Theme-based Chinese Vocabulary for CIE IGCSE 0523 (3841 words) \_\_\_\_\_  
????????????????? Mar 21 2022 Theme-based learning is a way of teaching and learning, whereby many areas of the curriculum are connected together and integrated within a theme. For Chinese International exams, like IGCSE, IB, are evolving into Theme-based curriculum. Students develop the ability to communicate in the target language through the study of language, themes and texts. In this edition, we added more vocabulary and give the HSK classification, both Version 2009 and the latest Version 2021. Within each topic, the vocabulary are arranged by HSK V2021 levels. This will give teachers a guidance for difficulty level and allow students to set priority on the vocabulary they should know to read, write or both. Based on HSK (version 2009 and the latest version 2021), we edited a series of Chinese Vocabulary for those who are studying Chinese or preparing international examinations, such as IB, SAT, AP, IGCSE, GCSE Chinese. Combining our 26 years' experience in Teaching and editing our own materials, here is the "LIFE SAVING" book called by many students for their exams. The book give a quick revision for your coming exam! Thanks for your support for us creating better contents for you! It takes our years' painful effort to edit. Grab it!

English for geographers Sep 22 2019 English for Geographers is a textbook intended to be used not only by students of the university degree of Geography, but also by anybody interested in the field of geography. It is divided into seven different units, each of them dealing with a specific topic (introduction to geography, human geography, environmental geography, tourist geography, Internet for geographers, cartography and climatology). Each of the units offers the learners a variety of activities to improve their skills, mostly reading and writing in English, as well as the capacity to increase their vocabulary related to this field. Following the European philosophy that promotes the use of new technologies throughout the teaching/learning process, students are proposed a series of activities such as an online glossary (which allows students to build up their own classroom dictionary), and a class forum (to exchange their knowledge, opinions, and so on). Eventually, at the end of each unit, learners are asked to fill out a conscious learning grid chart in order to make them aware of their learning process, as encouraged by EHEA (European Higher Education Area). After fulfilling this course, students are expected to reach level B1 according to Common European framework of reference for languages.

Forward with Classics Dec 06 2020 Despite their removal from England's National Curriculum in 1988, and claims of elitism, Latin and Greek are increasingly re-entering the 'mainstream' educational arena. Since 2012, there have been more students in state-maintained schools in England studying classical subjects than in independent schools, and the number of schools offering Classics continues to rise in the state-maintained sector. The teaching and learning of Latin and Greek is not, however, confined to the classroom: community-based learning for adults and children is facilitated in newly established regional Classics hubs in evenings and at weekends, in universities as part of outreach, and even in parks and in prisons. This book investigates the motivations of teachers and learners behind the rise of Classics in the classroom and in communities, and explores ways in which knowledge of classical languages is considered valuable for diverse learners in the 21st century. The role of classical languages within the English educational policy landscape is examined, as new possibilities exist for introducing Latin and Greek into school curricula. The state of Classics education internationally is also investigated, with case studies presenting the status quo in policy and practice from Australasia, North America, the rest of Europe and worldwide. The priorities for the future of Classics education in these diverse locations are compared and contrasted by the editors, who conjecture what strategies are conducive to success.
