RFC/RAF Engine Repair Shops- France 1914 to 1918 Jan 20 2022 Some years ago, Aidan Williams published two articles for Cross and Cockade, the Journal of the First World War Aviation Historical Society. The subject of both articles was the relatively little-known Engine Repair Shops of the Royal Flying Corps (later the Royal Air Force) in France during the Great War. Aidan has updated the information, added background stories, and included more photographs and extra details to introduce the history of the Engine Repair Shops to a whole new readership. In 1915, Scarborough-born Second Lieutenant Louis Frederick Rudston Fell joined the Engine Repair Shops as Assistant Equipment Officer; by 1919, he was Lieutenant Colonel L. F. R. Fell DSO OBE, and he continued to play an important role in British aero engine development up to the Second World War. In addition, Air Mechanic Thomas Boland's working day in the rotary engine section is described.

Management Adaptations in Jet Engine Repair at a Naval Aviation Depot in Support of Operation Desert Shield/Storm Oct 17 2021 From November 1990 through the end of February 1991, six carrier battle groups and two Marine air wings operated simultaneously in Southwest Asia in Operation Desert Shield/Storm (ODS/S). This massive deployment of Naval and marine aviation units put pressure on the Naval supply system to provide needed parts and supplies. Since certain items, such as jet engines, were particularly susceptible to breakdowns in the harsh desert environment in which the forces were operating, some divisions of the Naval aviation depots (NADEPs) were tasked to 'surge' selected repairs to provide the theater with spare end items and repair parts. One such division was the engine shop at NADEP North Island (San Diego, CA) which, among other tasks, was asked to surge its repair of T64 jet engines, the engines used in CH-53 helicopters. This Note focuses on the surge-related problems faced at North Island and on the management adaptations, particularly in materiel support, devised there in response. We visited North Island to discuss the production surge. To put North Island's experience in its proper context, we also visited the NADEPs at Cherry Point, NC, at Jacksonville, FLA, and at Norfolk, VA, as well as the Naval Air Systems Command in Washington, D.C., and the Aviation Supply Office in Philadelphia, PA.

Toyota 2f Engine Repair Manual Jun 13 2021 Factory engine repair manual for the iconic 2F petrol/gasoline engine as fitted to the Toyota 40, 55 and 60 Series four wheel drive vehicles. This repair manual has been prepared to provide information covering general repair for 2F Gasoline engine as fitted to the TOYOTA LAND CRUISER. Per Toyota Motor Sales Co., LTD. The Toyota 2F engine was one of the "F" series of OHV inline-6 cylinder engines produced by Toyota between 1955-1992. "F" Series engines are known for their high amount of torque at low RPM, massive cast iron blocks and heads and also their high reliability. The 2F Engine had one of the longest production runs of any Toyota engine. The "F" Series engines all incorporate overhead valves actuated by pushrods from a gear driven camshaft in the lower portion of the engine. The engine was first introduced in the Toyota FJ40 Land Cruiser, and in many countries, was the only gasoline engine offered in the Landcruiser until 1993. Although it's commonly badged as the Land Cruiser engine, it was used in a variety of other large truck applications as well, such as in fire trucks and the Toyota FQ15 trucks. It was also used in the Crown based Japanese Police Patrol Cars FH26 and FS20-FS50.
