Anemone Enemy Nov 29 2019 The deep sea is an environment completely unfriendly to mankind; it represents one of the least explored areas on Earth. Pressures in the mesopelagic zone become too great for traditional exploration methods, demanding alternative approaches for deep sea research. What is beneath the depths of the sea? Featuring award-winning authors including Deborah Sheldon, Liz Butcher, Gerry Huntman, and more!

[Spectrum of Decadence \(Routledge Revivals\)](#) Jul 26 2019 The 1890s, the Naughty Nineties, was an exciting and flamboyant time in British life and literature. First published in 1993, this title traces the genesis of the literary culture of the 1890s through some of the popular novels and literary texts of the period. By examining works by such writers as Oscar Wilde, Bram Stoker, W. B. Yeats, and Walter Pater, Murray Pittock analyses the nature of the 'Decadent era' and the artistic theories of Symbolism and Aestheticism. Significantly, he provides a full assessment of the lasting impact that the thought of the period has had on our own understanding of our cultural past. *Spectrum of Decadence* explores the confrontations between art and science, sex and mortality, desire and virtue, which, the author argues are as much a part of modern society's fin-de-siècle as they were of the nineteenth century's. This reissue bridges the gap between literary texts, historical context, and contemporary critical theory.

Cold Spectrum Jun 24 2019 Criminologist Harmony Black is a witch with a loaded Glock. Her partner, Jessie Temple, is packing fierce lupine heat. Together, they're part of Vigilant Lock, an elite FBI black ops group dedicated to defeating criminals with supernatural connections. But when they uncover a demonic conspiracy in the highest ranks of the government, it appears that everything Harmony and her friends have worked for, fought for, and risked their lives for might be a lie. Framed for a casino massacre, Harmony and Jessie are on the run--in the real world and in their own. From the seedy casinos of Atlantic City to the steamy bayous of Louisiana and the imposing facades of Washington, DC, there's not a soul on earth they can trust. The only way they can clear their names is to take down the conspiracy from within and uncover the truth behind a secret that both the government and the powers of hell want to keep buried.

[Knightingale](#) Mar 26 2022 Evil has plagued this world since the dawn of creation seeking to gain control. One family was given supernatural abilities with the sole purpose of protecting the things in this world that evil must never take possession of. Samantha Nelson knew she was cursed. She didn't know that her unnatural ability of forcing the truth out of people was just the beginning of her curse until her family is murdered in a horrific home explosion. Six months later she finds herself face to face with a Knight Protector and her life is turned into utter chaos. When David received his assignment on his twentieth birthday he was told that his destiny would be entwined with a woman soon to be born and that his aging would be halted. Since the moment Samantha was born, David protected her from her enemies. As every Knight before him, he does so in the shadows. But David must face the facts that something even deadlier than her enemies is occurring. No matter how much he denies it, he is falling in love with her. When her enemies begin to discover ways around his protection and murder her family he is forced to make a decision of what is more important to him; his family or his assignment. All it takes is one warning sign of danger to convince him that he simply cannot live without Samantha and he takes a leap that will change their lives forever. Their only chance of survival is to discover what Samantha's destiny is and the journey leads them straight to the heart of the Knight family where they discover evil has infiltrated and it is up to them to stop the evil before it destroys the family and gains control of the very thing that God created the family to protect.

Literary Spectrum Oct 28 2019 Compilation of essays chiefly on Western literature; includes part of Indic literature.

The Master Key Aug 07 2020 Reproduction of the original: The Master Key by L. Frank Baum

Sometimes Demons Whisper Sep 19 2021 Kayden and Bryan find a way to deal with the demons that the consultants at WCPC can't handle. WCPC handles all your paranormal needs. Poltergeists, ghosts, or mystical apparitions, we can help. We employ the most talented wranglers who can control even the toughest demons around. Call the consultants of Watercrest Cannon Paranormal Consultants to help. Broody wrangler and tactile psychic take on the mystery at Brown-Blythe Manor - Sometimes Demons Whisper.

[Encyclopedia of Demons in World Religions and Cultures](#) Mar 14 2021 This exhaustive volume catalogs

nearly three thousand demons in the mythologies and lore of virtually every ancient society and most religions. From Aamon, the demon of life and reproduction with the head of a serpent and the body of a wolf in Christian demonology, to Zu, the half-man, half-bird personification of the southern wind and thunder clouds in Sumero-Akkadian mythology, entries offer descriptions of each demon's origins, appearance and cultural significance. Also included are descriptions of the demonic and diabolical members making up the hierarchy of Hell and the numerous species of demons that, according to various folklores, mythologies, and religions, populate the earth and plague mankind. Very thoroughly indexed.

The Spectrum in Between Feb 22 2022 This is everything strange and wonderful that you are not supposed to write about in a first novel. Metaphysical weirdness.

The Demon Collector Oct 01 2022 Edgy Taylor sees demons. They walk among us, masquerading as humans, but he can see through their disguises. So when Edgy discovers the Royal Society for Daemonologie, he hopes that at last he will find some clue to the origins of his mysterious ability. Within the Society's ancient walls are the answers to many secrets. And when Edgy joins their expedition to the Arctic Circle, he sails through icy seas towards the darkest secret of all . . .

Laser Spectroscopy VII Dec 31 2019 The Seventh International Conference on Laser Spectroscopy or SEICOLS '85 was held at the Maui Surf Hotel, Hawaii, USA, June 24 to 28, 1985. Like its predecessors at Vail, Megeve, Jackson Lake, Rottach-Egern, Jasper Park, and Interlaken, SEICOLS '85 aimed at providing an informal setting for active scientists to meet and discuss recent developments and applications in laser spectroscopy. The Conference site on the sunny sands of famed Kaanapali Beach on the Island of Maui, although perhaps not the traditional mountain resort, offered nonetheless an atmosphere most inspiring to creative discussions during the unscheduled afternoons. The Conference was truly international: 223 scientists represented 19 countries, including Australia, Canada, People's Republic of China, Denmark, Finland, France Germany (FRG), Great Britain, Israel, Italy, Japan, South Korea, Netherlands, New Zealand, Poland, Spain, Sweden, Switzerland, and U.S.A. The intense scientific program included 14 topical sessions with 59 invited talks. Approximately 60 additional invited papers and 16 postdeadline papers were presented during three lively evening poster sessions. The present Proceedings contain oral as well as poster and postdeadline papers. We thank all authors for the timely preparation of their manuscripts, now available to a wider audience. We would also like to thank the members of the International Steering Committee for their valuable suggestions and advice. Our special thanks go to the members of the Program Committee for their painstaking efforts.

The Spectrum of Political Engagement Apr 02 2020 Why do artists, poets, philosophers, writers, and others who are usually classified as intellectuals leave the ivory tower to "dirty their hands" in the political arena? In an effort to illuminate the intellectual's struggle to come to grips with the issues raised by political involvement, David Schalk examines the life and thought of five intellectuals engagés in France during the period between 1920 and 1945. From communist to fascist, these figures—Paul Nizan, Jean-Paul Sartre, Emmanuel Mounier, Julien Benda, and Robert Brasillach—cover the full political spectrum, and Professor Schalk studies their diverse reactions to the social, political, and economic tensions of the interwar period. Broadly defining "engagement" as political involvement that is voluntary, conscious, and freely chosen, usually by intellectuals, the author poses the intellectual's dilemma in the following terms: "When we are engagé," he writes, "we fear that we are debasing our highest values; when we are not, we worry that we have become, in Paul Nizan's trenchant phrase, mere chiens de garde [watchdogs]." He then investigates the origins and the popularization of the concept of engagement in the early 1930s, the arguments used to denounce it and to defend it, its different manifestations, and finally its effects on the socio-political actuality of the world. Originally published in 1979. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Spectr Nov 02 2022 Includes: *Hunter of Demons* *Master of Ghouls* *Reaper of Souls* What happens when an exorcist falls in love with the demon he's supposed to destroy? Unregistered paranormal Caleb Jansen only wants a normal life. But when a demon murders his brother, Caleb must avenge Ben's death, no matter what the cost. Unfortunately, his only allies belong to an extremist group who would kill Caleb if they found out about his talent. Gray is a wandering spirit, summoned to hunt and destroy demons by drinking their blood. This hunt goes horribly wrong, and for the first time in his existence Gray is trapped in a living, human body. Caleb's body...and Caleb is still in it. Hotshot federal agent John Starkweather thinks he's seen it all. But when he's called to exorcise Caleb, he finds a creature which isn't supposed to exist outside of stories. For Gray is a drakul: a vampire. When John fails to exorcise Gray, the countdown is on. If he can't find a means of removing the drakul before 40 days pass, Caleb will be possessed forever. In the meantime, the three must find a way to work together. As they hunt down demons and save the innocent, the heat between the two men explodes into passion...and John discovers a different kind of temptation, one that calls into question everything he believes.

The Fall Jun 16 2021 First of a thrilling fantasy adventure series set on the Dark World, where society is ranked according to its colour clan and the most precious commodity is light. In all the world there is only one place that ever sees the sun. A seven-towered castle built upon a mountain high above the desolate ice lands below.

Crazy Files Feb 10 2021 Aimee is an average twenty two year old woman...or so she thought. Her experiences with the paranormal throw her into an entirely new world she never knew existed. Now she must

act quickly to prevent her sinister father from destroying the earth, all while struggling with her sanity.

Distributed Computing Jan 12 2021 This book constitutes the proceedings of the 30th International Symposium on Distributed Computing, DISC 2016, held in Paris, France, in September 2016. The 32 full papers, 10 brief announcements and 3 invited lectures presented in this volume were carefully reviewed and selected from 145 submissions. The focus of the conference is on following topics: theory, design, implementation, modeling, analysis, or application of distributed systems and networks.

The Epistemological Spectrum Nov 21 2021 David Henderson and Terence Horgan set out a broad new approach to epistemology, which they see as a mixed discipline, having both a priori and empirical elements. They defend the roles of a priori reflection and conceptual analysis in philosophy, but their revisionary account of these philosophical methods allows them a subtle but essential empirical dimension. They espouse a dual-perspective position which they call iceberg epistemology, respecting the important differences between epistemic processes that are consciously accessible and those that are not. Reflecting on epistemic justification, they introduce the notion of transglobal reliability as the mark of the cognitive processes that are suitable for humans. Which cognitive processes these are depends on contingent facts about human cognitive capacities, and these cannot be known a priori.

Handbook of Laser-Induced Breakdown Spectroscopy Aug 19 2021 Starting from fundamentals and moving through a thorough discussion of equipment, methods, and techniques, the Handbook of Laser-Induced Breakdown Spectroscopy provides a unique reference source that will be of value for many years to come for this important new analysis method. The authors, with a total of over 60 years of experience in the LIBS method, use a combination of tutorial discussions ranging from basic principles up to more advanced descriptions along with extensive figures and photographs to clearly explain topics addressed in the text. In this second edition, chapters on the use of statistical analysis and advances in detection of weapons of mass destruction have been added. Tables of data related to analysis with LIBS have been updated. The Handbook of Laser-Induced Breakdown Spectroscopy, Second Edition: provides a thorough but understandable discussion of the basic principles of the method based on atomic emission spectroscopy, including recently available data leading to better characterization of the LIBS plasma; presents a discussion of the many advantages of the method along with limitations, to provide the reader a balanced overview of capabilities of the method; describes LIBS instrumentation ranging from basic set-ups to more advanced configurations; presents a comprehensive discussion of the different types of components (laser, spectrometers, detectors) that can be used for LIBS apparatuses along with suggestions for their use, as well as an up-to-date treatment of the newest advances and capabilities of LIBS instruments; presents the analytical capabilities of the method in terms of detection limits, accuracy, and precision of measurements for a variety of different sample types; discusses methods of sampling different media such as gases, liquids, and solids; presents an overview of some real-world applications of the method, with new emphasis on sampling of biologically and physically dangerous materials; provides an up-to-date list of references to LIBS literature along with the latest detection limits and a unique list of element detection limits using a uniform analysis method; provides annotated examples of LIBS spectra which can serve as references for the general reader and will be especially useful for those starting out in the field.

Laser Spectroscopy V Jun 04 2020 The Fifth International Conference on Laser Spectroscopy or VICOLS, was held at Jasper Park Lodge, in Jasper, Canada, June 29 to July 3, 1981. Following the tradition of the previous conferences in Vail, Megeve, Jackson Lake, and Rottach-Egern, it was hoped that VICOLS would provide an opportunity for active scientists to meet in an informal atmosphere for discussions of recent developments and applications in laser spectroscopy. The excellent conference facilities and remote location of Jasper Park Lodge in the heart of the Canadian Rockies, amply fulfilled these expectations. The conference was truly international, with 230 scientists from 19 countries participating. The busy program of invited talks lasted four days, with two evening sessions, one a panel discussion on Rydberg state spectroscopy, the other a lively poster session of approximately 60 post-deadline papers. We wish to thank all of the participants for their outstanding contributions and for preparation of their papers, now available to a wider audience. Our thanks go to the members of the International Steering Committee for their suggestions and recommendations. We are especially pleased to have held this conference under the auspices of the International Union of Pure and Applied Physics. VICOLS would not have been possible without the financial support of the Natural Sciences and Engineering Research Council of Canada, and the Office of Naval Research and Air Force Office of Scientific Research of the United States* of America.

Certain Personal Matters May 16 2021 The world mends. In my younger days people believed in mahogany; some of my readers will remember it—a heavy, shining substance, having a singularly close resemblance to raw liver, exceedingly heavy to move, and esteemed on one or other count the noblest

The Mystery Queen Nov 09 2020 DigiCat Publishing presents to you this special edition of "The Mystery Queen" by Fergus Hume. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.

Psyche, Soul, and Spirit Sep 27 2019 A spirit runs through the interdisciplinary essays of this book—a spirit that lives within them and hovers above them, at once intelligent and profoundly simple. Although each essay focuses on a certain topic, whether it is the Buddhist saint Milarepa, the prophet Jeremiah, or the Christian saint Teresa of Avila, whether it is the Israeli/Palestinian conflict or subtleties of the spirit, these essays have penetrable borders that dissolve at the seams, and touch each other

religiously, philosophically, and psychologically. The use of an interdisciplinary methodology that draws from the wisdom of different disciplines in regard to values, such as courage in the face of attacks and integrity in the midst of a worldly environment, culminates in a rich source of inspired guidance for everyday life.

Blood of Requiem (Epic Fantasy, Dragons, Free Fantasy Novel) Jan 30 2020 Free epic fantasy novel! Song of Dragons -- a fantasy trilogy of blood, steel, and dragonfire. For fans of epic fantasy like A Game of Thrones and The Lord of the Rings. BOOK ONE: BLOOD OF REQUIEM Long ago stood the kingdom of Requiem, a land of men who could grow wings and scales, breathe fire, and take flight as dragons. Requiem ruled the sky. But Dies Irae, a tyrant leading an army of griffins, hunted Requiem's people, burned their forests, and shattered their temples. Requiem fell. This ancient land now lies in ruin, its halls crumbled, its cries silenced, its skeletons littering the burned earth. In the wilderness, a scattering of survivors lives in hiding. The griffins still hunt them, and every day promises death. Will Requiem's last children perish in exile... or once more become dragons and fly to war? Blood of Requiem -- a free epic fantasy novel for fans of dragons, A Game of Thrones, and swords and sorcery.

THE REQUIEM SERIES:
Requiem: Dawn of Dragons Book 1: Requiem's Song Book 2: Requiem's Hope Book 3: Requiem's Prayer
Requiem: Song of Dragons Book 1: Blood of Requiem Book 2: Tears of Requiem Book 3: Light of Requiem
Requiem: Dragonlore Book 1: A Dawn of Dragonfire Book 2: A Day of Dragon Blood Book 3: A Night of Dragon Wings
Requiem: The Dragon War Book 1: A Legacy of Light Book 2: A Birthright of Blood Book 3: A Memory of Fire
Requiem: Requiem for Dragons Book 1: Dragons Lost Book 2: Dragons Reborn Book 3: Dragons Rising
Requiem: Flame of Requiem Book 1: Forged in Dragonfire Book 2: Crown of Dragonfire Book 3: Pillars of Dragonfire
Requiem: Dragonfire Rain Book 1: Blood of Dragons Book 2: Rage of Dragons Book 3: Flight of Dragons

The Political Spectrum Jul 06 2020 From the former chief economist of the FCC, a remarkable history of the U.S. government's regulation of the airwaves Popular legend has it that before the Federal Radio Commission was established in 1927, the radio spectrum was in chaos, with broadcasting stations blasting powerful signals to drown out rivals. In this fascinating and entertaining history, Thomas Winslow Hazlett, a distinguished scholar in law and economics, debunks the idea that the U.S. government stepped in to impose necessary order. Instead, regulators blocked competition at the behest of incumbent interests and, for nearly a century, have suppressed innovation while quashing out-of-the-mainstream viewpoints. Hazlett details how spectrum officials produced a "vast wasteland" that they publicly criticized but privately protected. The story twists and turns, as farsighted visionaries--and the march of science--rise to challenge the old regime. Over decades, reforms to liberate the radio spectrum have generated explosive progress, ushering in the "smartphone revolution," ubiquitous social media, and the amazing wireless world now emerging. Still, the author argues, the battle is not even half won.

The Encyclopedia of Demons and Demonology May 28 2022 Explores this dark aspect of folklore and religion and the role that demons play in the modern world. Includes numerous entries documenting beliefs about demons and demonology from ancient history to the present.

Progress in Atomic Spectroscopy Jan 24 2022 H. J. BEYER AND H. KLEINPOPPEN During the preparation of Parts A and B of Progress in Atomic Spectroscopy a few years ago, it soon became obvious that a comprehensive review and description of this field of modern atomic physics could not be achieved within the limitations of a two-volume book. While it was possible to include a large variety of spectroscopic methods, inevitably some fields had to be cut short or left out altogether. Other fields have developed so rapidly that they demand full cover in an additional volume. One of the major problems, already encountered during the preparation of the first volumes, was to keep track of new developments and approaches which result in spectroscopic data. We have to look far beyond the area of traditional atomic spectroscopy since methods of atomic and ion collision physics, nuclear physics, and even particle physics all make important contributions to our knowledge of the static and dynamical state of atoms and ions, and thereby greatly add to the continuing fascination of a field of research which has given us so much fundamental knowledge since the middle of the last century. In this volume, we have tried to strike a balance between contributions belonging to the more established fields of atomic structure and spectroscopy and those fields where atomic spectroscopy overlaps with other areas.

Her Perfect Life Sep 07 2020 It's been six years since U.S. Air Force pilot Katie Slater was shot down over Iraq and taken prisoner. Now, Katie is back home--only it's not home anymore and her perfect life has become a total mystery. Includes bonus features. Original.

Science Spectrum Mar 02 2020 Science Spectrum highlights the scientific achievements of Hispanics, Asians, Native Americans, Blacks and other U.S. minorities and has as its goal to increase the number of students among underrepresented groups who pursue careers in science.

Threshold Jun 28 2022 Book 2 in the Whyborne & Griffin series Previous book: Widdershins Introverted scholar Percival Endicott Whyborne wants nothing more than to live quietly with his lover, ex-Pinkerton detective Griffin Flaherty. Unfortunately, Whyborne's railroad tycoon father has other ideas, namely hiring Griffin to investigate mysterious events at a coal mine. Whyborne, Griffin, and their friend Christine travel to Threshold Mountain, a place of dark legend even before the mine burrowed into its heart. A contingent of Pinkertons--including Griffin's ex-lover Elliot--already guard the mine. But Griffin knows better than anyone just how unprepared the detectives are to face the otherworldly forces threatening them. Soon, Whyborne and Griffin are on the trail of mysterious disappearances, deadly accidents, and whispered secrets. Is Elliot an ally, or does he only want to rekindle his relationship with Griffin? And if so, how can Whyborne possibly hope to compete with the stunningly handsome Pinkerton--especially when Griffin is hiding secrets about his past? For in a town where friends become enemies and horror lurks behind a human mask, Whyborne can't afford to trust anything--including his own heart. Novel: 67,669 words. The Whyborne & Griffin series: Widdershins (Book 1) Threshold (Book 2) Other books by

Jordan L. Hawk: Hainted Heart of the Dragon The SPECTR series: Hunter of Demons (Book 1) Master of Ghouls (Book 2)

Hotlanta Aug 26 2019 The hum of the machines wasn't what Martice wanted to hear right now but it was a sign that he was getting something done around here. He had walked into the Print & Document Service Department of Max Office Superstore to find mounds of work waiting for him, you'd think by now he was used to it, but like all the other things you'd think he would be use to by now he wasn't. Six months ago he had meet the guy he was sure was the one, while it was a rocky start in the end or at least up till now things where still good. Yea Dre still had his bad habits, but Martice know he was faithful even with all the flirting... Read this compelling short story to find out where things lead with Martice in "Hotlanta."

Spectr Aug 31 2022 From best-selling author Jordan L. Hawk, the second half of the SPECTR series is now in a box set! SPECTR: Volume 2 contains: Eater of Lives Destroyer of Worlds Summoner of Storms All for less than the separate retail price! What happens when an exorcist falls in love with the demon he's supposed to destroy? After becoming possessed by the vampire spirit Gray, telekinetic Caleb Jansen thought he'd hit bottom. But between the hunt for a cannibalistic killer and the increasingly sinister actions on the part of SPECTR, the situation is rapidly going from bad to worse. Caleb's boyfriend, SPECTR agent John Starkweather, has suspicions of his own. With the help of his friend Sean and a shadowy organization known only by their symbol of a moth, John intends to save Caleb and Gray at any cost. When divided loyalties threaten his last chance at exorcism, Caleb discovers love may come at a price higher than he'd ever imagined. Novel: 111,622 words

BearCity Jul 18 2021 Based on the award-winning feature-length movie, Bear City: The Novel follows the funny, romantic, and often dramatic adventures of a tight-knit pack of bears, cubs, and friends in New York City as they gear up for a big party weekend. A hirsute Sex and the City set in the "Bear" scene, this story brings together these men, their friends, tricks, and lovers, and a cast of colorful, hirsute characters. They experience comical mishaps, lusty and romantic encounters, and an impressive variety of male body types. Using satire and humor, the novel exposes their explores these men's self-image issues and pokes fun at aspects of urban gay lifestyles, all while celebrating the worldwide community of men who call themselves Bears.

Nature May 04 2020

Across the Spectrum Jul 30 2022 This accessible yet comprehensive primer explores the breadth of viewpoints on major issues in evangelical theology by examining positions taken by evangelicals on seventeen seminal issues. The second edition retains the helpful features of the first edition and adds an appendix that addresses thirteen peripheral issues in contemporary evangelicalism. Praise for the first edition "The authors do what no book on the market does: In one volume they faithfully present divergent views on the crucial issues that divide evangelicals, and they do so in an unbiased, succinct, and lively manner. This book is perfect as a supplemental text in an introductory theology course or as a manual for church study groups. It will help everyone arrive at his or her own conclusions within the parameters of the evangelical tradition."--Dennis Okholm, Azusa Pacific University "Across the Spectrum succeeds with distinction in at least two respects. First, it represents a very useful tool for those who wish to begin grappling with different approaches to difficult theological problems. The book will be most helpful to beginning students in evangelical theology, the target audience. Second, the work presents various perspectives in fair and unbiased tones. . . . If used with care, it will repeatedly reward the reader with its fair and even treatment of different theological views."--Nathan D. Holsteen, Bibliotheca Sacra "I've been waiting for this book for some time. Due to its brief, nontechnical format, it can be used in a variety of ways in undergraduate theology courses. Although a concise volume, it succinctly outlines multiple arguments, both pro and con, for (incredibly!) over two dozen issues in disputed, largely non-fundamental areas of doctrine. The professor can present positions in favor of particular views or leave the issues open. It's settled--I'm requiring it!"--Gary R. Habermas, Liberty University "A collective sigh of relief will arise from the evangelical student body when it discovers this book! It helpfully and critically surveys the many legitimate evangelical theological options and convincingly demonstrates that there is no single authentically evangelical viewpoint on a wide range of controversial issues. It constitutes a small library between two covers."--Roger E. Olson, George W. Truett Theological Seminary, Baylor University

X-Ray Spectroscopy with Synchrotron Radiation Oct 09 2020 Synchrotron radiation has been a revolutionary and invaluable research tool for a wide range of scientists, including chemists, biologists, physicists, materials scientists, geophysicists. It has also found multidisciplinary applications with problems ranging from archeology through cultural heritage to paleontology. The subject of this book is x-ray spectroscopy using synchrotron radiation, and the target audience is both current and potential users of synchrotron facilities. The first half of the book introduces readers to the fundamentals of storage ring operations, the qualities of the synchrotron radiation produced, the x-ray optics required to transport this radiation, and the detectors used for measurements. The second half of the book describes the important spectroscopic techniques that use synchrotron x-rays, including chapters on x-ray absorption, x-ray fluorescence, resonant and non-resonant inelastic x-ray scattering, nuclear spectroscopies, and x-ray photoemission. A final chapter surveys the exciting developments of free electron laser sources, which promise a second revolution in x-ray science. Thanks to the detailed descriptions in the book, prospective users will be able to quickly begin working with these techniques. Experienced users will find useful summaries, key equations, and exhaustive references to key papers in the field, as well as outlines of the historical developments in the field. Along with plentiful illustrations, this work includes access to supplemental Mathematica notebooks, which can be used for some of the more complex

calculations and as a teaching aid. This book should appeal to graduate students, postdoctoral researchers, and senior scientists alike.

Holding Back The Tears Oct 21 2021 This is true story about real people is set in Edinburgh City and Dundee, where a petite Scottish Lassie called Rosie Gilmour, mother to Finlay Sinclair, receives news of the death of her son - who tragically has taken his own life by hanging. Rosie pretends her son is still alive by talking to him, for that takes away the unbearable pain of her loss. But once she begins to face up to the fact that Finlay is not coming back, her conversations become more of a challenge than she can handle. When memories of her past are triggered by everyday life events, they take her mind back and forth in time - back to her own childhood days in 1960, when she flirted with the fairground boys, and to the day she gave birth to Finlay - 'ME LADDIE'. Rosie's Scottish accent becomes more apparent whenever her emotions are heightened and she begins to recite poetry. She goes on to reveal doubts about her own self-worth and how she re-unites her role as mother - a role she had denied herself for seven years prior to Finlay's death. Rosie learns how to forgive herself and how to accept her loss with using practical coping strategies that sometimes but not always work for her. Many voices of different natures and walks of life appear in Rosie's, story with each one offering a part of their own belief to try and console her in her misery - except that she turns her back on any advice or support offered. Rosie is convinced that she can cope with her loss on her own and "e;needs no help from anyone, thank you"e; - until a sweet, gentle, soft-spoken voice begins to travel with her throughout her ordeal, leaving her no other choice but to listen. Eventually moving to the countryside in Angus, Rosie finds the isolation gives her life a new meaning offering her the opportunity to re-value her belief's about her own self values and decides the time has come to give her son a memorial service and invite a chosen few dance companions whom she met on a regular basis in Edinburgh to honour this day. Rosie begins to accept she will never be the same person she once had been and shall never be again, believing now her journey through grief taught her many lessons making her a stronger and better person than she imagined she could ever be.

Heaven's Demons Dec 23 2021 In the strange and magical world of the Middle Realms, there are many diverse races of people that inhabit the lands. Humans, elves, dwarves, and many more civil creatures thrive on this planet. However, the different races are often viewed on a spectrum, and at the very ends of it, there are seraphs and demons. One exalted, and one feared. It is often taught that a person can only be either good or bad, and that anything in between isn't really relevant or real. Every race in the middle of this spectrum always strives to be like the angels, who are said to be pure-hearted and loving. Unfortunately, what people 'know' about these beings almost always simply comes from what they have been taught, or what has been read, rather than based off of experience. It wasn't easy for Dacitrynn, who grew up in a very uncomfortable spot his whole life. Being a crossbreed of an angel and a demon wasn't something that was welcomed in the world, especially since it is forbidden. After a lonely childhood of growing up strange and out casted with the seraphs, it is finally time for Daci's life to change when he is banished from the High lands after a public fight with his step-brother turned nasty. However, even though Dacitrynn no longer lives with the angels, the world below proves itself to be just as, if not even more cruel than his birthplace, and hopelessness soon leaves him feeling defeated. Even if things eventually start to seem better, there is always something stressful that makes its way into the half-demon's life, and at the end of the day, he can only really wonder just one thing: Was there really a place for such a "horrible" creature like him in the world?

Exiled Apr 14 2021 Chase Williams is a demon hunter in the Circle, or at least he was supposed to be. On his fifteenth birthday, Chase stepped up to the altar to claim his elemental power, but it never came. Elemental magic is passed down to a hunter through the bloodline, but on Chase's birthday, the bloodline stopped. Exiled without the Circle's protection, Chase has spent two years trying to survive a world riddled with half-demons and magic. When he has a run in with a frightened and seemingly innocent demon, he learns the Circle's agenda has changed: the Circle plans to unlock a portal and unleash pure-blood demons into the world. Vowing to stop them, and knowing he can't do it alone, Chase forms a reluctant alliance with Rayna - a sexy witch with an attitude and a secret. In their attempt to stop them, Chase and Rayna find themselves in the middle of the Circle's plan, leaving one of them to decide what their friendship is worth, and the other's life depending on it.

The Demon in the Teahouse Dec 11 2020 When a series of fires in Japan's capital points to foul-play, the famous samurai Judge Ooka puts 14-year-old Seikei on the case to discover who's behind them. Determined to prove his worth, Seikei poses as a teahouse attendant to gather information, and winds up entering the mysterious worlds of geishas and revenge.

Angels & Demons Apr 26 2022 Readers are urged to forget what they think they know about who is pure and who is pure evil. These three brimstone-hot stories will turn all their preconceived notions inside out--and leave fans breathless. Includes "Break, Deals with Demons," and "My Avenging Angel."
