Modern Albania Jun 25 2019 In the early 1990s, Albania, arguably Europe's most closed and repressive state, began a startling transition out of forty years of self-imposed Communist isolation. Albanians who were not allowed to practice religion, travel abroad, wear jeans, or read "decadent" Western literature began to devour the outside world. They opened cafés, companies, and newspapers. Previously banned rock music blared in the streets. Modern Albania offers a vivid history of the Albanian Communist regime's fall and the trials and tribulations that led the country to become the state it is today. The book provides an in-depth look at the Communists' last Politburo meetings and the first student revolts, the fall of the Stalinist regime, the outflows of refugees, the crash of the massive pyramid-loan schemes, the war in neighboring Kosovo, and Albania's relationship with the United States. Fred Abrahams weaves together personal experience from more than twenty years of work in Albania, interviews with key Albanians and foreigners who played a role in the country's politics since 1990—including former Politburo members, opposition leaders, intelligence agents, diplomats, and founders of the Kosovo Liberation Army—and a close examination of hundreds of previously secret government records from Albania and the United States. A rich, narratively-driven account, Modern Albania gives readers a front-row seat to the dramatic events of the last battle of Cold War Europe.

Mosby's Review Questions for the National Board Dental Hygiene Examination - E-Book Jan 13 2021 Offering the most realistic NBDHE review and practice available, Mosby's Review Questions for the National Board Dental Hygiene Examination includes both a print book and companion website to prepare you for exam success. In the book, you'll review with more than 1,250 Component A practice questions — with each answer including a rationale for both correct and incorrect answer options. Online, you can review the same questions plus an additional 420 case-based items related to Component B in 1) practice mode or 2) timed, exam-simulation mode with randomized tests that match the number and distribution of questions on the NBDHE. From a team of dental hygiene experts including lead editor Barbara Bennett, this Q&A resource is an excellent supplement to any NBDHE content review book! More than 1,680 multiple-choice questions provide comprehensive practice spanning the entire NBDHE, with 1,250+ items relating to Component A — more than six times the number of questions on the actual exam! — and 420 case-based questions related to Component B. Rationales accompany each question, fully explaining why each answer choice is either correct or incorrect and thus serving as secondary content review. Distribution of questions matches each category on the NBDHE test specifications, ensuring that you have adequate practice for each content area. An Evolve companion website includes all 1,250+ questions from the book plus additional case studies with color images and accompanying questions, available either in practice mode with instant feedback or in exam-simulation format with results and feedback provided at the end of the exam. A test creator and timer on Evolve generates NBDHE-style tests that mimic the number and distribution of questions on the NBDHE and also provides realistic practice with time management during the exam. 16 detailed case studies on Evolve, each of which includes a patient medical/dental history, completed periodontal chart, oral radiographs, clinical photographs, and 20-35 multiple-choice questions for patients in the five main categories covered on the NBDHE (adult periodontitis, pediatric, geriatric, special needs, and medically compromised). References to text sources make it easy to review or find more information on specific topics.

Testing in the Professions Sep 20 2021 Testing in the Professions focuses on current practices in credentialing testing as a guide for practitioners. With a broad focus on the key components, issues, and concerns surrounding the test development and validation process, this book brings together a wide range of research and theory—from design and analysis of tests to security, scoring, and reporting. Written by leading experts in the field of measurement and assessment, each chapter includes authentic examples as to how various practices are implemented or current issues observed in credentialing programs. The volume begins with an exploration of the various types of credentialing programs as well as key differences in the interpretation and evaluation of test scores. The next set of chapters discusses key test development steps, including test design, content development, analysis, and evaluation. The final set of chapters addresses specific topics that span the testing process, including communication with stakeholders, security, program evaluation, and legal principles. As a response to the growing number of professions and professional designations that are tied to testing requirements, Testing in the Professions is a comprehensive source for up-to-date measurement and credentialing practices.

Basic Science Review for Dental Board Exams and NDEB Canada Exams Oct 02 2022 Scholars Dental Education specializes in online courses that prepare dentists from all over the world for the Canadian dental board exams, helping them become licensed in Canada. Scholars Dental has been providing NDEB AFK prep courses for many years with successful results and excellent reviews. Their innovative online platform includes live seminars, experienced instructors, recorded lectures, online quizzes, online mock exams, and a new way of learning and understanding dentistry all together. This course has a unique Basic Science section which is a must for all dentists taking a dental board exam such as NDEB and INBDE exams. The Scholars Dental team believes that all dentists should have the opportunity to learn basic sciences in a way specifically designed for dental students. Basic sciences, if taught properly, builds the foundation that would simplify complicated subjects such as pharmacology and pathology, which are usually major obstacles in passing dental board exams. Dr. Ahmad Hafez successfully passed the NDEB AFK exam with a score of 91 on his first attempt and passed the ACJ & ACS NDEB exams of that same year on his first attempt. Dr. Hafez was also accepted to the IDAPP program at the University of Toronto. He went on passing the written board exams and OSCE exams and received his license in early 2014. He is a member of the Royal College of Dental Surgeons of Ontario, American Academy of Implant Dentistry and has received his Fellowship Certificate from the Oral Surgery Academy for General Dentists. Dr. Hafez started teaching AFK lectures in 2013 with amazing feedback from students. Dr. Hafez's main strength is his ability to break down complicated concepts and then teach it in a simple way. His understanding of the obstacles a foreign trained dentist must overcome to pass the AFK exam is a great benefit to all of his students. Dr. Hafez has been working as a licensed dentist in Canada since January 2014, with experience in private practice and community health centers. Dr. Hafez continues to be a student of dentistry, and has taken multiple continuing education courses in fields of sedation, oral surgery, occlusion, periodontics, cosmetic dentistry and implantology.

Dental Education Feb 23 2022 The dental curriculum is like a living organism-it has developed through time, manifesting regional, cultural, and scientific heritage, and reflecting modern trends. The undergraduate dental curriculum is periodically rebuilt to ensure the harmonization of higher education systems between countries, especially in Europe. Structure, content, learning, and assessment in undergraduate and postgraduate dental education and auxiliary dental personnel training are shaped based on professional consensus. Constant updates on recent technological innovations and evidence-based best practice are necessary. In modern times, ethical issues are raised more than ever. Can we teach our students how to be dedicated health professionals and manage a successful practice at the same time? Does the commercialization of our profession also affect the dental curriculum today? The COVID-19 pandemic has imposed new challenges, moving us from lecture rooms and clinics to an online environment. This Special Issue is dedicated to developing the understanding of dental education.
