Creativity and Technology in Mathematics Education Nov 03 2022 This volume provides new insights on creativity while focusing on innovative methodological approaches in research and practice of integrating technological tools and environments in mathematics teaching and learning. This work is being built on the discussions at the mini-symposium on Creativity and Technology at the International Conference on Mathematical Creativity and Giftedness (ICMCG) in Denver, USA (2014), and other contributions to the topic. The book emphasizes a diversity of views, a variety of contexts, angles and cultures of thought, as well as mathematical and educational practices. The authors of each chapter explore the potential of technology to foster creative and divergent mathematical thinking, problem solving and problem posing, creative use of dynamic, multimodal and interactive software by teachers and learners, as well as other digital media and tools while widening and enriching transdisciplinary and interdisciplinary connections in mathematics classroom. Along with ground-breaking innovative approaches, the book aims to provide researchers and practitioners with new paths for diversification of opportunities for all students to become more creative and innovative mathematics learners. A framework for dynamic learning conditions of leveraging mathematical creativity with technology is an outcome of the book as well.

A Guide to Faculty Development Apr 15 2021 Since the first edition of A Guide to Faculty Development was published in 2002, the dynamic field of educational and faculty development has undergone many changes. Prepared under the auspices of the Professional and Organizational Development Network in Higher Education (POD), this thoroughly revised, updated, and expanded edition offers a fundamental resource for faculty developers, as well as for faculty and administrators interested in promoting and sustaining faculty development within their institutions. This essential book offers an introduction to the topic, includes twenty-three chapters by leading experts in the field, and provides the most relevant information on a range of faculty development topics including establishing and sustaining a faculty development program; the key issues of assessment, diversity, and technology; and faculty development across institutional types, career stages, and organizations. "This volume contains the gallant story of the emergence of a movement to sustain the vitality of college and university faculty in difficult times. This practical guide draws on the best minds shaping the field, the most productive experience, and elicits the imagination required to envision a dynamic future for learning societies in a global context." -R. Eugene Rice, senior scholar, Association of American Colleges and Universities "Across the country, people in higher education are thinking about how to prepare our graduates for a rapidly changing world while supporting our faculty colleagues who grew up in a very different world. Faculty members, academic administrators, and policymakers alike will learn a great deal from this volume about how to put together a successful faculty development program and create a supportive environment for learning in challenging times." -Judith A. Ramaley, president, Winona State University "This is the book on faculty development in higher education. Everyone involved in faculty development—including provosts, deans, department chairs, faculty, and teaching center staff—will learn from the extensive research and the practical wisdom in the Guide." -Peter Felten, president, The POD Network (2010-2011), and director, Center for the Advancement of Teaching and Learning, Elon University
