The Car Care World Jun 26 2019 We all need mechanics, yet half of us don't trust them. The Car Care World is a collection of humorous factual auto advice columns. Easy reads, these pearls of wisdom are written in consumer-advocate style by an experienced mechanic. The sometimes contentious viewpoints of owners and mechanics are discussed with humor. Some of the reasons for the distrust are explored, and some solutions are offered. The reader will begin to understand whom to trust and when to trust them. This is not a book about how to fix your own car, although hundreds of repair tips are presented, along with solid advice about necessary and unnecessary repairs to today's cars. It is a series of stories that will enlighten you about getting a car fixed by professionals without being duped, whether you "know cars" or not.

MTConnect: To Measure Is To Know Aug 21 2021 This book, MTConnect: To Measure Is To Know, answers the question, "how and why a royalty-free and open source standard is revolutionizing the business and technology of manufacturing." This is the world's first book on MTConnect and open systems. This book is not just about MTConnect, but it is first a book that discusses the many lessons learned in the world of open systems. Dave Edstrom has spent 35 years in the computer industry, where he worked at such companies as Sun Microsystems for over 23 years. Dave helps the reader understand that MTConnect is not an evolution in manufacturing, but it is a revolution and a true game changer. MTConnect is making possible the dreams and desires of generations of manufacturers, machine tool builders and manufacturing equipment providers who all want to see the same goal of different devices having a common connection on the plant floor. Learn how and why the lessons of open systems are being applied to manufacturing and changing the business and technology of manufacturing with MTConnect. It is available at Amazon in paperback and in Kindle format, at Google Play aka Android as well as on iTunes at Apple.

Automotive Sensory Systems Mar 28 2022 The rapidly growing need for mobility has brought with it a major challenge for improvement in the operation and utilization of automotive systems. The economical, environmental and safety constraints imposed by the increase in the number of road vehicles and subsequent government policies also require substantial product development through the application of information technology. This involves the enhancement of vehicle informatics and telematic systems with additional sensors and systems. The advance in the design and development of automotive sensory systems is so rapid that there is urgent need for the experts involved in the technology to work together to provide a reference book for the engineer of today and tomorrow. This motivated me to spend two years researching the topics and the basis on which such a book should be written. The result is the present compilation of the work of international experts on the state-of-the-art in the field of automotive sensory systems. Thus, a unique collection has been created for the reference of all those concerned with, or interested in, the design and development of modern, safe and intelligent vehicles. Although this book is intended for engineers, managers, scientists, academicians and policy makers, students should also find it valuable. To meet the requirements of students the basics are explained in simple terms; however, it is hoped that others will appreciate this approach, since most of us are well aware that gaps remain in our knowledge of the elements of our profession.

Think before You Think Aug 28 2019 *Think Before You Think* is about why you do what you do. It is about: • why you are happy in one moment, miserable the next and elated in another • why the rich get richer, sick get sicker and lucky get luckier. It is about: • understanding how you live in an artificially created reality • how to exit the matrix, your mind creates by thoughts and emotions • how to find clarity, confidence, and connection in your life and business. *Think Before You Think* explains why: • it's not WHAT you do • it's not HOW you do It's all about how you THINK and FEEL. 'It's not the things in your life, it's your thinking behind the things that shapes your destiny.' – Harish Gulati
