**Unincorporated Business Entities** Dec 19 2021 The rapid proliferation of unincorporated business forms has moved beyond the scope of traditional Corporations and Agency/Partnership courses and textbooks, which leaves students without the necessary knowledge to competently advise business clients.

Unincorporated Business Entities was designed to fill that widening gap in the existing curriculum.

Unincorporated Business Entities is designed for a three-semester-hour course and has the following features:

- Like its predecessors, the new edition of Unincorporated Business Entities takes a business planning approach to teaching the modern law of partnerships and other unincorporated firms.
- The material on LLCs has largely been rewritten, reflecting the rapid development in this form over the last several years.
- Each chapter contains new and updated notes and problems that provide a "hands-on" approach to the consequences of, and planning and drafting for, issues in agency, partnership, limited partnerships, LLCs, and limited liability partnerships.
- The materials on partners' financial rights now include a short primer on financial accounting. The Teacher's Manual is almost six-fold expanded from previous versions. It contains approaches to organizing classes, synopses of all the cases, lecture outlines, proposed questions and answers, discussions of answers to all the problems, diagrams of the complex cases, and flow charts of complex statutory analysis in areas like partnership dissolution and winding up. The Appendix also contains the partnership, limited partnership, and limited liability company statutes you will need for reference purposes.

*The Business of America is Lobbying* Jun 20 2019 Corporate lobbyists are everywhere in Washington. Of the 100 organizations that spend the most on lobbying, 95 represent business. The largest companies now have upwards of 100 lobbyists representing them. How did American businesses become so invested in politics? And what does all their money buy? Drawing on extensive data and original interviews with corporate lobbyists, *The Business of America is Lobbying* provides a fascinating and detailed picture of what corporations do in Washington, why they do it, and why it matters. Prior to the 1970s, very few corporations had Washington offices. But a wave of new government regulations and declining economic conditions mobilized business leaders. Companies developed new political capacities, and managers soon began to see public policy as an opportunity, not just a threat. Ever since, corporate lobbying has become increasingly more pervasive, more proactive, and more particularistic. Lee Drutman argues that lobbyists drove this development, helping managers to see why politics mattered, and how proactive and aggressive engagement could help companies' bottom lines. All this lobbying doesn't guarantee influence. Politics is a messy and unpredictable bazaar, and it is more competitive than ever. But the growth of lobbying has driven several important changes that make business more powerful. The status quo is harder to dislodge; policy is more complex; and, as Congress increasingly becomes a farm league for K Street, more and more

of Washington's policy expertise now resides in the private sector. These and other changes increasingly raise the costs of effective lobbying to a level only businesses can typically afford. Lively and engaging, rigorous and nuanced, *The Business of America is Lobbying* will change how we think about lobbying-and how we might reform it.

**The Economics and Financing of Media Companies** Dec 27 2019 In this updated and expanded edition of the acclaimed *Economics and Financing of Media Companies*, leading economist and media specialist Robert G. Picard employs business concepts and analyses to explore the operations and activities of media firms and the forces and issues affecting them. Picard has added new examples and new data, and he covers such emerging areas as the economics of digital media. Using contemporary examples from American and global media companies, the book contains a wealth of information, including useful charts and tables, important for both those who work in and study media industries. It goes beyond simplistic explanations to show how various internal and external forces direct and constrain decisions in media firms and the implications of the forces on the type of media and content offered today.

*The Law of Business Structures* Nov 06 2020 The law of business structures provides a comprehensive but simplified treatment of the different types of business structures in South African law. The book examines the law of partnerships, business trusts, close corporations and companies, whether large or small, and whether formed for a profit-making or a non-profit-making objective. The chapters on company law provide a detailed discussion and explanation of core company law topics. Discussions of modern corporate governance best practices, insider trading and market manipulation are also included. Excessive theoretical analysis has been avoided, but important legal concepts and principles are nevertheless carefully explained and analysed. Case law and references to legislation have been kept to a minimum, but discussions of the important cases and relevant legislation are included.--Résumé de l'éditeur.

In short, this is the essential desk reference for the accountant.

**The Anatomy of Corporate Law** Jun 13 2021 This is the long-awaited second edition of this highly regarded comparative overview of corporate law. This edition has been comprehensively updated to reflect profound changes in corporate law. It now includes consideration of additional matters such as the highly topical issue of enforcement in corporate law, and explores the continued convergence of corporate law across jurisdictions. The authors start from the premise that corporate (or company) law across jurisdictions addresses the same three basic agency problems: (1) the opportunism of managers vis-à-vis shareholders; (2) the opportunism of controlling shareholders vis-à-vis minority shareholders; and (3) the opportunism of shareholders as a class vis-à-vis other corporate constituencies, such as corporate creditors and employees. Every jurisdiction must address these problems in a variety of contexts, framed by the corporation's internal dynamics and its interactions with the product, labor, capital, and takeover markets. The authors' central claim, however, is that corporate (or company) forms are fundamentally similar and that, to a surprising degree, jurisdictions pick from among the same handful of legal strategies to address the three basic agency issues. This book explains in detail how (and why) the principal European jurisdictions, Japan, and the United States sometimes select identical legal strategies to address a given corporate law problem, and sometimes make divergent choices. After an introductory discussion of agency issues and legal strategies, the book addresses the basic governance structure of the corporation, including the powers of the board of directors and the shareholders meeting. It proceeds to creditor protection measures, related-party transactions, and fundamental corporate actions such as mergers and charter amendments. Finally, it concludes with an examination of friendly acquisitions, hostile takeovers, and the regulation of the capital markets.

**The Corporate Citizen** Apr 30 2020 The interest in good governance has grown tremendously in the past decade. Corporate scandals, environmental awareness and globalisation have all played their part in raising shareholder and public awareness in how companies should be governed. King provides a history and clear definition of corporate governance. This is followed by essential reading on the duties of directors and the chairman; the five 'corporate sins'; a framework of corporate governance; the relationship between the company and its directors; risk and governance; asking the 'dumb questions'; a code of conduct; and self-evaluation. This book is essential reading for directors and managers, shareholders and stakeholders, and business students. In addition, the principles set forth are equally applicable to non-business entities such as school governing bodies, sports and cultural organisations, non-governmental organisations and government departments.
