Changing Dimensions of Banking in India Mar 17 2021 When the banking sector was coping with mergers and consolidation, the enlarged scope of activities of non-banks, fintech companies on high voltage digital banking spree, the scourge of the pandemic suddenly added several tectonic changes. The Covid-induced stress led to several rounds of stimulus packages, expansionary Union Budget 2021-22 and increased Capex allocations where the role of banks became more critical. Formation of Development Finance Institutions (DFI) and National Asset Reconstruction Company Ltd. (NARCL) – Bad Bank followed to provide the firepower to revive and sustain the economy. Encouraged by the unprecedented changes in banking sector, writing a book on ‘Changing Dimensions of Banking in India’ was considered apt to capture key changes with their implications. It highlights the nuances of potential changes in the organizational structure, corporate governance, digital innovations, credit growth, MSME sector, better managing asset quality and strengthening risk management architecture. The quick read can be a ready reference to the next generations leaders.

Floods in a Changing Climate Sep 10 2020 Flood inundation models enable us to make hazard predictions for floodplains, mitigating increasing flood fatalities and losses. This book provides an understanding of hydraulic modelling and floodplain dynamics, with a key focus on state-of-the-art remote sensing data, and methods to estimate and communicate uncertainty. Academic researchers in the fields of hydrology, climate change, environmental science and natural hazards, and professionals and policy-makers working in flood risk mitigation, hydraulic engineering and remote sensing will find this an invaluable resource. This volume is the third in a collection of four books on flood disaster management theory and practice within the context of anthropogenic climate change. The others are: Floods in a Changing Climate: Extreme Precipitation by Ramesh Teegavarapu, Floods in a Changing Climate: Hydrological Modeling by P. P. Mujumdar and D. Nagesh Kumar and Floods in a Changing Climate: Risk Management by Slodoban Simonovi?.

Agricultural Dimensions of Global Climate Change Aug 10 2020 This important book, written by recognized leaders in their fields, discusses agricultural dimensions of global climate change. Research and policy issues are covered and a multidisciplinary view of global climate change and agriculture is presented. Major sections cover the contribution of agriculture to greenhouse gas (GHG) emissions (including an investigation as to whether monitoring and verification of such emissions would work) and the impact of global climate change on agriculture. The book examines such important issues as global food availability, distributional effects between developing and developed countries, agricultural adaptation possibilities, and whether CO2 enrichment will benefit agriculture. A unique feature of this publication is that it addresses communication difficulties between researchers and policy makers and suggests solutions.

The Apocalyptic Dimensions of Climate Change Feb 13 2021 Climate change and the apocalypse are frequently associated in the popular imagination of the twenty-first century. This collection of essays brings together climatologists, theologians, historians, literary scholars, and philosophers to address and critically assess this association. The contributing authors are concerned, among other things, with the relation between cultural and scientific discourses on climate change; the role of apocalyptic images and narratives in representing environmental issues; and the tension between reality and fiction in apocalyptic representations of catastrophes. By focusing on how figures in fictional texts interact with their environment and deal with the consequences of climate change, this volume foregrounds the broader social and cultural function of apocalyptic narratives of climate change. By evoking a sense of collective human destiny in the face of the ultimate catastrophe, apocalyptic narratives have both cautionary and inspirational functions. Determining the extent to which such narratives square with scientific knowledge of climate change is one of the main aims of this book.

Arctic Tourism in Times of Change:: Dimensions of Urban Tourism Nov 24 2021 Available online: <https://pub.norden.org/temanord2020-529/> Tourism has grown in many Arctic peripheries of northern Europe and North America, particularly among international markets interested in unique Arctic nature and culture-based assets. In this context, urban places have remained relatively neglected. The report brings together case studies from several northern peripheries to illustrate the diversity of urban Arctic tourism and to identify implications for sustainable tourism development across the North. The case studies indicate that the Arctic dimensions of urban tourism are not always self-evident and tourism has not developed in relation to the northern culture of these places. However, in a global competition for capital and people, urban places seem to be increasingly using the Arctic as a way to boost local economies and reimagine their places in order to achieve individual, local, regional, and national development goals.
