**Recent Advances in Information Systems and Technologies** Dec 31 2019 This book presents a selection of papers from the 2017 World Conference on Information Systems and Technologies (WorldCIST'17), held between the 11st and 13th of April 2017 at Porto Santo Island, Madeira, Portugal. WorldCIST is a global forum for researchers and practitioners to present and discuss recent results and innovations, current trends, professional experiences and challenges involved in modern Information Systems and Technologies research, together with technological developments and applications. The main topics covered are: Information and Knowledge Management; Organizational Models and Information Systems; Software and Systems Modeling; Software Systems, Architectures, Applications and Tools; Multimedia Systems and Applications; Computer Networks, Mobility and Pervasive Systems; Intelligent and Decision Support Systems; Big Data Analytics and Applications; Human-Computer Interaction; Ethics, Computers & Security; Health Informatics; Information Technologies in Education; and Information Technologies in Radiocommunications.

**Mobile Computing and Wireless Communications** May 16 2021 This book, suitable for IS/IT courses and self study, presents a comprehensive coverage of the technical as well as business/management aspects of mobile computing and wireless communications. Instead of one narrow topic, this classroom tested book covers the major building blocks (mobile applications, mobile computing platforms, wireless networks, architectures, security, and management) of mobile computing and wireless communications. Numerous real-life case studies and examples highlight the key points. The book starts with a discussion of m-business and m-government initiatives and examines mobile computing applications such as mobile messaging, m-commerce, M-CRM, M-portals, M-SCM, mobile agents, and sensor applications. The role of wireless Internet and Mobile IP is explained and the mobile computing platforms are analyzed with a discussion of wireless middleware, wireless gateways, mobile application servers, WAP, i-mode, J2ME, BREW, Mobile Internet Toolkit, and Mobile Web Services. The wireless networks are discussed at length with a review of wireless communication principles, wireless LANs with emphasis on 802.11 LANs, Bluetooth, wireless sensor networks, UWB (Ultra Wideband), cellular networks ranging from 1G to 5G, wireless local loops, FSO (Free Space Optics), satellites communications, and deep space networks. The book concludes with a review of the architectural, security, and management/support issues and their role in building, deploying and managing wireless systems in modern settings.

**Wiley CMA Learning System Exam Review 2013, Financial Decision Making, + Test Bank** Dec 23 2021 Part 2: Financial Decision Making Includes access to the Online Test Bank, which contains over 1,000 multiple-choice questions Features sample essay questions, knowledge checks, exam tips, and practice questions Multiple-choice question feedback helps CMA candidates focus on areas where they need the most work Helps candidates prepare a solid study plan with exam tips Focuses on important ratios and other analytical tools used to evaluate an organization's financial health Examines key concepts in corporate finance Reviews fundamental information about the decision-making process Feature section examines Financial Statement Analysis, Corporate Finance, Decision Analysis and Risk Management, Investment Decisions, and Professional Ethics Based on the CMA body of knowledge developed by the Institute of Certified Management Accountants (ICMA), Wiley CMA Learning System Exam Review 2013 features content derived from the exam Learning Outcome Statements (LOS). Passing the CMA exam on your first attempt is possible. We'd like to help. IMA, the association of accountants and financial professionals in business, is one of the largest and most respected associations focused exclusively

on advancing the management accounting profession. Globally, IMA supports the profession through research, the CMA (Certified Management Accountant) program, continuing education, networking, and advocacy of the highest ethical business practices. IMA has a global network of more than 65,000 members in 120 countries and 200 local chapter communities. IMA provides localized services through its offices in Montvale, NJ, USA; Zurich, Switzerland; Dubai, UAE; and Beijing, China. For more information about IMA, please visit [www.imanet.org](http://www.imanet.org).

*Wiley CMA Learning System Exam Review 2013, Financial Decision Making, Online Intensive Review + Test Bank* Feb 22 2022 This bundled product includes Wiley CMA Learning System Part 2: Financial Decision Making covers the topics of Financial Statement Analysis, Corporate Finance, Decision Analysis and Risk Management, Investment Decisions, and Professional Ethics. It contains key formulas, knowledge checks at the end of each topic, study tips, and practice questions providing candidates with what they need to pass Part 2 of the CMA Exam. In addition, it includes Part 2 of the self-study online intensive review as well as access to the test bank with over 1,100 questions.

*Wiley CMA Learning System Exam Review 2013, Financial Planning, Performance and Control, Online Intensive Review + Test Bank* Oct 21 2021 This bundled product suite includes the Wiley CMA Learning System Part 1: Financial Planning, Performance and Control which covers the topics of Planning, Budgeting, and Forecasting, Performance Management, Cost Management, Internal Controls, and Professional Ethics. In addition, it includes Part 1 of the self-study online intensive review as well as access to the test bank with over 900 questions.

**Enterprise Information Systems: Concepts, Methodologies, Tools and Applications** Aug 07 2020 This three-volume collection, titled Enterprise Information Systems: Concepts, Methodologies, Tools and Applications, provides a complete assessment of the latest developments in enterprise information systems research, including development, design, and emerging methodologies. Experts in the field cover all aspects of enterprise resource planning (ERP), e-commerce, and organizational, social and technological implications of enterprise information systems.

**Outsourcing and Insourcing in an International Context** Sep 07 2020 Designed for upper-level undergraduate or graduate courses in production-operations management, management information systems, international business, and strategic management, this text focuses on concepts, processes, and methodologies for firms planning to undertake or currently involved in outsourcing-insourcing decisions. "Outsourcing and Insourcing in an International Context" is the only available text that includes coverage of the international risk factors associated with this strategy. The book presents a balanced view of the positive and negative aspects of outsourcing, and provides essential coverage of the fundamental techniques involved in any outsourcing-insourcing decision. In addition, it discusses the ethical ramifications of outsourcing for companies and governments around the world. Each chapter includes learning objectives, discussion questions, and sample problems. An Instructor's Manual, Test Bank, and PowerPoint presentation are available to teachers who adopt the text.

*Fundamentals of Information Systems* Jul 26 2019 Combining the latest research and most current coverage available into a succinct nine chapters, FUNDAMENTALS OF INFORMATION SYSTEMS, 8E equips students with a solid understanding of the core principles of IS and how it is practiced. The streamlined 560-page eighth edition features a wealth of new examples, figures, references, and cases as it covers the latest developments from the field--and highlights their impact on the rapidly changing role of today's IS professional. In addition to a stronger career emphasis, the text includes expanded coverage of mobile solutions, energy and environmental concerns, the increased use of cloud computing across the globe, and two cases per chapter. Learning firsthand how information systems can increase profits and reduce costs, students explore new information on e-commerce and enterprise systems, artificial intelligence, virtual reality, green computing, and other issues reshaping the industry. The text introduces the challenges and risks of computer crimes, hacking, and cyberterrorism. It also presents some of the most current research on virtual communities, global IS work solutions, and social networking. No matter where students' career paths may lead, FUNDAMENTALS OF INFORMATION SYSTEMS, 8E and its resources can help them maximize their success as employees, decision makers, and business leaders. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

**Information Security and Auditing in the Digital Age** Aug 31 2022 This book provides a recent and relevant coverage based on a systematic approach. Especially suitable for practitioners and managers, the book has also been classroom tested in IS/IT courses on security. It presents a systematic approach to build total systems solutions that combine policies, procedures, risk analysis, threat assessment through attack trees, honeypots, audits, and commercially available security packages to secure the modern IT assets (applications, databases, hosts, middleware services and platforms) as well as the paths (the wireless plus wired network) to these assets. After covering the security management and technology principles, the book shows how these principles can be used to protect the digital enterprise assets. The emphasis is on modern issues such as e-commerce, e-business and mobile application security; wireless security that includes security of Wi-Fi LANs, cellular networks, satellites, wireless home networks, wireless middleware, and mobile application servers; semantic Web security with a discussion of XML security; Web Services security, SAML (Security Assertion Markup Language) and .NET security; integration of control and audit concepts in establishing a secure environment. Numerous real-life examples and a single case study that is developed throughout the book highlight a case-oriented approach. Complete instructor materials (PowerPoint slides, course outline, project assignments) to support an academic or industrial course are provided. Additional details can be found at the author website ([www.amjadumar.com](http://www.amjadumar.com))

**Business Management** Apr 02 2020 The world is in a constant state of flux, and this influences the operations of every business and organisation. Business Management: A Contemporary Approach deals with these changes by covering the functions of a business or an organisation and then addressing the contemporary issues that affect them. These issues include globalisation, corporate entrepreneurship and citizenship, credit, diversity and HIV/AIDS. Every student of business and business manager needs to understand the importance of these issues and their influence on the operations of a business. Business Management: A Contemporary Approach also highlights the interdependency between the various business functions. This interdependency is very important for a business or organisation to operate as a whole.

ICICKM2011-Proceedings of the 8th International Conference on Intellectual Capital, Knowledge Management & Organisational Learning Mar 26 2022

Design of Industrial Information Systems Jun 16 2021 Design of Industrial Information Systems presents a body of knowledge applicable to many aspects of industrial and manufacturing systems. New software systems, such as Enterprise Resource Planning, and new hardware technologies, such as RFID, have made it possible to integrate what were separate IT databases and operations into one system to realize the greatest possible operational efficiencies. This text provides a background in, and an introduction to, the relevant information technologies and shows how they are used to model and implement integrated IT systems. With the growth of courses in information technology offered in industrial engineering and engineering management programs, the authors have written this book to show how such computer-based knowledge systems are designed and used in modern manufacturing and industrial companies. Introduces Data Modeling and Functional Architecture Design, with a focus on integration for overall system design Encompasses hands-on approach, employing many in-chapter exercises and end-of-chapter problem sets with case studies in manufacturing and service industries Shows the reader how Information Systems can be integrated into a wider E-business/Web-Enabled Database business model Offers applications in Enterprise Resource Planning (ERP) and Manufacturing Execution Systems (MES)

*Business Information Systems and Technology* Mar 02 2020 Business information systems and business information technology are integral aspects of modern business, and managers in these areas are now expected to have knowledge of human and managerial issues, as well as technical ones. This concise and readable book is a level-by-level primer that addresses the core subjects in business information systems and business information technology to enhance students' understanding of the key areas. Each chapter begins with a case study and features at the end: a summary of major points, glossary of terms, suggested further reading and student activities. Some areas covered include: Different functional areas of business, including accounting, HRM and marketing Development and implementation of information systems Methods to support the analysis and design of policy and practice Strategic management to align information technology with organizational needs Covering the subject matter in a highly accessible manner, this is an ideal text for both undergraduate and masters students on business information systems, business information technology and business information management courses. This text is supplemented with over 900 detailed powerpoint slides for instructors, accessible via the Routledge Instructor Resource page at <http://cw.routledge.com/textbooks/instructordownload/>

**Data Mining VIII** May 28 2022 Information Engineering Management has found applications in many areas, including environmental conservation, economic planning, resource integration, cartography, urban planning, risk assessment, pollution control and transport management systems. Technology plays an active role in the relationship of Data Mining to environmental conservation planning. Bringing together papers presented at the Eighth International Conference on Data, Text and Web Mining and their Business Applications, this book addresses the new developments in this important field. Featured topics include: Text Mining; Web Content, Structures and Usage Mining; Clustering Technologies; Categorisation Methods; Link Analysis; Data Preparation; Applications in Business, Industry and Government; Applications in Science Engineering; National Security; Customer Relationship Management; Competitive Intelligence; Mining Environment and Geospatial Data; Business Process Management (BPM); Enterprise Information Systems; Applications of GIS and GPS; Applications of MIS; Remote Sensing; Information Systems Strategies and Methodologies and Bio Informatics.

*Human-computer Interaction and Management Information Systems* Jun 04 2020 Provides commentaries and descriptions of research programs that guides 21st century scholars, graduate students, and industry professionals. This work focuses on applications and evaluations including special case studies, specific contexts or tasks, HCI methodological concerns, and the use and adoption process.

Wiley CMA Learning System Exam Review 2013, Financial Planning, Performance and Control, + Test Bank Nov 21 2021 Part 1: Financial Planning, Performance and Control Includes access to the Online Test Bank, which contains over 850 multiple-choice questions Multiple-choice question feedback helps CMA candidates focus on areas where they need the most work Prepare for the actual CMA exam with Section Practice Tests and a cumulative Part 1 exam Assess your progress with knowledge check questions/answers and sample essay questions Looks at basic budgeting concepts and forecasting techniques Deals with the methods of comparing actual financial performance to the budget Helps candidates prepare a solid study plan with exam tips Feature section examines the topics of Planning, Budgeting and Forecasting, Performance Management, Cost Management, Internal Controls, and Professional Ethics Based on the CMA body of knowledge developed by the Institute of Certified Management Accountants (ICMA), Wiley CMA Learning System Exam Review 2013 features content derived from the exam Learning Outcome Statements (LOS). Passing the CMA exam on your first attempt is possible. We'd like to help. IMA, the association of accountants and financial professionals in business, is one of the largest and most respected associations focused exclusively on advancing the management accounting profession. Third Generation Distributed Computing Environments Jun 28 2022 Umar provides a collection of powerful services to support the e-business andm-business initiatives of today and tomorrow. (Computer Books)

Innovation Management Jun 24 2019 Offering a conceptual framework that integrates strategy, product, process and human resource research, this timely book interrogates these four critical and interrelated areas of innovation management. Chapters examine new insights into the latest trends in the field, providing a holistic view into key management strategies that benefit both up-and-coming and established businesses.

**International Encyclopedia of Hospitality Management 2nd edition** Jul 06 2020 The International Encyclopedia of Hospitality Management is the definitive reference work for any individual studying or working in the hospitality industry. There are 185 Hospitality Management degrees in the UK alone. This new edition updates and significantly revises twenty five per cent of the

entries and has an additional twenty new entries. New online material makes it the most up-to-date and accessible hospitality management encyclopedia on the market. It covers all of the relevant issues in the field of hospitality management from a sectoral level (lodging, restaurants/food service, time-share, clubs and events) as well as a functional one (accounting and finance, marketing, strategic management, human resources, information technology and facilities management). Its unique, user-friendly structure enables readers to find exactly the information they require at a glance – whether they require broad detail that takes a more cross-sectional view across each subject field or more focused information that looks closely at specific topics and issues within the hospitality industry today.

**E-Business and Distributed Systems Handbook** Oct 01 2022 "This is overview of an extensive handbook that systematically discusses how to translate e-business strategies to working solutions by using the latest distributed computing technologies. This module of the handbook paints the big picture of the Next Generation Real-time Enterprises with numerous case studies to highlight the key points. "

**Research Anthology on Decision Support Systems and Decision Management in Healthcare, Business, and Engineering** Jul 18 2021 Decision support systems (DSS) are widely touted for their effectiveness in aiding decision making, particularly across a wide and diverse range of industries including healthcare, business, and engineering applications. The concepts, principles, and theories of enhanced decision making are essential points of research as well as the exact methods, tools, and technologies being implemented in these industries. From both a standpoint of DSS interfaces, namely the design and development of these technologies, along with the implementations, including experiences and utilization of these tools, one can get a better sense of how exactly DSS has changed the face of decision making and management in multi-industry applications. Furthermore, the evaluation of the impact of these technologies is essential in moving forward in the future. The Research Anthology on Decision Support Systems and Decision Management in Healthcare, Business, and Engineering explores how decision support systems have been developed and implemented across diverse industries through perspectives on the technology, the utilizations of these tools, and from a decision management standpoint. The chapters will cover not only the interfaces, implementations, and functionality of these tools, but also the overall impacts they have had on the specific industries mentioned. This book also evaluates the effectiveness along with benefits and challenges of using DSS as well as the outlook for the future. This book is ideal for decision makers, IT consultants and specialists, software developers, design professionals, academicians, policymakers, researchers, professionals, and students interested in how DSS is being used in different industries.

**The 8th International Conference on Knowledge Management in Organizations** Nov 09 2020 The proceedings from the eighth KMO conference represent the findings of this international meeting which brought together researchers and developers from industry and the academic world to report on the latest scientific and technical advances on knowledge management in organizations. This conference provided an international forum for authors to present and discuss research focused on the role of knowledge management for innovative services in industries, to shed light on recent advances in social and big data computing for KM as well as to identify future directions for researching the role of knowledge management in service innovation and how cloud computing can be used to address many of the issues currently facing KM in academia and industrial sectors.

**International Business Research** Nov 29 2019 As more and more companies enter the global business arena, it is critical that they acquire relevant information specific to their industry and the country that they wish to enter. This book explains how to perform accurate, timely, and appropriate research to make informed strategic decisions. The chapters of "International Business Research" follow the overall research process - defining the research problem, explanation of research methodologies, data analysis, report writing and dissemination. The book presents methodologies for most functional areas and can be used as a research tool for the broad international business field. It includes in-chapter learning objectives, exercises, summaries, boxed inserts, and a detailed glossary. In addition, a sample data disk is bound into each copy of the book.

**Advanced Multimedia and Ubiquitous Engineering** Sep 27 2019 This book presents the combined proceedings of the 13th International Conference on Multimedia and Ubiquitous Engineering (MUE 2019) and the 14th International Conference on Future Information Technology (Future Tech 2019), both held in Xi'an, China, April 24 - 26, 2019. The aim of these two meetings was to promote discussion and interaction among academics, researchers and professionals in the field of ubiquitous computing technologies. These proceedings reflect the state of the art in the development of computational methods, involving theory, algorithms, numerical simulation, error and uncertainty analysis and novel applications of new processing techniques in engineering, science, and other disciplines related to ubiquitous computing.

*International Encyclopedia of Hospitality Management* Aug 19 2021 The International Encyclopedia of Hospitality Management covers all of the relevant issues in the field of hospitality management from both a sectoral level: \* Lodging \* Restaurants \* Clubs \* Time-share \* Conventions As well as a functional one: \* Accounting & finance \* Marketing \* Human resources \* Information technology \* Facilities management Its unique user-friendly structure enables readers to find exactly the information they require at a glance; whether they require broad detail which takes a more cross-sectional view across each subject field, or more focussed information which looks closely at specific topics and issues within the hospitality industry today. **Human-computer Interaction and Management Information Systems: Foundations** Dec 11 2020 "Human-Computer Interaction and Management Information Systems: Foundations" offers state-of-the-art research by a distinguished set of authors who span the MIS and HCI fields. The original chapters provide authoritative commentaries and in-depth descriptions of research programs that will guide 21st century scholars, graduate students, and industry professionals. Human-Computer Interaction (or Human Factors) in MIS is concerned with the ways humans interact with information, technologies, and tasks, especially in business, managerial, organizational, and cultural contexts. It is distinctive in many ways when compared with HCI studies in other disciplines. The MIS perspective affords special importance to managerial and organizational contexts by focusing on analysis of tasks and outcomes at a level that considers organizational effectiveness. With the recent advancement of technologies and development of many sophisticated applications, human-centeredness in MIS has become more critical than ever before. This book focuses on the basics of HCI, with emphasis on concepts, issues, theories, and models that are related to understanding human tasks, and the interactions among humans, tasks, information, and technologies in organizational contexts in general.

Online and Distance Learning: Concepts, Methodologies, Tools, and Applications Apr 14 2021 "This comprehensive, six-volume collection addresses all aspects of online and distance learning, including information communication technologies applied to education, virtual classrooms, pedagogical systems, Web-based learning, library information systems, virtual universities, and more. It enables libraries to provide a foundational reference to meet the information needs of researchers, educators, practitioners, administrators, and other stakeholders in online and distance learning"--Provided by publisher.

**Essentials of Management Information Systems** Apr 26 2022 An in-depth look at how today's businesses use information technologies. Many businesses look for candidates who know how to use information systems, making a general understanding of information systems an asset to any business professional. Laudon and Laudon emphasize how business objectives shape the application of new information systems and technologies. The ninth edition focuses on currency and cutting-edge topics.

**Advanced Intelligent Systems for Sustainable Development (AI2SD'2018)** Jan 12 2021 This book gathers papers presented at the International Conference on Advanced Intelligent Systems for Sustainable Development (AI2SD-2018), which was held in Tangiers, Morocco on 12–14 July 2018. It highlights how advanced intelligent systems have successfully been used to develop tools and techniques for modeling, prediction and decision support in connection with the environment. Though chiefly intended for researchers and practitioners in advanced intelligent systems for sustainable development, the book will also be of interest to those working in environment and the Internet of Things, environment and big data analysis, summarization, prediction, remote sensing & geo-information, geophysics, marine and coastal environments, and sensor networks for environment services.

Encyclopedia of Multimedia Technology and Networking Aug 26 2019 "This encyclopedia offers a comprehensive knowledge of multimedia information technology from an economic and technological perspective"--Provided by publisher.

**Enterprise Information Systems and Implementing IT Infrastructures: Challenges and Issues** Oct 09 2020 "This book aims at identifying potential research problems and issues in the EIS such as Enterprise Resource Planning (ERP), Supply Chain Management (SCM), and Customer Relationship Management (CRM)"--Provided by publisher.

**Modernizing Academic Teaching and Research in Business and Economics** Oct 28 2019 This proceedings volume brings together the results of a corporate discussion on research, academic teaching and education in the field of business and economics in the context of globalization. The contributions examine leadership and sustainability, quality and governance and the internationalization of higher education. With a particular focus on business education and business schools, the book discusses the labor market and modernization as well as contemporary trends and challenges. By including both academic papers and contributions from industry, it forges research links between academia, business and industry.

**Management Information Systems** Nov 02 2022 Management Information Systems provides comprehensive and integrative coverage of essential new technologies, information system applications, and their impact on business models and managerial decision-making in an exciting and interactive manner. The twelfth edition focuses on the major changes that have been made in information technology over the past two years, and includes new opening, closing, and Interactive Session cases.

Sep 19 2021

*Advances in Information Systems Development*: Feb 10 2021 The two-volume *Advances in Information Systems Development: Bridging the Gap between Academia and Industry* constitutes the collected proceedings of the Fourteenth International Conference on Information Systems Development: Methods and Tools, Theory and Practice – ISD'2005 Conference. The focus of these volumes is to examine the exchange of ideas between academia and industry and aims to explore new solutions. The proceedings follow the seven conference tracks highlighted at the Conference: Co-design of Business and IT; Communication and Methods; Human Values of Information Technology; Service Development and IT; Requirements Engineering in the IS Life-Cycle; Semantic Web Approaches and Applications; and Management and IT.

**Management Information Systems** Jul 30 2022 For undergraduate and graduate-level courses in Management Information Systems. This book emphasizes the digital integration of the firm through enterprise applications (management of the supply chain, customer relationships, enterprise systems, and knowledge).

Human-Computer Interaction and Management Information Systems: Applications. Advances in Management Information Systems May 04 2020 "Human-Computer Interaction and Management Information Systems: Applications" offers state-of-the-art research by a distinguished set of authors who span the MIS and HCI fields. The original chapters provide authoritative commentaries and in-depth descriptions of research programs that will guide 21st century scholars, graduate students, and industry professionals. Human-Computer Interaction (or Human Factors) in MIS is concerned with the ways humans interact with information, technologies, and tasks, especially in business, managerial, organizational, and cultural contexts. It is distinctive in many ways when compared with HCI studies in other disciplines. The MIS perspective affords special importance to managerial and organizational contexts by focusing on analysis of tasks and outcomes at a level

that considers organizational effectiveness. With the recent advancement of technologies and development of many sophisticated applications, human-centeredness in MIS has become more critical than ever before. This work focuses on applications and evaluations including special case studies, specific contexts or tasks, HCI methodological concerns, and the use and adoption process.

**EJKM Volume 9 Issue 4** Mar 14 2021

**Research in Systems Analysis and Design: Models and Methods** Jan 30 2020 This book constitutes the proceedings of the 4th EuroSymposium on Systems Analysis and Design, SIGSAND/PLAIS 2011, held in Gdańsk, Poland, in September 2011. The objective of this symposium is to promote and develop high-quality research on all issues related to systems analysis and design (SAND). It provides a forum for SAND researchers and practitioners in Europe and beyond to interact, collaborate, and develop their field. The 9 papers were carefully reviewed and selected from 20 submissions. An additional revision took place after the conference to incorporate discussion results from the presentation. The contributions are organized into topical sections on business process modeling, integrated systems development, and software development.

*Wiley CMA Learning System Exam Review 2013, Test Bank* Jan 24 2022 Wiley CMA Learning System consists of Part 1: Financial Planning, Performance and Control which covers the topics of Planning, Budgeting, and Forecasting, Performance Management, Cost Management, Internal Controls, and Professional Ethics. As well as Part 2: Financial Decision Making covers the topics of Financial Statement Analysis, Corporate Finance, Decision Analysis and Risk Management, Investment Decisions, and Professional Ethics. It contains key formulas, knowledge checks at the end of each topic, study tips, and practice questions providing candidates with what they need to pass the CMA Exam. Also included is access to the CMA test bank which contains over 2,000 questions
