With the click of a finger, you've implanted a thought into your subconscious mind that you won't ever let yourself be part of the majority that fail, part of those stuck in the hamster wheel. You've let yourself know that you're determined to execute your business plans. You've probably heard the saying 'knowledge is power'. Right? Wrong! Applied knowledge is

is only as powerful as the holder, just as a blade is only as dangerous as the one who wields it. Many aspiring entrepreneurs end up spending money on 'educating themselves' buying books, high ticket online courses, and going to seminars but never actually apply what they learn. Some don't even educate themselves at all. This is a disaster waiting to happen. Success will not come. Just like most entrepreneurs, I didn't go to university to study business. During my early years forming my start-up businesses, I struggled immensely with fully understanding business lingo and key terminology.

There's nothing more embarrassing than not knowing key business terminology, not being able to express yourself professionally in business meetings or negotiations, not knowing the correct language to use at crucial turning points and still thinking you're a 'business owner'. I sought understanding and the appropriate knowledge needed to become a professional. I took business very seriously; if I wanted to be successful, I would need all the advantages I could get. I wanted to fix my intellectual blind spots, as I knew this was an advantage my competitors had.
