Lesotho Highlands Water Project Apr 13 2021 This paper considers the multi-faceted lessons of the Lesotho Highlands Water Project and how the project can serve as a model of mutually beneficial development, though demonstrating the benefits of a bilateral governmental cooperative approach in the development of an international river. These benefits include exceeding the impact of individual national approaches and strengthening political cooperation among all participants. This model is particularly relevant since approximately 40 percent of the world's population lives in transboundary river basins and more than 90 percent of the world's population lives within countries that share these basins.

A History of Chess Nov 20 2021 An epic work that took more than a decade to complete, *A History of Chess*, originally published in 1913, is a historic undertaking that shattered preconceptions about the game upon publication. Over a century later, Murray's research and conclusions, in which he argues that chess originated in India, are still widely accepted by most chess historians. Undertaking such a pioneering task, the scope of which has never been attempted before or since, Murray taught himself to read Arabic in order to decipher historical manuscripts on the game and its beginnings. His study unravels the history of the game as it evolved from its Asiatic beginnings, through the role chess played in Europe during the Middle Ages, and up until the nineteenth century with the arrival of modern chess as we know it. *A History of Chess* includes transcribed diagrams of important games, as well as some of the more famous historical chess figurines, such as the Lewis chessmen. No single work on the game of chess has become close to touching Murray's in breadth or significance.

The Cambridge Handbook of Immunities and International Law Aug 06 2020 Few topics of international law speak to the imagination as much as international immunities. Questions pertaining to immunity from jurisdiction or execution under international law surface on a frequent basis before national courts, including at the highest levels of the judicial branch and before international courts or tribunals. Nevertheless, international immunity law is and remains a challenging field for practitioners and scholars alike. Challenges stem in part from the uncertainty pertaining

to the customary content of some immunity regimes said to be in a 'state of flux', the divergent – and at times directly conflicting - approaches to immunity in different national and international jurisdictions, or the increasing intolerance towards impunity that has accompanied the advance of international criminal law and human rights law. Composed of thirty-four expertly written contributions, the present volume uniquely provides a comprehensive tour d'horizon of international immunity law, traversing a wealth of national and international practice.

Resolving Foreign Bribery Cases with Non-Trial Resolutions Settlements and Non-Trial Agreements by Parties to the Anti-Bribery Convention Sep 18 2021

Non-trial resolutions, often referred to as settlements, have been the predominant means of enforcing foreign bribery and other related offences since the entry into force of the OECD Anti-Bribery Convention 20 years ago. The last decade has seen a steady

increase in the use of coordinated multi-jurisdictional non-trial resolutions, which have, to date, permitted the highest global amount of combined financial penalties in foreign bribery cases. This study is the first cross-country examination of the different types of resolutions that can be used to resolve foreign bribery cases.

Pharmaceutical Patents in Europe Jun 27 2022 The pharmaceutical industry and patent legislation are inextricably linked. Pharmaceutical companies could not exist without some guarantee that they can recoup the cost of developing a new product. European patent law offers this opportunity, as it allows companies to exclude competition for a specific product for a fixed time scale. In *Pharmaceutical Patents in Europe* the current legal patent situation is examined by a detailed analysis of case law from the European Patent Office (EPO), the international body created with the signing of the European Patent Convention (EPC). Aspects of European patent law not primarily regulated in the EPC, for example Supplementary Protection Certificates and infringement matters, are examined in the setting provided by EC law and domestic laws of European states. This book is written for the reader who understands the main characteristics of patent law and is looking for a practitioner's text on the European

pharmaceutical patent law scene. Moreover, the author's remarks can help all readers to look at the field with fresh eyes.
