical overview of key personalities and movements with essays by leading scholars on specific facets of the African American experience, a chronology of events, and a guide to further study. Marian Anderson's famous 1939 concert in front of the Lincoln Memorial was a watershed moment in the struggle for racial justice. Beginning with this event, the editors chart the historical efforts of African Americans to address racism and inequality. They explore the rise of the Civil Rights and Black Power movements and the national and international contexts that shaped their ideologies and methods; consider how changes in immigration patterns have complicated the conventional "black/white" dichotomy in U.S. society; discuss the often uneasy coexistence between a growing African American middle class and a persistent and sizable underclass; and address the complexity of the contemporary African American experience. Contributors consider specific issues in African American life, including the

effects of the postindustrial economy and the influence of music, military service, sports, literature, culture, business, and the politics of self-designation, e.g., "Colored" vs. "Negro," "Black" vs. "African American". While emphasizing political and social developments, this volume also illuminates important economic, military, and cultural themes. An invaluable resource, *The Columbia Guide to African American History Since 1939* provides a thorough understanding of a crucial historical period.
