technologies for language

learning, the integration of

technology into the foreign

language curriculum, the role of technology in the teaching and learning process, language materials development, and web-enhanced language instruction.

**7001 Resumes-Plus Second Edition** Oct 23 2019 In this

second chronicle about

Deborah, she faces an enemy

whose sole purpose is to kill

every human being in the

universe. The location of the

enemy's home planets is

unknown. This enemy has

unlimited ships and no concern

about the high losses to their

personnel. The initial

evaluation is that the enemy

may not even be human. They

are given the name, Grays. A

creature like the Grays seems

rather harmless compared to

what fiction shows you. The

Grays went unchallenged only because they looked so weak and fragile. No one saw them as a serious threat. I can only think of the army ants on the march. No one takes an ant seriously; however, an army of ants will devastate an area and kill every living creature. The Grays are the same type of threat to mankind. As the Grays are building up their fleets and personnel, Deborah desperately searches the known universe for additional personnel; in this search she even goes to primitive nations. The United States strips its military forces to provide as many personnel as possible. Despite this effort, there are still not enough personnel. Deborah's scientists are working around the clock to not only upgrade her weapons, but also provide her with new types of weapons. Ramah and the United States are making a maximum effort to prepare for the upcoming battle with the Grays. In this battle either the humans or the Grays will become extinct.
