docks for his livelihood. Leaving his family in the hands of his mother, he and his brothers fought the flames for twenty-seven hours. Realizing the hopelessness of the situation, Jackson gave in to his exhaustion and arrived home only to be told his whole family had expired from a horrible illness. To rebuild a life for himself, Jackson sought out his German friend Carl to begin what they had dreamt of together, owning a farm in partnership. Now, Jackson could be independent from the White man. Unfortunately, Carl saw a greater vision, and had already begun a more lucrative automobile 'fix-it' shop. As Jackson saw Baltimore beginning to rise from the ashes, he was even more determined to finally do what he had always wanted. He would go for it alone. Besides, he had heard land was cheap in Ohio. While on his way, Jackson hooked up with some shady characters who offered him a 'partnership' in the sale of the goods they were taking to Stanton, Ohio in exchange for

There, Jackson came face to face with his destiny: meeting the White woman he would learn to hate, the woman he would grow to respect and the only person who could teach him farming. Through their years together, their trials and tribulations were many. Even though a love/hate relationship developed between them, Jackson's drive and perseverance won Anna's respect. Were they really in love?

**Dr. Folkman's War** Apr 30

2020 In 1961, twenty-eight-year-old Dr. Judah Folkman saw something while doing medical research in a United States navy lab that gave him the first glimmering of a wild, inspired hunch. What if cancerous tumors, in order to expand, needed to trigger the growth of new blood vessels to feed themselves? And if that was true, what if a way could be found to stop that growth? Could cancers be starved to death? Dr. Folkman had ample reason to be self confident — second in his class at Harvard Medical School, he was already considered one of the most promising doctors of his

generation. But even he never guessed that his idea would eventually grow into a multibillion-dollar industry that is now racing through human trials with drugs that show unparalleled promise of being able to control cancer, as well as other deadly diseases. For the creation of this book, Dr. Judah Folkman cooperated fully and exclusively with acclaimed science writer Robert Cooke. He granted Cooke unlimited interviews, showed him diaries and personal papers, and threw open the doors of his lab. The result is an astonishingly rich and candid chronicle of one of the most significant medical discoveries of our time and of the man whose vision and persistence almost single-handedly has made it possible. Dr. Folkman's radical new way of thinking about cancer was once considered preposterous. So little was known about how cancer spreads and how blood vessels grow that he wasn't even taken seriously enough to be considered a heretic. Other

the waste of a great mind, and ambitious young medical researchers were told that accepting a position in Folkman's lab would be the death of their careers. Now, though, the overwhelming majority of experts believes that the day will soon come when antiangiogenesis therapy supplants the current more toxic and less-effective treatments — chemotherapy, radiation, and surgery—as the preferred method of treatment for cancer in patients around the world, and Dr. Folkman's breakthrough will come to be taken for granted the way we now take for granted the polio vaccine and antibiotics. Dr. Folkman's War brilliantly describes how high the odds are against success in medical research, how vicious the competition for grants, how entrenched the skepticism about any genuinely original thinking, how polluted by politics and commerce the process of getting medicine into patients' hands. But it also depicts with rare power how exalted a calling medicine is
