**Pontiac Auto Parts Interchange Manual 1935-1952** Jul 16 2021 The part interchange manual can be used to look up NOS part numbers. It includes approximately 3000 parts descriptions with factory part numbers by make model and year for Pontiac, Chevrolet, Buick, and Oldsmobile parts by year, make, and model that are interchangeable. For example, you can also determine if different years of Pontiac used the same part or as a parts manual for your car. Covers engine parts, body parts, electrical parts, suspension parts, clutches, transmission, rear ends, steering, and more. There are even some parts listed for the early 1930's. For convenience the parts are listed in sequence by group number. Model application or interchangeable parts for each car line is shown under the respective columns.

Anyone looking for or selling parts, attending swap meets or restoring an antique auto will be able to put this information to good use.

*Chevrolet Small Block Parts Interchange Manual - Revised Edition* Dec 21 2021 If you're building a salvage yard stroker motor, looking to make a numbers-matching engine, saving money on repurposing factory parts, or simply looking to see which parts work together, this book is a must-have addition to your library! This updated edition provides detailed interchange information on cranks, rods, pistons, cylinder heads, intake manifolds, exhaust manifolds, ignitions, carburetors, and more. Casting and serial number identification guides are included to help you through the myriad of available parts in salvage yards, at swap meets, and on the internet. Learn what parts can be combined to create various displacements, which parts match well with others, where factory parts are best, and where the aftermarket is the better alternative. Solid information on performance modifications is included where applicable. The first and second generation of small-block Chevy engines have been around for more than 60 years, and a byproduct of the design's extremely long production run is that there is a confusing array of configurations that this engine family has seen. Chevy expert Ed Staffel delivers this revised edition on everything you need to know about parts interchangeability for the small-block Chevy. Build your Chevy on a budget today!

**Chevrolet Parts Interchange Manual** May 26 2022 Swapping or interchanging parts is a time-honored practice, and this book is the source for Chevrolet parts interchanges.

**BSA Sunbeam & Triumph Tigress Scooter 1959-1965 Workshop Manual** Jul 04 2020 184 pages, and more than 120 illustrations and charts, size 8.25x10.75 inches. This manual is a compilation of three factory publications including the owner's instruction manual, the parts/spares manual and a set of service sheets. These publications cover all three variations of the 175cc two-stroke and the 250cc four-stroke and electric start models manufactured from 1959-1965. Neither BSA nor Triumph ever published a workshop manual for these models, however, the combination of these three publications provides the most comprehensive maintenance and repair information that was ever made available from the manufacturer. MANUALS & TECHNICAL PUBLICATIONS: Maintenance, repair and service information was issued under both the BSA and Triumph name. However, as the machines were identical in all aspects, any technical documentation can be applied to either manufacturer without hesitation. SERVICE SHEETS: Beginning in December 1959, both BSA and Triumph began publishing repair, overhaul and technical information in the form of individual (dealer only) 'Service Sheets'. It should be noted that it was never intended that these service sheets would be distributed to the general public. However, they were eventually combined into a single publication and released under both the BSA and Triumph names, the contents being identical in either case. INSTRUCTION MANUAL: Both BSA and Triumph published an identical 'Instruction Manual' the only difference being the name on the front cover. These publications were somewhat more detailed than typical 'owner's manuals' as they included overhaul information in addition to general maintenance and adjustments. As these instruction manuals were included with each new scooter purchased, there were a number of 'editions' published during the lifetime of the model, however, the contents remained basically unchanged. When combined with the 'Service Sheets' they are a reasonable substitute for a workshop manual. PARTS (or) SPARES MANUAL: The parts manuals are also identical and include exploded component diagrams that are extremely helpful in the rebuilding or restoration process. ADDITIONAL DATA: There is an addendum to the rear of this manual that contains a number of communications that were sent from the UK factory to their US distributors. These documents are somewhat rare and they may be of help in assisting in the maintenance of one of these machines. DESIGN & GENERAL SPECIFICATIONS: Designed by Edward Turner (Triumph) and sold under both BSA and Triumph brand names to take advantage of established distribution networks, this badge engineering was one of the last uses of the Sunbeam name. The differences between the BSA Sunbeam and Triumph Tigress were entirely cosmetic-the former in polychromatic green paint, also two-tone red and cream, with a BSA badge; the latter in a shell blue or mimosa and ivory (two-tone) with a Triumph badge. Introduced in late 1959, the scooter was available with a 250 cc four-stroke twin (10hp), or 175cc two-stroke single cylinder engine (7.5hp). Both engines were forced-air-cooled. The two-stroke was a development of the BSA Bantam engine but the four-stroke was a completely new parallel-twin with a gear drive to the gearbox. The contact-breaker

fed two separate ignition coils, each of which connected directly to its own spark plug without the need for a distributor. Drive to the rear wheel was by a fully enclosed chain in an oil bath. Both versions had four, foot-operated gears. Some of the 250 twins were fitted with an electric starter and a 12 volt (not 6 volt) electrical system, they were identified as either B2S (Sunbeam) or TW2S (Triumph). The 250 cc four-stroke model was discontinued in 1964 and the 175cc two-stroke model in 1965.
