**Aston Martin DB** Nov 03 2022 Read the full story of Great Britain's best-loved sports car manufacturer with Aston Martin DB, an exquisitely produced, photo-loaded, history by Aston Martin expert, Andrew Noakes. The name David Brown is synonymous with the glory days of Aston Martin, when a tiny British sports car company was rescued from near-extinction and turned into a marque that could compete with Ferrari--and win. Stylish design, lavish illustration from the Aston Martin Heritage Trust and meticulously researched text come together in this large-format, 224-page book to create a superb celebration of the 70th anniversary of DB Aston Martins in 2017. There's a wealth of detail on the Aston Martin DB road and race cars, both from the David Brown era of 1947-1972 and the modern DB era from 1993 onwards, together high quality images and specification tables for all the key models. Aston Martin DB 70 Years is a fitting celebration of one of the world's most enduring sports cars. The fast, beautiful sports cars that Aston Martin built under Brown's ownership won the Le Mans 24-hour race and the World Sports Car Championship, and provided James Bond with his most famous

transport: the ejector-seat equipped DB5 that won acclaim in Goldfinger. Though the DB era ended when Brown sold the company in 1972, its influence continued to be felt. James Bond's most recent car, the specially-made DB10, and Aston Martin has just launched its most complete car ever, the DB11. 'DB' means as much to Aston Martin now as ever.

**The Jowett Jupiter - The car that leaped to fame**

Feb 11 2021 From the Jupiter's inception and development, to its sporting successes, and

its current status as a sought-after classic, 'Jowett Jupiter - the Car that Leaped to Fame' is a unique book by Edmund Nankivell, the world authority on the Jupiter, and is a complete study of the model. With its advanced chassis designed by Dr Eberan-Eberhorst, the noted Austrian engineer who was also responsible for designing the Auto Union Type D Grand Prix car, the Jowett Jupiter was an instant hit. Its responsive handling and lively engine made the Jupiter a great sporting success from the off, with a record-breaking win at the Le Mans 24 Hours in 1950, and a class 1-2 win at the 1951 Monte Carlo International Rally. This book covers the Jupiter's success across the board, revealing the full chronology of the model, its racing derivatives, and the special-bodied Jupiters from the likes of Stabilimenti Farina and Abbott of Farnham. With chapters detailing Jupiters in current use, historic racing, and concours events, this new edition includes more images and updated information, and provides a comprehensive record of this fantastic, historic car. eBook ISBN: 978-1-787118-02-7 (9781787118027) Print ISBN: 9781845849122 (9781845849122)

A Race with Infamy Mar 27 2022 On June 11, 1955, Lance Macklin became a central player in motor racing's worst tragedy. Not only did that day at Le Mans scar him forever, but it went on to become his most lasting legacy. Who, many over the years have asked, was that 'gentleman driver' in the Healey? One thing's for sure: he was no amateur. That day overshadowed the remarkable career of one of British racing's leading lights, of a driver who befriended and mentored champions, who was stunningly quick on the track and charming off it. Featuring a wealth of archival material and new interviews, this book finally tells the fascinating story of one of motorsport's most underrated and misunderstood talents.

**Aston Martin** Nov 10 2020 From bestselling author, racer and stunt driver Ben Collins - the man who was The Stig - comes a story of spies, speed and hard-driving genius: a driver's love letter to one of the world's best-loved machines. Aston Martin's first, wickedly fast models were forged at a time when Ferrari's premises at Maranello was nothing but a ploughed field. This book celebrates a century of innovators who kept the fire burning brightly for over a century, from the visionary pioneers Martin and Bamford to modern-day design guru Adrian Newey; from a glamorous web of pre- and post-war spies and racing drivers, to David Brown and the achingly beautiful DB models beloved of Bonds past and present. Ben Collins explores the car with the double-o prefix from a unique perspective behind the wheel, carving through country lanes in his father's V8 Vantage, driving Aston Martins in four James Bond movies and competing against them in the legendary Le Mans 24-hour

race. Ultimately, this is a very British success story: of a triumph of engineering that has burned brightly from the Roaring 20s to the 2020s, and an iconic car that never says die.

*Cutting Edge Conversations* Jul 19 2021 EJ 'Ted' Cutting was not only Aston Martin's most successful Chief Race Car Design Engineer, but was also an innovator with influential force on the worldwide automotive industry. Originating from a limited edition hardback version, this eBook was produced in celebration of the 60th anniversary of Aston Martin winning the World Sports Car Championship for Britain with the all-conquering DBR1 designed, engineered and created by Ted himself. Rather than a traditional biography of his life, Ted wanted his book to be rather less scripted and informal; it was therefore initially adapted from a number of recorded conversations between himself and Aston Martin Heritage Trust members Stuart Bailey and Brian Joscelyne - the title being an obvious choice considering this! In addition to the in-depth telling of a legendary period in British motorsport by a man at the centre of it all, the book also sees Ted clarify a number of details which have in the past been incorrectly reported. Unusually it also contains all his published documents and access to a 90 minute video of his unique lecture on 'Racing Astons' to further endorse his story. Although the original hardback edition of this book was produced only in a limited run, Ted's wish was to make the complete book available to a much wider audience, now possible through the internet; as an engineer always working at the cutting edge of technology, he would appreciate the benefits of information sharing in the digital age. As well as being of interest to fans of Aston Martin and of motorsports in general, the book is a compelling read for any student of automotive design and engineering; after all, progress is about standing on the shoulders of giants - and in the field of race car design, few individuals

Warwickshire. Now seen as an iconic luxury British sports car manufacturer, Aston Martin has been designing, manufacturing and racing cars for over 100 years, almost continuously. Known for combining quality, style and performance in its products, the company has often struggled to balance these attributes with financial success. Fortunately, over the years generous investors who recognize the potential in the company have always been on hand to rescue and perpetuate the brand. Looking at the engines, the cars, the people, the business and car owners, this book tells the story of a quintessentially British marque.
