Working with Human Service Organisations Nov 28 2019 Workers in human service organisations often find work with clients relatively manageable, but struggle to work effectively with their employing agency, particularly when translating professional values and a client-centred approach to practice. Working with Human Service

Organisations provides students and human service workers with a range of tools to assist them to reflect and act critically and creatively within organisations. In Part One, the current context for workers and organisations is examined in relation to organisational theory and practice theory. In Part Two, a model for integrated practice is proposed to enable students to make connections between their professional training and the aims and structures of the organisation.

`This is an excellent book and should be

compulsory reading for social work students. It is clearly written, sensitively related to social work practice, with some first-rate examples; above all, it really "speaks" to the realities of contemporary statutory professional practice in the twenty-first century. Andrew Hill has written a thorough but readable text for students which they will find useful at any stage in their qualification degree.---David Shemmings, University of Kent --

Distributed User Interfaces: Usability and Collaboration Nov 08 2020 Written by international researchers in the field of Distributed User Interfaces (DUIs), this book brings together important contributions regarding collaboration and usability in Distributed User Interface settings. Throughout the thirteen chapters authors address key questions concerning how collaboration can be improved by using DUIs, including: in which situations a DUI is suitable to ease the collaboration among users; how usability standards can be used to evaluate the usability of systems based on DUIs; and accurately describe case studies and prototypes implementing these concerns. Under a collaborative scenario, users sharing common goals may take advantage of DUI environments to carry out their tasks more successfully because DUIs provide a shared environment where the users are allowed to manipulate information in the same space and at the same time. Under this hypothesis, collaborative DUI scenarios open new challenges to usability evaluation techniques and methods. Distributed User Interfaces: Collaboration and Usability presents an integrated view of different approaches related to Collaboration and Usability in Distributed User Interface settings, which demonstrate the state of the art, as well as future directions in this novel and rapidly evolving subject area.

Launching Liberalism May 15 2021 In this volume, prominent political theorist Michael Zuckert presents an important and pathbreaking set of meditations on the thought of John Locke. In more than a dozen provocative essays, many appearing in print for the first time, Zuckert explores the complexity of Locke's engagement with his philosophical and theological predecessors, his profound influence on later liberal thinkers, and his amazing success in transforming the political understanding of the Anglo-American world. At the same time, he also demonstrates Locke's continuing relevance in current debates involving such prominent thinkers as Rawls and MacIntyre. Zuckert's careful reconsideration of Locke's role as "launcher" of liberalism involves a sustained engagement with the hermeneutical issues surrounding Locke, an innovator who faced special rhetorical needs in addressing his contemporaries and the future. It also involves highlighting the novelty of Locke's position by examining his stance toward the philosophical and religious traditions in place when he wrote. Zuckert argues that neither of the dominant ways of understanding Locke's relations to his predecessors and contemporaries is adequate; he is not well seen as a follower of any orthodoxy nor of any anti-orthodoxy of his day, either philosophical or theological. He found a path to innovation that was philosophically radical but which was also able to connect with prevailing and accepted traditions. That allowed him to exercise a practical influence in history rarely, if ever, matched by any other philosopher. Zuckert illustrates that influence by showing how William Blackstone used Lockean philosophy to reshape the common law and how the Americans of the eighteenth century used Lockean philosophy to reshape Whig political thought. Zuckert argues that Locke's philosophy has continuing philosophic and political force, a proposition he demonstrates by arguing that Locke presents a form of political philosophy superior to that of the liberal theorists of our day and that he has solid rejoinders to contemporary critics of liberalism.

The President as Leader Oct 20 2021 "Hargrove argues that political leadership must contain a moral element if it is to be fully effective ... He suggests a model with which to analyze, compare, and evaluate political leaders, and then assesses the presidencies of Franklin Roosevelt, Lyndon Johnson, and Ronald Reagan according to the model's normative implications."--Jacket.
The Employer's Role in Linking School and Work Aug 25 2019 This document, which is addressed to employers and others wishing to foster school-to-career programs, reflects the views of the Committee for Economic Development regarding employers' role in linking school and work. The following topics are among those discussed in chapters 1-3: youth and careers (present versus past labor markets, causes of trouble finding jobs,

changing skill requirements, challenges for schools and society, costs of the skills gap); learning for the new economy (importance of raising academic achievement; school-to-career as a strategy for motivation and instruction; evidence regarding the effectiveness of programs linking school and work; importance of moving to scale); and employer roles in improving learning (promoting academic achievement through high standards and supportive company practices; advocating school-to-career reforms; providing work experience for students and teachers; facilitating employer participation through intermediaries). Chapter 4 discusses actions that schools and the government can take and makes the following recommendations to employers: support high academic achievement through policy and company practice; join and support intermediary organizations that link employers and schools; and participate in programs that use work experience to promote academic learning and career exploration. Appended are the addresses of 20 school-to-career resource organizations and contains 127 endnotes. (MN)

Women, Work, and Globalization Dec 10 2020 Women increasingly make up a significant percentage of the labor force throughout the world. This transformation is impacting everyone's lives. This book examines the resulting gender role, work, and family issues from a comparative worldwide perspective. Working allows women to earn an income, acquire new skills, and forge social connections. It also brings challenges such as simultaneously managing domestic responsibilities and family relationships. The

social, political, and economic implications of this global transformation are explored from an interdisciplinary perspective in this book. The commonalities and the differences of women's experiences depending on their social class, education, and location in industrialized and developing countries are highlighted throughout. Practical implications are examined including the consequences of these changes for men. Engaging vignettes and case studies from around the world bring the topics to life. The book argues that despite policy reforms and a rhetoric of equality, women still have unique experiences from men both at work and at home. Women, Work, and Globalization explores: Key issues surrounding work and families from a global cross-cultural perspective. The positive and negative experiences of more women in the global workforce. The spread of women's empowerment on changes in ideologies and behaviors throughout the world. Key literature from family studies, IO, sociology, anthropology, and economics. The changing role of men in the global work-family arena. The impact of sexual trafficking and exploitation, care labor, and transnational migration on women. Best practices and policies that have benefited women, men, and their families. Part 1 reviews the research on gender in the industrialized and developing world, global changes that pertain to women's gender roles, women's labor market participation, globalization, and the spread of

the women's movement. Issues that pertain to women in a globalized world including gender socialization, sexual trafficking and exploitation, labor migration and transnational motherhood, and the complexities entailed in care labor are explored in Part 2. Programs and policies that have effectively assisted women are explored in Part 3 including initiatives instituted by NGOs and governments in developing countries and (programs) policies that help women balance work and family in industrialized countries. The book concludes with suggestions for global initiatives that assist women in balancing work and family responsibilities while decreasing their vulnerabilities. Intended as a supplemental text for advanced undergraduate and/or graduate courses in Women/Gender Issues, Work and Family, Gender and Families, Global/International Families, Family Diversity, Multicultural Families, and Urban Sociology taught in psychology, human development and family studies, gender and/or women's studies, business, sociology, social work, political science, and anthropology. Researchers, policy makers, and practitioners in these fields will also appreciate this thought provoking book.

Is It Working? Researching Context to Improve Curriculum Jul 29 2022 It is a bold thing to ask, "Is what we are doing working?" We know the danger of evaluating things as the world does — with measurements and financial strength. We rightly rejoice at the stories of faithful ministry with little fruit and know that it says something profound about our God and his true servants. And yet . . . Good leadership has always asked whether the wineskins are adequate for the new wine. Traditional Western theology has brought various benefits throughout the world but has failed to sufficiently encourage the development of local theologizing required in every context. At the triennial ICETE international consultation in 2015, institutional leaders from a diverse global background presented research-driven revision of theological education designed to improve understanding of the real ministry needs and better equip students to minister in their own contexts. These reports of institutional change and their insights, compiled in this publication, show a new path to effective theological education. With widespread support across the world from educators involved with ICETE, the concept of research-driven change in theological education institutions is here to stay and will continue to grow in importance. This book is an invitation to courageously embrace these concepts and join in understanding and theologizing for your own context.

Studies of Work and the Workplace in HCI Feb 21 2022 This book has two purposes. First, to introduce the study of work and the workplace as a method for informing the design of computer systems to be used at work. We primarily focus on the predominant way in which the organization of work has been approached within the field of human-computer interaction (HCI), which is from the perspective of ethnomethodology. We locate studies of work in HCI within its intellectual antecedents, and describe paradigmatic examples and case

studies. Second, we hope to provide those who are intending to conduct the type of fieldwork that studies of work and the workplace draw off with suggestions as to how they can go about their own work of developing observations about the settings they encounter. These suggestions take the form of a set of maxims that we have found useful while conducting the studies we have been involved in. We draw from our own fieldwork notes in order to illustrate these maxims. In addition we also offer some homilies about how to make observations; again, these are ones we have found useful in our own work.
