Workflow Management Systems and Interoperability Nov 21 2019 Workflow management systems (WFMS) are enjoying increasing popular ity due to their ability to coordinate and streamline complex organizational processes within organizations of all sizes. Organizational processes are de scriptions of an organization's activities engineered to fulfill its mission such as completing a business contract or satisfying a specific customer request. Gaining control of these processes allows an organization to reengineer and improve each process or adapt them to changing requirements. The goal of WFMSs is to manage these organizational processes and coordinate their execution. was demonstrated in the first half The high degree of interest in WFMSs of the 1990s by a significant increase in the number of commercial products (once estimated to about 250) and the estimated market size (in combined $2 billion in 1996. Ensuing maturity product sales and services) of about is demonstrated by consolidations during the last year. Ranging from mere e-mail based calendar tools and flow charting tools to very sophisticated inte grated development environments for distributed enterprise-wide applications and systems to support programming in the large, these products are finding an eager market and opening up important research and development op portunities. In spite of their early success in the market place, however, the current generation of systems can benefit from further research and develop ment, especially for increasingly complex and mission-critical applications.

Strategy Builder Jan 04 2021 A visual and interactive guide to building and communicating strategies that actually work YOUR STRATEGY HAS SEVEN SECONDS TO CAPTIVATE ITS AUDIENCE… So how are you going to present it? A big wordy document? A lengthy address? Slides full of bullet points? The best way to engage and involve people is through pictures. Strategy Builder shows you how to creatively combine the best strategy frameworks to orient and animate strategy discussion and development in your team. This visual, interactive guide, with illustrations by Visory, uses real world examples and practical tips to help you: Discover the five key foundations that every strategy should be built upon Draw compelling and unique pictures that capture your organization's distinct strategies Develop your skills as a leader of strategy discussions Understand how to use interactive drawing to engage others and achieve 'buy in' Additional online resources available including Strategy Drawing Templates, plus Builder Slides and case studies materials for instructors. Locate the 'Companion Website' link towards the bottom of this page to access these materials. Test your strategic vision or develop a new strategic plan based on the best elements of key strategic frameworks by trying the FREE interactive Strategy Builder app, developed in association with StrategyBlocks, at www.strategicplan.com Praise for Strategy Builder: Cummings & Angwin are pioneers in introducing novel approaches in teaching and applying the principles of strategy --Robert M. Grant, Bocconi University, author of Contemporary Strategy Analysis In a complex, fast changing world, where we are bombarded by words, numbers and reports, the visual-first approach to strategy provided by Strategy Builder is immensely helpful for inspiring and communicating a clearer vision of how to move forward. -- Rachna Bhasin, VP Strategy, SiriusXM At last someone has grasped this idea and come up with a way to help us demonstrate strategic plans and ambitions in a creative new way. --Vikki Heywood CBE, Chair of The Royal Society for the Arts This wonderful book is the first to solve a near-universal problem: communicating strategic ideas is just as hard and just as important as coming up with them in the first place, and both are visual activities. The question is not "Do you understand?" but "Do you see?" --William Duggan, Professor, Columbia University, author Strategic Intuition This book shows how to draw an organization's strategy so you see what's been considered, what's not been considered, and how things are related,. Strategy building is presented as a fun and involving learning process.The approach is revolutionary in that it enables not only the development but also the easy sharing of strategic understanding. --Roger L.M. Dunbar, Emeritus Professor, Stern School of Business, New York University What a great idea! They layout is also really thoughtful; it makes you immediately want to get out a pencil and start doodling. --Adam Martin, Customer Solutions Director, The Brakes Group As a time pressed executive it was a delight to find a book that I can dip into to find the best strategic frameworks - those that have proved the test of time and academic scrutiny as being truly useful in the workplace. Even better for an inveterate scribbler: endorsement that a picture and 'permission to play' with ideas visually really does say a thousand words and more! --Sarah Mitson, Global Business Director, TNSGlobal This is an invaluable resource for any executive wanting to improve engagement in strategy development and communication. The accessible layout means that the book itself can play an active and inspiring role in strategy discussions. --Matt Thomas, Director, Braxton Associates, Strategy Consultants At last a book that grasps the implications of recent psychology: people think visually as well as verbally. The authors provide powerful visual devices that will both help managers conceive better strategies and enable their people to execute them more effectively. --Richard Whittington, Professor at Saïd Business School, Oxford University A powerful approach to make strategy more engaging again! Strategy Builder is landmark book is destined to make an important impact to the field of strategy, strategizing and strategic management. Executives across the board (and students of strategy) will find the core message of this book counterintuitive and compelling. The idea of "drawing" strategy may seem like child's play, yet all great strategists and philosophers know that it is through such "serious play" that allows us to see things differently so that we can see different things. --Robert Wright, Professor of Strategy, Hong Kong Polytechnic University

IBM IMS Solutions for Automating Database Management Apr 26 2020 Over the last few years, IBM® IMSTM and IMS tools have been modernizing the interfaces to IMS and the IMS tools to bring them more in line with the current interface designs. As the mainframe software products are becoming more integrated with the Windows and mobile environments, a common approach to interfaces is becoming more relevant. The traditional 3270 interface with ISPF as the main interface is no longer the only way to do some of these processes. There is also a need to provide more of a common looking interface so the tools do not have a product-specific interface. This allows more cross product integration. Eclipse and web-based interfaces being used in a development environment, tooling using those environments provides productivity improvements in that the interfaces are common and familiar. IMS and IMS tools developers are making use of those environments to provide tooling that will perform some of the standard DBA functions. This book will take some selected processes and show how this new tooling can be used. This will provide some productivity improvements and also provide a more familiar environment for new generations DBAs. Some of the functions normally done by DBA or console operators can now be done in this eclipse-based environment by the application developers. This means that the need to request these services from others can be eliminated. This IBM Redbooks® publication examines specific IMS DBA processes and highlights the new IMS and IMS tools features, which show an alternative way to accomplish those processes. Each chapter highlights a different area of the DBA processes like: PSB creation Starting/stopping a database in an IMS system Recovering a database Cloning a set of databases

IBM GDPS Active/Active Overview and Planning Mar 26 2020 IBM® Geographically Dispersed Parallel SysplexTM (GDPS®) is a collection of several offerings, each addressing a different set of IT resiliency goals. It can be tailored to meet the recovery point objective (RPO), which is how much data can you are willing to lose or recreate, and the recovery time objective (RTO), which identifies how long can you afford to be without your systems for your business from the initial outage to having your critical business processes available to users. Each offering uses a combination of server and storage hardware or software-based replication, and automation and clustering software technologies. This IBM Redbooks® publication presents an overview of the IBM GDPS active/active (GDPS/AA) offering and the role it plays in delivering a business IT resilience solution.

*Advances in Smart Technologies in Structural Engineering* Oct 21 2019 This book collects invited lectures presented and discussed on the AMAS & ECCOMAS Workshop/Thematic Conference SMART'o3. The SMART'o3 Conference on Smart Materials and Structures was held in a 19th century palace in Jadwisin near Warsaw, 2-5 September 2003, Poland .It was organized by the Advanced Materials and Structures (AMAS) Centre of Excellence at the Institute of Fundamental Technological Research (IFTR) in Warsaw,ECCOMAS - European Community on Computational Methods in Applied Sciences and SMART-TECH Centre at IFTR. The idea of the workshop was to bring together and consolidate the community of Smart Materials and Structures in Europe. The workshop was attended by 66 participants from n European countries (Austria, Belgium, Finland, France, Germany, Italy, Poland, Portugal, Spain, UK, Ukraine), 1 participant from Israel and 1 participant from the USA. The workshop program was grouped into the following major topics: 4 sessions on Structural Control (18 presentations), 3 sessions on Vibration Controland Dynamics (14 presentations), 2 sessions on Damage Identification (10 presentations), 2 sessions on Smart Materials (9 presentations). Each session was composed of an invited lecture and some contributed papers. Every paper

scheduled in the program was presented, so altogether 51 presentations were given. No sessions were run in parallel. The workshop was attended not only by researchers but also by people closely related to the industry. There were interesting discussions on scientific merits of the presented papers as well as on future development of the field and its possible industrial applications.
