Indo-European Poetry and Myth Sep 16 2021 The Indo-Europeans, speakers of the prehistoric parent language from which most European and some Asiatic languages are descended, most probably

lived on the Eurasian steppes some five or six thousand years ago. Martin West investigates their traditional mythologies, religions, and poetries, and points to elements of common heritage. In *The East Face of Helicon* (1997), West showed the extent to which Homeric and other early Greek poetry was influenced by Near Eastern traditions, mainly non-Indo-European. His new book presents a foil to that work by identifying elements of more ancient, Indo-European heritage in the Greek material. Topics covered include the status of poets and poetry in Indo-European societies; metre, style, and diction; gods and other supernatural beings, from Father Sky and Mother Earth to the Sun-god and his beautiful daughter, the Thunder-god and other elemental deities, and earthly orders such as Nymphs and Elves; the forms of hymns, prayers, and incantations; conceptions about the world, its origin, mankind, death, and fate; the ideology of fame and of immortalization through poetry; the typology of the king and the hero; the hero as warrior, and the conventions of battle narrative.

Demystifying Brahminism and Re-Inventing Hinduism Apr 11 2021 'Religion is a tool in the hands of the oppressor against the oppressed solely because he frames the commandments and calls them the God's', is an apt description of the Hindu social order. The book rips open the raw nerve of Hinduism—its invidious castes, positioned as a 'God-ordained' institution, commandeered by its freebooter priestly class while clandestinely establishing its religious, social and political hegemony through interpolation of its pristine and effulgent scriptures. The author boldly analyses this imbroglio through a microscopic analysis of these and more related issues: • How priests controlled the Hindu religious, social, educational and political apparatus? • How the dominant priestly class fractured the society into mutually antagonistic subordinated hierarchical segments, and ruled it by reserving all elite jobs for itself? • How the fiendish priesthood emasculated shudras by depriving them of the 'shastra and shastra' (education and arms) and made them permanent 'village servant classes'? • How the pretensions of attaining siddhis through 'meditation and penances' established priests as the 'gods on earth' for their assertions of 'purity and effulgence'? • How 'karma', 'reincarnation' and '84-lakhs births' theories were devised to justify fatalism and hierarchical gradation of varnas? • Can India be rightfully called the 'vishvaguru' and the mother of all civilisations? • How Buddhism effeminated Hindus and made them the doormats for the ruthless? • Why Hindus had to abandon their own, to adopt foreign institutions of governance? • Why Hinduism should become a universal and proselytising faith and fight demographic challenges posed by Islam and Christianity?

Fight club helps her beat back her survivor's guilt, but it means dealing with Riddick. Logos Arete May 12 2021 It is the intent of this text to allow a more in-depth study to be made by the student of Greek history by having the essential data more readily available in this spreadsheet format. The pursuit of one's objective can be much more easily and quickly carried out if the student's train of thought can be maintained until the time that his final conclusions can be reached. The intent is not to give a thoroughly complete encyclopedic source of information about Greek history as that type of data is readily available in any public library. Once the names of the character, his point of fame, his family relationships and his place of birth, etc. are known, it will be much easier to find source material from virtually hundreds, if not thousands, of texts that have a treasure-trove of information that is not always being used because of the complexity involved in finding it. What this writer is doing in this text is giving the reader an introduction to the important characters of Greek history in much the same way we find out about a person we might meet at a party, exchanging general personal information like, "What Do You Do For a Living?" or "Are You Married?" and so forth. In addition, he has taken the liberty to assess the relative importance of each notable ancient Greek so that the reader's effort might be spent in a more beneficial way. Latitude has been left for some healthy controversy. Since Heinrich Schliemann discovered the site of ancient Troy, the academic community has taken criticism for their doubting of the factual nature of ancient Greek history. That has gone too far. The last century and a quarter has proven that the modern archaeologist is up to the task, giving open and accurate analysis of the finds that they have made without regards to pressure to misrepresent data so preconceived theories can be allowed to stand. The modern historians have also exonerated themselves by accepting their error and by moving in the direction of open-minded

The Psychosocial Implications of Disney Movies Apr 30 2020 In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney

music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

European Perceptions of Terra Australis Sep 23 2019 Terra Australis - the southern land - was one of the most widespread concepts in European geography from the sixteenth to the eighteenth centuries, although the notion of a land mass in the southern seas had been prevalent since classical antiquity. Despite this fact, there has been relatively little sustained scholarly work on European concepts of Terra Australis or the intellectual background to European voyages of discovery and exploration to Australia in the eighteenth and nineteenth centuries. Through interdisciplinary scholarly contributions, ranging across history, the visual arts, literature and popular culture, this volume considers the continuities and discontinuities between the imagined space of Terra Australis and its subsequent manifestation. It will shed new light on familiar texts, people and events - such as the Dutch and French explorations of Australia, the Batavia shipwreck and the Baudin expedition - by setting them in unexpected contexts and alongside unfamiliar texts and people. The book will be of interest to, among others, intellectual and cultural historians, literary scholars, historians of cartography, the visual arts, women's and post-colonial studies.
