[Nursing Informatics 2014](#) Aug 25 2022 Standing, as it does, at the intersection of the information, computer, social and behavioral sciences and healthcare, and dealing with the resources, devices and methods required to optimize the acquisition, storage, retrieval and use of information in health and biomedicine, nursing informatics is increasingly crucial in modern healthcare. This book presents selected papers from the Twelfth Nursing Informatics Congress (NI2014), held in Taipei, Taiwan in June 2014, and entitled 'East meets West eSMART+'. The aim of the congress is to provide a single, high-profile, internationally renowned forum for research in the theory and practice of nursing informatics. The comprehensive scientific program focuses on mobile and web technologies with healthcare delivery applications, as well as currently relevant core topics including patient safety and quality, data information management, usability, meaningful use and educating for competencies. Containing 68 papers selected from the 280 presentations by delegates from more than 30 countries, the book presents an overview of current research and practice which will be of interest to all those whose healthcare role involves the use of modern information technology.

[Digital Anatomy](#) Apr 21 2022 This book offers readers fresh insights on applying Extended Reality to Digital Anatomy, a novel emerging discipline. Indeed, the way professors teach anatomy in classrooms is changing rapidly as novel technology-based approaches become ever more accessible. Recent studies show that Virtual (VR), Augmented (AR), and Mixed-Reality (MR) can improve both retention and learning outcomes. Readers will find relevant tutorials about three-dimensional reconstruction techniques to perform virtual dissections. Several chapters serve as practical manuals for students and trainers in anatomy to refresh or develop their Digital Anatomy skills. We developed this book as a support tool for collaborative efforts around Digital Anatomy, especially in distance learning, international and interdisciplinary contexts. We aim to leverage source material in this book to support new Digital Anatomy courses and syllabi in interdepartmental, interdisciplinary collaborations. Digital Anatomy - Applications of Virtual, Mixed and Augmented Reality provides a valuable tool to foster cross-disciplinary dialogues between anatomists, surgeons, radiologists, clinicians, computer scientists, course designers, and industry practitioners. It is the result of a multidisciplinary exercise and will undoubtedly catalyze new specialties and collaborative Master and Doctoral level courses world-wide. In this perspective, the UNESCO Chair in digital anatomy was created at the Paris Descartes University in 2015 ([www.anatomieunesco.org](http://www.anatomieunesco.org)). It aims to federate the education of anatomy around university partners from all over the world, wishing to use these new 3D modeling techniques of the human body.

**Near Field Communication** Jul 20 2019 Near Field Communication is a radio frequency technology that allows objects, such as mobile phones, computers, tags, or posters, to exchange information wirelessly across a small distance. This report on the progress of Near Field Communication reviews the features and functionality of the technology and summarizes the broad spectrum of its current and anticipated applications. We explore the development of NFC technology in recent years, introduce the major stakeholders in the NFC ecosystem, and project its movement toward mainstream adoption. Several examples of early implementation of NFC in libraries are highlighted, primarily involving the use of NFC to enhance discovery by linking books or other physical objects with digital information about library resources, but also including applications of NFC to collection management and self-checkout. Future uses of NFC in libraries, such as smart posters or other enhanced outreach, are envisioned as well as the potential for the "touch paradigm" and "Internet of things" to transform the ways in which library users interact with the information environment. Conscious of the privacy and security of our patrons, we also address continuing concerns related to NFC technology and its expected applications, recommending caution, awareness, and education as immediate next steps for librarians.

**Android Application Development for the Intel Platform** Aug 13 2021 The number of Android devices running on Intel processors has increased since Intel and Google announced, in late 2011, that they would be working together to optimize future versions of Android for Intel Atom processors. Today, Intel processors can be found in Android smartphones and tablets made by some of the top manufacturers of Android devices, such as Samsung, Lenovo, and Asus. The increase in Android devices featuring Intel processors has created a demand for Android applications optimized for Intel Architecture: Android Application Development for the Intel® Platform is the perfect introduction for software engineers and mobile app developers. Through well-designed app samples, code samples and case studies, the book teaches Android application development based on the Intel platform—including for smartphones, tablets, and embedded devices—covering performance tuning, debugging and optimization. This book is jointly developed for individual learning by Intel Software College and China Shanghai JiaoTong University.

**NdTV Frauds** Apr 09 2021 This book is a classic example of how media organizations misuse, violate laws in connivance with crony capitalists, pliant law firms and politicians to amass personal wealth. This is a narrative of how two promoters of NDTV along with key top management colluded over the years with government functionaries and politicians to break laws, evade taxes and deceive shareholders of a public listed company. All this obviously through political patronage and "wheeling-and-dealing" as part of the Lutynens club and how they created a biased public discourse for a select elite class. In the minds of the Indian citizen, there is a space and respect for media. Using the halo of journalism and under the garb of Freedom of Press, media owners misuse their position and in the end, degrade the values of journalism. On several occasions media became the tool of false propaganda, blackmailing and illegal money making with the blessing of uncouth politicians and corporate icons with hidden agendas. This ought to be exposed and that is the reason for this book.
