Zero Hours Contracts in Scotland: Interim Report - HC 654 Jun 26 2022 Zero hours contracts and other forms of casual labour can benefit workers and employers in Scotland but the Scottish Affairs Committee's inquiry has shown that, too often, the relationship is unbalanced, leaving the employer with all of the flexibility and few costs and the worker in fear of dismissal, denied access to due rights of employment and, in some cases, earning less than the minimum wage. The Government recognises that poor practice exists and needs to be addressed but the UK Government's consultation on zero hours contracts was too narrow. The Government must do more to protect workers who wish to challenge unfair, unsafe or unlawful conditions of employment. Workers should be told from the outset of their employment what type of contract they are on and a written contract setting out the terms and conditions must follow within two months. There should be a minimum notice period of work and workers should not be punished for turning down offers of work made within that period. Where workers arrive for work but find none available then the employer should compensate them for the inconvenience. Travel time between appointments should be paid and pay for zero hours workers should accurately reflect the number of hours that are worked to fulfil contracted duties. The recommendations will improve the working conditions of people on zero hours contracts but the Committee's overriding conclusion is that, in the majority of cases, zero hours contracts need not and should not be used at all.

A Theology of the Spirit in Doctrine and Demonstration Jan 10 2021 This book is called a festschrift--meaning a book of essays written to honor those who have served the academic community well over a long period of time. Drs Wonsuk and Julie Ma, the honorees in this book, served as faculty members, Journal pioneers and editors and academic dean (Wonsuk) at the Asia Pacific Theological Seminary (www.apts.edu) for twenty-four years, 1983-2006. The theme selected for this book: A Theology of the Spirit in Doctrine and Demonstration reflects the heart of the kind of people the Mas have been and continue to be in academics, practical ministry and, most importantly, in their personal lives. Democracy's Guardians Feb 08 2021 "In its six-decade history, the German Federal Constitutional Court has become one of the most powerful and influential constitutional tribunals in the world. It has played a central role in the establishment of liberalism, democracy, and the rule of

law in post-war West Germany, and it has been a model for constitutional tribunals in many other nations. The Court stands virtually unchallenged as the most trusted institution of the German state. A complex history of the German Federal Constitutional Court from its founding in 1951 up into the twenty-first century, this book explores how the court became so powerful, and why so few can resist its strengths. Through a comprehensive narrative of the Court's remarkable rise and careful analysis of its periodic crises, the work carefully dissects the success of the Court, presenting not only a traditional work of legal history, but a public history - both political and societal - as well as a doctrinal and jurisprudential account. Structured around the Court's major decisions from 1951 to 2001, the book examines popular and political reactions to those decisions, drawing heavily on newspaper accounts of major judgments and material from the archives of individual politicians and judges. The result is an impressive case study of the global phenomenon of constitutional justice"--Unedited summary from book jacket.

The Northeast Question Jun 14 2021 This book explores the idea, psychology and political geography of Northeast India as forged by two interrelated but autonomous meta-narratives. First, the politics of conflict inherent in, and therefore predetermined by physical geography, and second, the larger geopolitics that was unfolding during the colonial period. Unravelling the history behind the turmoil engulfing Northeast India, the study contends that certain geographies — most pertinently fertile river valleys and surrounding mountains which feed the rivers — are integral to nature and any effort to disrupt this cohesion will result in conflict. It comprehensively traces the geopolitics of the region since colonial era — in particular the Great Game; the politics that went into the making of the McMahon Line, the Radcliffe Line and the Pemberton Line; the region's relations with its international neighbours (China, Bhutan, Myanmar, Bangladesh and Nepal); as well as the issue of many formerly non-state-bearing populations awakening to the reality of the modern state. Lucid and analytical, this book will be of great interest to scholars and researchers of Northeast India, modern Indian history, international relations, defence and strategic studies, and political science.

Troubled Transit Jul 28 2022 Troubled Transit considers the situation of asylum seekers stuck in limbo in Indonesia from a number of perspectives. It presents not only the narratives of many transit migrants but also the perceptions of Indonesian authorities and of representatives of international and non-government organizations responsible for the care of transiting asylum seekers. Fascinated by the extraordinary and seemingly limitless resilience shown by asylum seekers during their often lengthy and dangerous journeys, the author highlights one particular fragment of their journeys — their time in Indonesia, which many expect to be the last stepping stone to a new life. While they long for their new life to unfold, most asylum seekers become embroiled in the complexities of living in transit. Indonesia, a vast archipelago of more than 17,000 islands, is more than a location where people spend time waiting; it is a nation state that interacts with transiting asylum seekers and formulates policies that have a profound impact on their experience in transit there. Troubled Transit tries to explain the complexities faced by the transiting migrants within the context of the Indonesian government and its political challenges, including its relationship with Australia. The Australia-centric view of recent asylum seeker issues has tended to ignore the larger socio-political context of the migratory routes and the perspectives of transit states towards asylum seekers stuck in transit. This book hopes to direct the Australia-centric gaze northwards to take Indonesian policies and policymaking into account, thereby giving Indonesia more relevance as a transit country and as an important partner in regional protection schemes and migration management. Even though some Indonesian policies and practices are less than favourable for asylum seekers, and even reprehensible from a human rights perspective, more attention must be paid to ongoing developments that impact on transiting asylum seekers in Indonesia if any of the hardships they suffer there are to be alleviated.

Vote Buying in Indonesia Jan 28 2020 Muhtadi's analysis of vote-buying in post-democratization Indonesia is original, profound, subtle, nuanced, and convincing as well as beautifully organized and well written. Equally important, its imaginative policy prescriptions will be widely read and cited as a significant contribution to the literature of comparative electoral politics. —William Liddle, Ohio State University, USA This book presents a pathbreaking analysis of vote-buying in Indonesia. Drawing on a stunning array of evidence, Muhtadi reveals the mechanics, patterns and effects of vote-buying with unprecedented clarity. [Title] is a must read for anyone interested in Indonesian politics or in the comparative politics of clientelism. —Edward Aspinnall, Australian National University, Australia This book contains a trove of interesting research questions, a novel theoretical contribution, impressive empirical work, and a deep and nuanced understanding of the Indonesian case. —Allen Hicken, University of Michigan, USA This book is open access under a CC BY 4.0 license. This book investigates the impact of vote buying on the accountability of democratic institutions and policy representation in newly democratic countries, with a focus on Indonesia. In doing so, the book presents a wide-ranging study of the dynamics of vote buying in Indonesia's young democracy, exploring the nature, extent, determinants, targeting and effectiveness of this practice. It addresses these central issues in the context of comparative studies of vote buying, arguing that although party loyalists are disproportionately targeted in vote buying efforts, in total numbers—given the relatively small number of party loyalists in Indonesia—vote buying hits more uncommitted voters. It also demonstrates that the effectiveness of vote buying on vote choice is in the 10 percent range, which is sufficient for many candidates to secure a seat and thus explains why they still engage in vote buying despite high levels of leakage. Burhanuddin Muhtadi is a lecturer at State Islamic University, Jakarta. He is also an executive director of Indonesian Political Indicator and Director of Public Affairs at Indonesian Survey Institute (LSI). He has published his articles in numerous scholarly journals.--

Encyclopedia of Nordic Crime Fiction Oct 31 2022 Since the late 1960s, the novels of Sjöwall and Wahlöö's Martin Beck detective series, along with the works of Henning Mankell, Håkan Nesser and Stieg Larsson, have sparked an explosion of Nordic crime fiction—grim police procedurals treating urgent sociopolitical issues affecting the contemporary world. Steeped in noir techniques and viewpoints, many of these novels are reaching international audiences through film and television adaptations. This reference guide introduces the world of Nordic crime fiction to English-speaking readers. Caught between the demands of conscience and societal strictures, the detectives in these stories—like the heroes of Norse mythology—know that they and their world must perish, but fight on regardless of cost. At a time of bleak eventualities, Nordic crime fiction interprets the bitter end as a celebration of the indomitable human spirit.

Intellectual Property and Genetically Modified Organisms Aug 29 2022 Taking a global viewpoint, this volume addresses issues arising from recent developments in the enduring and topical debates over Genetically Modified Organisms (GMOs) and their relationship to Intellectual Property (IP). The work examines changing responses to the growing acceptance and prevalence of GMOs. Drawing together perspectives from several of the leading international scholars in this area, the contributions seek to break away from analysis of safety and regulation and examine the diversity of ways the law and GMOs have become entangled. This collection presents the start of a much broader engagement with GMOs and law. As GMO technology becomes increasingly more complex and embedded in our lives, this volume will be a useful resource in leading further discussion and debate about GMOs in academia, in government and among those working on future policy.
