Psychosphere Dec 25 2019 After Richard Garrison lost his sight in a terrorist explosion, he developed vast mental powers that more than compensated for his blindness. He mastered the Psychomech machine, then used it to conquer his enemies and restore his dead love to full and vibrant life. Psychomech also revealed to Garrison the Psychosphere, a startling reality where mental powers reigned supreme and could influence people and events on Earth. Once he was nearly godlike - or demonic, if one dared become his enemy - but now Garrison's mental abilities grow weaker with each use. He tries desperately to conserve his energies, but he has begun to have strange visions of a mind so different from his own as to be other human, and knows he must stay alert and strong. Charon Gubwa has invaded the Psychosphere. Twisted and evil, sexually and mentally warped, physically corrupt, Gubwa's desires are simple: More. More drugs. More sex. More power. More of the Earth under his dominion. Richard Garrison must battle Gubwa in the Psychosphere and on Earth. And he must win, no matter the cost to himself or those he loves, or all mankind will be lost.

Public Management and Governance in Malaysia Nov 16 2021 The past two and a half decades have seen major transformations in public sector management and governance across the globe. This book examines the ways public sector management and governance in Malaysia has changed and is changing under contemporary reform models. Chapters are written by well-established scholars and academics with intimate knowledge in their respective fields, and provide a thorough and insightful analysis of the reform trends and developments on a range of topics. These include performance management, compensation reforms, public budgeting, accounting and reporting, privatisation and public-private partnership, e-government, managing ethics and accountability, local government and inter-governmental relations. While the book surveys the topics that are central to public sector management and governance, it also focuses on the nature of reforms and changes that were introduced, as well as the forces that have shaped their design and implementation process, and the initial impacts and results. Overall, the book provides students and scholars of Politics and Southeast Asian Studies with a greater appreciation and deeper understanding of the recent developments and current trends of public sector management.

Psychology of the Image Mar 20 2022 Psychology of the Image outlines a theoretical framework bringing together the semiotic concepts developed by Charles Peirce, the sociological insights of Ervin Goffman and the psychoanalytic ideas of Jacques Lacan. Image studies in fashion, advertising, photography, film studies and psychology have been influenced by these theorists in significant ways. The framework presented helps the reader understand how these ideas relate to the study of different domains of the image: the internal imagery of dreams, external images such as the photograph and image processes which span both contexts, e.g., images we have about ourselves. The topics discussed are organised into three themes. The first considers mental imagery, including sound and dreams. The second addresses the interdependent nature of internal and external images, e.g., the gendered self and social identity. In the third theme, attention turns to external images including television, film, photography, the computer and the internet. Psychology of the Image will be of interest to undergraduates, postgraduates, lecturers and researchers in the fields of psychology, media studies and sociology.

Public Relations Writing Worktext Jun 11 2021 Public Relations Worktext is a writing and planning resource for public relations students and practitioners.

Public Administration Jan 18 2022 Marc Holzer and Richard W. Schweser have written a fresh and highly engaging textbook for the introductory course in Public Administration. Their coverage is both comprehensive and cutting-edge, including not only all the basic topics (OT, budgeting, HRM), but also reflecting new realities in public administration: innovations in e-government, the importance of new technology, changes in intergovernmental relations, especially the emphasis on inter-local and shared regional resources, and public performance and accountability initiatives. Public Administration has been crafted with student appeal in mind. Each of the book's chapters is generously illustrated with cartoons, quotes, and artwork—all reinforcing the book's theme that the field of public administration is rooted in the cultural and political world. Each chapter is also supported with a listing of key terms, exercises, and additional resources. The textbook is supported by one of the most comprehensive and easy-to-use instructors' manuals of any introductory text on the market today. It contains full lesson plans with activities to accommodate a broad range of teaching and learning styles for each chapter, PowerPoint decks for each chapter (with visuals and links embedded), 8 new long-term project / student presentation ideas, an updated 'Quotes and Notables' section with biographical information and media links for each chapter, updated test questions with answer keys, and updated terms and definitions for each chapter.

Psychotic Temptation Sep 14 2021 How can we understand the pull towards that which we fear: psychosis? In this thought provoking book, Abensour proposes the idea of a temptation towards psychosis rather than a regression, as a response to the hatred or denial of the subject's origins. She shares her reflections on her psychoanalytic work with psychotic patients focusing on their struggle to achieve a coherent sense of a self that can inhabit a shared world. Abensour locates this struggle within the universal human struggle to achieve a balance between what we can and cannot allow ourselves to know about the reality of death and of our insignificance in the world.

Public Goods, Private Goods Oct 03 2020 Much political thinking today, particularly that influenced by liberalism, assumes a clear distinction between the public and the private, and holds that the correct understanding of this should weigh heavily in our attitude to human goods. It is, for instance, widely held that the state may address human action in the "public" realm but not in the "private." In Public Goods, Private Goods Raymond Geuss exposes the profound flaws of such thinking and calls for a more nuanced approach. Drawing on a series of colorful examples from the ancient world, he illustrates some of the many ways in which actions can in fact be understood as public or private. The first chapter discusses Diogenes the Cynic, who flouted conventions about what should be public and what should be private by, among other things, masturbating in the Athenian marketplace. Next comes an analysis of Julius Caesar's decision to defy the Senate by crossing the Rubicon with his army; in doing so, Caesar asserted his dignity as a private person while acting in a public capacity. The third chapter considers St. Augustine's retreat from public life to contemplate his own, private spiritual condition. In the fourth, Geuss goes on to examine recent liberal views, questioning, in particular, common assumptions about the importance of public dialogue and the purportedly unlimited possibilities humans have for reaching consensus. He suggests that the liberal concern to maintain and protect, even at a very high cost, an inviolable "private sphere" for each individual is confused. Geuss concludes that a view of politics and morality derived from Hobbes and Nietzsche is a more realistic and enlightening way than modern liberalism to think about human goods.

Ultimately, he cautions, a simplistic understanding of privacy leads to simplistic ideas about what the state is and is not justified in doing.

Loose-leaf Version for Psychology: The Science of Person, Mind, and Brain Jun 30 2020 In Psychology: The Science of Person, Mind, and Brain, experienced teacher, researcher, and author Daniel Cervone provides students with a new and exciting way of understanding psychology. Cervone organizes material around three levels of analysis -- person, mind, and brain -- and employs a person-first format that consistently introduces topics at the person level: theory and research on the lives of people in sociocultural contexts. Students are able to make sense of the latest research through what they understand best: people. With fellow teacher and researcher Tracy Caldwell, Cervone has conceived a text beyond the print experience from the ground up, integrating online immersive research experiences and assessment tools that capitalize on research findings on pedagogy and student learning (e.g., the testing effect). Pedagogical Author, Tracy L. Caldwell Working closely with Daniel Cervone, fellow teacher and researcher Tracy Caldwell of Dominican University developed the book's pedagogical program from the Preview Questions at the beginning of each section to the Self-Tests at the end of each chapter. The pedagogy is designed to engage students at multiple levels of Bloom's taxonomy and at multiple points in each chapter.

Psychophysical Judgment and Measurement Feb 19 2022 Handbook of Perception, Volume II: Psychophysical Judgment and Measurement brings together a very large, diverse, and widely scattered literature on human perception, with emphasis on psychophysical judgement and measurement. The book reviews the history of research on choice, judgement, and measurement in order to provide a background for contemporary work. This volume is organized into five sections encompassing 14 chapters and begins with a historical background on psychophysics and the evolution of thinking about the central measurement problem in judgement. The basic psychological context in which choice and judgement occur is considered next, touching on topics such as the problem of information selection and the sources of bias and variability in judgemental processes in relation to memory. The chapters that follow discuss the theoretical frame of measurement models and their applications. In particular, examples of algebraic fundamental measurement, algebraic derived measurement, and probabilistic derived measurement are given. The book also introduces the reader to various psychophysical scaling methods and theories of scaling. This book will serve as a basic source and reference work for psychologists and natural scientists, as well as for anyone in the arts or sciences or those who are interested in human perception.

Psychology Third Canadian Edition Aug 21 2019 Schacter, Gilbert, Wegner, and Nock's Psychology, Third Edition is widely acclaimed for captivating students with contemporary psychology research on the major topics of the introductory course, while helping them develop critical thinking skills that will stay with them beyond the course term. Expert coverage of the DSM-5, quirky examples of thinking gone awry, scenarios based on common psychological misconceptions, and contributions from new co-author Matthew Nock highlight the new edition. And now, this breakthrough text is available in a version created just for Canadian students and teachers. It offers the same fascinating writing, helpful study tools, and keen eye for intriguing stories as Psychology, Third Edition, but with a wide range of Canadian examples and impactful work by Canadian researchers incorporated throughout. Welcome Canadian author, Ingrid Johnsrude Ingrid's principal area of investigation is the neural basis of understanding speech, and she leads experiments examining how utterances are transformed into acoustic signals and then into meaning via a variety of cognitive processes. Her investigations span multiple levels—from understanding the brain structures involved in hearing and comprehension to observing the ways listeners deal with challenges such as background noise.

Psychology; Or, a View of the Human Soul Dec 17 2021 "The principal object of the author in writing this book, was to render this noble and delightful science accessible to all classes of readers. A second object of the author was to give the science of man a direct bearing upon other sciences, and especially upon religion and theology. Psychology and theology are connected by their common subject, which is man. The present work is, as far as the author knows, the first attempt to unite German and American mental philosophy. This design has not been executed by bringing together two separate systems or by forming an eclectic compound, which is neither the one nor the other, and the parts of which do not grow forth from one spirit, but are brought together from different sources and united by the writer--a real sphinx in the

sphere of science"--Preface. (PsycINFO Database Record (c) 2008 APA, all rights reserved).

Public Participation in Sustainability Science Apr 09 2021 This book discusses how citizens can participate more effectively in sustainability science and environmental policy debates. It discusses designs for participatory procedures, and experiences of their application to issues of global change. While the focus is on citizen participation, the involvement of specific stakeholders - including water managers and venture capitalists - is also addressed. The book describes how focus group methods were combined with the interactive use of computer models into new forms of participation, tested with six hundred citizens. The results are discussed in relation to other important topics, including greenhouse gas and water management. By combining this with an examination of issues of interactive governance and developing country participation, the book provides state-of-the-art, practical insights for students, researchers and policy makers alike.
