Developing Mathematical Literacy in the Context of the Fourth Industrial Revolution Oct 15 2021 In the context of the Fourth Industrial Revolution, a world of continuous alterations is glimpsed where science and technology are at the base of economic competitiveness and where innovation plays a strategic role in global competition, so that they are forced to

cover a series of requirements to compete successfully in an increasingly globalized economy, including high investments in both education and research. Along these lines, the formation of mathematical learning is important because it is oriented towards the development of a set of skills with the aim of resolving situations of daily and professional lives. It focuses on the acquisition of employing the different ways of representing information in the form of models, constructions, and graphs to determine the best decision making. In this sense, it includes the mastery of the handling of numbers, measures, and structures to carry out the interpretation of operations and representations of a quantitative nature on personal and professional situations. For a society to favor innovation, the use of mathematical information is an essential condition that allows the development of creativity and analysis of information. Mathematics education plays a vital role in this development. Developing Mathematical Literacy in the Context of the Fourth Industrial Revolution studies the formation of mathematical abilities in the context of the Fourth Industrial Revolution regarding its development of both teaching and learning strategies, as well as the use of ICT and its use in the development of this discipline in students. It is important that teachers of any educational level reorient their teaching strategies and their role as educators. Therefore, the chapters discuss up-to-date and relevant information on teaching and didactic tasks in the subject of mathematics. This book highlights mathematical pedagogies, ICT in mathematics learning, teacher training, and classroom strategies for

mathematics. It is intended for teachers, pedagogical advisors, business trainers, higher education staff, administrators, teacher educators, practitioners, stakeholders, researchers, academicians, and students interested in mathematical literacy in the fourth industrial revolution.

**Agroecological Footprints Management for Sustainable Food System** Feb 25 2020

Agroecological footprints are a unique and popular concept for sustainable food system. Measuring and keeping a tab on the agroecological footprints of various human activities has gained remarkable interest in the past decade. From a range of human activities, food production and agriculture are most essential as well as extremely dependent on the agroecosystems. It is therefore crucial to understand the interaction of agroecosystem constituents with the extensive agricultural practices. The environmental impact measured in terms of agroecological footprints for a healthy for the sustainable food system. The editors critically examine the status of agroecological footprints and how it can be maintained within sustainable limits. Drawing upon research and examples from around the world, the book is offering an up-to-date account, and insight into how agroecology can be implemented as a solution in the form of eco-friendly practices that would boost up the production, curbs the environmental impacts, improves the bio-capacity, and reduces the agroecological footprints. It further discusses the changing status of the agroecological footprints and the growth of other footprint tools and types, such as land, water, carbon, nitrogen, etc. This book will be of interest to teachers, researchers, government planners,

climate change scientists, capacity builders, and policymakers. Also, the book serves as additional reading material for undergraduate and graduate students of agriculture, agroforestry, agroecology, soil science, and environmental sciences. *The Report: Ghana 2016* Sep 14 2021 The country has played a leading role in African affairs for decades, having been one of the first states to gain independence on the continent and serving as one of the key centres of pan-Africanism in the post-independence era. That role has continued in recent years, with Ghana playing a central part in regional organisations like ECOWAS and the African Union. Reliance on raw material exports, combined with an income-sensitive population and stubborn poverty levels in the northern regions of the country, have created complications, but Ghana has made significant progress in recent years and has begun to build the necessary foundations for long-term growth.

**Boko Haram** Dec 17 2021 An insurgency in Nigeria by the Islamist extremist group Boko Haram has left thousands dead, shaken Africa's biggest country and worried the world. Yet it remains a mysterious – almost unknowable – organisation. A rough exhaustive on-the-ground reporting, Mike Smith takes readers inside the conflict and provides the first in-depth account of the violence and unrest. He traces Boko Haram from its beginnings as a small Islamist sect in Nigeria's remote north-east, led by a baby-faced but charismatic preacher, to its transformation into a hydra-headed entity, deploying suicide bombers and abducting schoolgirls. Much of the book is told through the eyes of Nigerians who have

found themselves caught between frightening insurgents and security forces accused of horrifying brutality. It includes the voices of a forgotten police officer left paralysed by an attack, women whose husbands have been murdered and a sword-wielding vigilante using charms to fend off insurgent bullets. It journeys through the sleaze and corruption that has robbed Africa's biggest oil producer of its potential, making it such fertile ground for extremism. Along the way it questions whether there can be any end to the violence and the ways in which this might be achieved. Interspersed with history, this book delves into the roots of this unholy war being waged by a virtually unknown organisation, which is set to shape the destiny of Africa's biggest economy and most populous state – and perhaps affect the future of Africa.

**WAEC in Review** Jul 24 2022 WAEC in Review is a practical intervention strategy in transforming the weakening educational system of Liberia where academic excellence is unceasingly diminishing. LIPACE Pilot Study Guide is not only a landmark achievement in the educational history of Liberia but a remarkable strive towards the proper preparation of Liberian students for future diets of the WAEC exam. As a member of the National Committee of the West African Examinations Council and a Stakeholder in the Liberian Education System, I wish to recommend the use of this study guide to adequately prepare each and every Liberian student for future examinations thereby setting the stage for an easy transition to the emerging West African Senior Secondary Examinations (WASSCE). I am explicitly confident that you will definitely find your journey through this guide very rewarding as you prepare to sit the next WAEC Exam.—David S. Massaquoi, Sr., director of Education, The Salvation Army–Liberia Command Education Secretariat Our students sit the exam in constant fear of proctors and supervisors. They know nothing about the exam

and its structure and this fear lead to them failing massively. We need to build the confidence level of our students and help them to study hard and understand the roles of proctors and supervisors to stop the intimidation during the exam. Thanks to LIPACE and the “Turning the Tide” project, we have helped our students achieved an amazing achievement for the first time in the history of Gbarpolu County where all senior students successfully passed the exam.—Lartey Bemah, principal of Bopolu Public School (2012-2013), Gbarpolu County, Liberia

Bring Back Our Girls Jun 23 2022 A 2021 Daily Telegraph Book of the Year ? 'Had me gripped from the outset' Fergal Keane 'Everyone should read the testimonies of the Chibok girls who survived the capture' Malala In the spring of 2014, an American hip hop producer unwittingly triggered an online hurricane with a quickly thumbed tweet featuring a four-word demand: #BringBackOurGirls. The hashtag called for the release of 276 Nigerian schoolgirls who'd been kidnapped by a little-known Islamic terrorist sect called Boko Haram. Within hours, the campaign had been joined by millions, including some of the world's most recognizable people: Oprah Winfrey, Pope Francis, David Cameron, Kim Kardashian and Michelle Obama. Their tweets launched an army of would-be liberators –

American soldiers and drones, Swiss diplomats, spies and glory hunters – into an obscure conflict in a remote part of Nigeria that had barely begun to use the internet. But when hostage talks and military intervention failed, the schoolgirls were forced to take survival into their own hands. As the days in captivity dragged into years, they became witnesses, and often victims, of unspeakable brutality that they chronicled in secret diaries. Many of the girls were Christians who refused to take the one easier path offered to them – converting their captors' extremist creed. *Bring Back Our Girls* is an urgent and engrossing work of investigative journalism that unfolds across four continents, from the remote forests of northern Nigeria to the White House; from Khartoum safe houses to gilded hotel lobbies in the Swiss Alps. It plumbs the promise and peril of an era whose politics are fuelled by the power of hashtag advocacy – and at its centre stand some exceptionally courageous and resourceful young women.

**Identification Revolution** Nov 04 2020 Some 600 million children worldwide do not legally exist. Without verifiable identification, they—and unregistered adults—could face serious difficulties in proving their identity, whether to open a bank account, purchase a SIM card, or cast a vote. Lack of identification is a barrier to full economic and social inclusion. Recent advances in the reach and technological sophistication of identification systems have been nothing less than revolutionary. Since 2000, over 60 developing countries have established national ID programs. Digital technology, particularly biometrics such as fingerprints and iris scans, has dramatically expanded the capabilities of these programs. Individuals can now be uniquely identified and reliably authenticated against their claimed identities. By enabling governments to work more effectively and transparently, identification is becoming a tool for accelerating development progress. Not only is provision of legal identity for all a target under the Sustainable Development Goals, but this book shows how it is also central to achieving numerous other SDG targets. Yet, challenges remain. Identification systems can fail to include the poor, leaving them still unable to exercise their rights, access essential services, or fully participate in political and economic life. The possible erosion of privacy and the misuse of personal data, especially in countries that lack data privacy laws or the capacity to enforce them, is another challenge. Yet another is ensuring that investments in identification systems deliver a development payoff. There are all too many examples where large expenditures—sometimes supported

by donor governments or agencies—appear to have had little impact. *Identification Revolution: Can Digital ID be Harnessed for Development?* offers a balanced perspective on this new area, covering both the benefits and the risks of the identification revolution, as well as pinpointing opportunities to mitigate those risks.

*City Making and Global Labor Regimes* Oct 23 2019 This book investigates the success story of the fast fashion industry—mainly owned by Chinese migrants—in Prato, Italy. It outlines how Prato has become the center of a value chain stretching from suppliers in China and Turkey all the way to buyers in Europe. Despite this, a policy attacking Chinese entrepreneurship has been devised and implemented in Prato. This volume analyzes said policy against the crisis of Prato's textile industry. Based on the author's 15 years of fieldwork in Prato, the book sheds light on the entangled processes of city making and the restructuring processes linked to capital accumulation by tackling issues of governance, territory, migration, division of labor, labor mobility, housing, and human rights.

*The Last Good Man* Aug 21 2019 A man has lived on his own beside a wild, unforgiving coastline for many years. His companions are the birds, the land and the sea. From a choice

made long ago, he keeps himself separate from the world of people and he gains a fierce pleasure from his environment. His solitude is broken by his discovery, one early morning on the flat sands of low tide, of a child washed up on the beach, but still alive.
