Nanoelectronics, Circuits and Communication Systems Feb 12 2021 This book features selected papers presented at the Fourth International Conference on Nanoelectronics, Circuits and Communication Systems (NCCS 2018). Covering topics such as MEMS and nanoelectronics, wireless communications, optical communications, instrumentation, signal processing, the Internet of Things, image processing, bioengineering, green energy, hybrid vehicles, environmental science, weather forecasting, cloud computing, renewable energy, RFID, CMOS sensors, actuators, transducers, telemetry systems, embedded systems, and sensor network applications in mines, it offers a valuable resource for young scholars, researchers, and academics alike.

A Study of the Air Force Maintenance Technical Data System Oct 11 2020 This report details the research on preparation, production, distribution, evaluation and verification of Air Force maintenance technical data. It highlights the impact of management on the procurement of accurate, timely, and economical data and identifies the areas in which management was found to be deficient. It points out the specific shortcomings in the data, in its preparation, distribution, and use. Finally, the report recommends actions considered necessary to first, improve management of the overall technical order system, and second to enhance the quality, usefulness, and timeliness of the data produced.

Databases, Information Systems, and Peer-to-Peer Computing Mar 16 2021 This book constitutes the thoroughly refereed postproceedings of the Second International Workshop on Databases, Information Systems, and Peer-to-Peer Computing, DBISP2P 2004, held in Toronto, Canada in August 2004 in conjunction with VLDB 2004. The 14 revised full papers presented together with an invited keynote paper were carefully selected during two rounds of reviewing and improvement. The papers are organized in topical sections on query routing and processing, similarity search in P2P networks, adaptive P2P networks, and information sharing and optimization.

Information Extraction: A Multidisciplinary Approach to an Emerging Information Technology Oct 23 2021 Information extraction (IE) is a new technology enabling relevant content to be extracted from textual information available electronically. IE essentially builds on natural language processing and computational linguistics, but it is also closely related to the well established area of information retrieval and involves learning. In concert with other promising and emerging information engineering technologies like data mining, intelligent data analysis, and text summarization, IE will play a crucial role for scientists and professionals as well as other end-users who have to deal with vast amounts of information, for example from the Internet. As the first book solely devoted to IE, it is of relevance to anybody interested in new and emerging trends in information processing technology.

System Forensics, Investigation and Response Oct 03 2022 This completely revised and rewritten second edition begins by examining the fundamentals of system forensics, such as what forensics is, the role of computer forensics specialists, computer forensic evidence, and application of forensic analysis skills. It also gives an overview of computer crimes, forensic methods, and laboratories. It then addresses the tools, techniques, and methods used to perform computer forensics and investigation. Finally, it explores emerging technologies as well as future directions of this interesting and cutting-edge field. New and key features include: examination of the fundamentals of system forensics; discussion of computer crimes and forensic methods; incorporation of real-world examples and engaging cases. --

Breaking Bad with 3D Enterprise Systems: Mobilizing Data with Keys, Models, and Governance Jan 26 2022 Learn about a new paradigm in enterprise system development that is designed from the ground up to allow systems to easily exchange data. In the early days of railways, each country decided the width of its railway track. This meant shipping freight across countries required unloading and reloading at each border. Unfortunately, this inefficiency from the lack of standards and principles is exactly where the IT industry is today. IT teams create systems using their own preferences, leading to difficulties moving data between systems, just like the railway system unloading and reloading freight at every border. The railway system eventually standardized and so can we. In fact, IT is seemingly the only profession that has no principles. Accountants, engineers, and physicians all operate by well-defined principles that have excelled these professions. We examine how we traditionally create systems and formulate a new approach to enterprise system development that addresses data integration issues and opens up possibilities for aggregating data between systems for Artificial Intelligence (AI) and analytics. The answer is NOT Software as a Service (SaaS), Electronic Data Interchange (EDI), Master Data Management (MDM), or microservices. Instead, five key principles drive this new paradigm to help our profession create enterprise systems that mobilize data securely and effortlessly within an integrated environment. Technology doesn't drive change—new models of organization, innovative people, and new business ideas drive change. Read this book if you are interested in building a future-oriented business and fostering innovative change to your business information systems.

CCSP CSVPN Exam Cram 2 (Exam Cram 642-511) Jun 26 2019 Your resource to passing the Cisco CCSP CSVPN Certification Exam! Join the ranks of readers who have trusted Exam Cram 2 to their certification preparation needs! TheCCSP CSVPN Exam Cram 2 (Exam 642-511)is focused on what you need to know to pass the CCSP CSI exam. The Exam Cram 2 Method of Study provides you with a concise method to learn the exam topics. The book includes tips, exam notes, acronyms and memory joggers in order to help you pass the exam. Included in the CCSP CSVPN Exam Cram 2: A tear-out "Cram Sheet" for last minute test preparation. Covers the current exam objectives for the 642-511. The PrepLogic Practice Tests, test engine to simulate the testing environment and test your knowledge. Trust in the series that has helped many others achieve certification success -Exam Cram 2.

Database Systems for Advanced Applications '97 Sep 29 2019 This volume contains the proceedings of the Fifth International Conference on Database Systems for Advanced Applications (DASFAA '97). DASFAA '97 focused on advanced database technologies and their applications. The 55 papers in this volume cover a wide range of areas in the field of database systems and applications ? including the rapidly emerging areas of the Internet, multimedia, and document database systems ? and should be of great interest to all database system researchers and developers, and practitioners.

Technical Rescue - High Angle and Swift Water Rescue Nov 23 2021 Exam Prep: Technical Rescue-High Angle is designed to thoroughly prepare you for a Technical Rescue certification, promotion, or training examination by including the same type of multiple-choice questions you are likely to encounter on the actual exam. To help improve examination scores, this preparation guide follows Performance Training Systems, Inc.'s Systematic Approach to Examination Preparation. Exam Prep: Technical Rescue-High Angle is written by fire personnel explicitly for fire personnel, and all content has been verified with the latest reference materials and by a technical review committee. Your exam performance will improve after using this system!

Complex Engineering Service Systems Feb 24 2022 For manufacturers of complex engineering equipment, the focus on service and achieving outcomes for customers is the key to growth. Yet, the capability to provide service for complex engineered products is less understood. Taking a trans-disciplinary approach, Complex Engineering Service Systems covers various aspects of service in complex engineering systems, with perspectives from engineering, management, design, operations research, strategy, marketing and operations management that are relevant to different disciplines, organisation functions, and geographic locations. The focus is on the many facets of complex engineering service systems around a core integrative framework of three value transformations – that of material/equipment, information and people. Complex Engineering Service Systems is the outcome of the EPSRC/BAE Systems S4T (Service Support Solutions: Strategy and Transition) research programme of 10 universities and 27 researchers, which examined how high-value manufacturers of complex engineering products adapt to a multi-partnered environment to design and deliver value in a service system. Complex Engineering Service Systems aims to be the main source of knowledge for academics and professionals in the research and practice of contracting, managing, designing, leading, and delivering complex engineering service systems. The book takes a value-based approach to integrating equipment and human factors into a total service provision. In doing so, it aims to advance the field of service systems and engineering.

Instrumentation, Control and Automation of Water and Wastewater Treatment and Transport Systems 1993 Feb 01 2020 Instrumentation, Control and Automation of Water and Wastewater Treatment and Transport Systems 1993 comprises a selection of manuscripts on the development of control strategies and their applications and on the status and future directions of Instrumentation, Control, and Automation (ICA) in the water and wastewater industry. The book starts by providing an overview of the status, the constraints and the future prospects for ICA in water and wastewater treatment and transport based on the survey responses of experts from 16 different countries. The text continues by presenting the need for dynamic modeling and simulation software to assist operations staff in developing effective instrumentation control strategies and to provide a training environment for the evaluation of such strategies. The book also covers the critical variables in system success; the use of an enterprise-wide computing that emphasizes the importance of strategic planning, performance measures, and human factors associated with the suggested implementation of applied technology; and the use of part-time unmanned operation at a large wastewater treatment plant. A functional approach based on the utility's water and wastewater functional requirements; the collection system monitoring and control; water distribution and control systems; dynamic modeling and simulation; and process control strategy and development are also considered. This book will be beneficial to biochemists, wastewater technologists, and public health authorities.

Communication System Security Apr 28 2022 Helping current and future system designers take a more productive approach in the field, Communication System Security shows how to apply security principles to state-of-the-art communication systems. The authors use previous design failures and security flaws to explain common pitfalls in security design.Divided into four parts, the book begins w

Circulatory System Aug 09 2020 Did you know that the average adult has about 60,000 miles (95,500 kilometers) of blood vessels? Blood flows through the body in two circuits, or pathways, that begin and end at the heart. Discover more fascinating facts in Circulatory System, a title in the Body Systems series. Each title in Body Systems guides readers through the fascinating inner workings of the human body. The human body contains several complex systems that work closely together to support life and allow the body to function properly. Each book explores the characteristics and interactions of these systems, their makeup, and their importance. This is an AV2 media enhanced book. A unique book code printed on page 2 unlocks multimedia content that brings the book to life. This book comes alive with audio, video, weblinks, slideshows, activities,quizzes, and much more.

Fundamentals of Predictive Text Mining Oct 30 2019 This successful textbook on predictive text mining offers a unified perspective on a rapidly evolving field, integrating topics spanning the varied disciplines of data science, machine learning, databases, and computational linguistics. Serving also as a practical guide, this unique book provides helpful advice illustrated by examples and case studies. This highly anticipated second edition has been thoroughly revised and expanded with new material on deep learning, graph models, mining social media, errors and pitfalls in big data evaluation, Twitter sentiment analysis, and dependency parsing discussion. The fully updated content also features in-depth discussions on issues of document classification, information retrieval, clustering and organizing documents, information extraction, web-based data-sourcing, and prediction and evaluation. Features: includes chapter summaries and exercises; explores the application of each method; provides several case studies; contains links to free text-mining software.

180 Days: Hands-On STEAM: Grade 6 ebook Aug 21 2021 Incorporate hands-on lab activities that integrate STEAM concepts with 180 days of daily practice! This invaluable resource provides weekly STEAM activities that improve students' criitcal-thinking skills, and are easy to incorporate into any learning environment. Students will explore STEAM concepts through the inquiry process with hands-on lab activities. Each week introduces a STEAM problem, need, or phenomena that they will address through a guided step-by-step challenge. Aligned to Next Generation Science Standards (NGSS) and state standards, this resource includes digital materials. Provide students with the skills they need to think develop problem-solving skills with this essential resource!

Windows Operating System Fundamentals Nov 04 2022 A clear and concise resource, the ideal guide to Windows for IT beginners Windows Operating System Fundamentals covers everything you

need to know about Windows 10. Learn to master the installation process and discover the cool new features of Windows 10, including Edge, Cortana, and more. And because this book follows the Windows Server Operating System Fundamentals MTA Certification, it is perfect for IT professionals who are new to the industry and need an entry point into IT certification. This book covers the basics of the Windows operating system, from setting up user accounts to using the start menu, running applications, and setting up internet access. You'll be prepared to upgrade a computer to Windows 10 and to master the basic tools necessary to work effectively within the OS. Each chapter closes with a quiz so you can test your knowledge before moving to the next section. Learn to configure your Windows 10 operating system, optimize account controls, configure user profiles, customize system options, and more! Understand how to use Windows applications and tools for managing LAN settings, configuring Microsoft Edge, and setting up remote assistance Use Windows to manage devices like printers, cloud storage, OneDrive, and system devices Maintain, update, protect, and backup your data by configuring Windows Update, automated backup, and system recovery and restore With Windows Operating System Fundamentals, IT Professionals looking to understand more about Windows 10 will gain the knowledge to effectively use applications, navigate files and folders, and upgrade client systems. Thanks to the troubleshooting tools and tips in this book, you can apply your new skills in real-world situations and feel confident while taking the certification exam.

Knowledge-Based and Intelligent Information and Engineering Systems, Part IV Apr 16 2021 The four-volume set LNAI 6881-LNAI 6884 constitutes the refereed proceedings of the 15th International Conference on Knowledge-Based Intelligent Information and Engineering Systems, KES 2011, held in Kaiserslautern, Germany, in September 2011. Part 4: The total of 244 high-quality papers presented were carefully reviewed and selected from numerous submissions. The 46 papers of Part 4 are organized in topical sections on human activity support in knowledge society, knowledge-based interface systems, model-based computing for innovative engineering, document analysis and knowledge science, immunity-based systems, natural language visualisation advances in theory and application of hybrid intelligent systems.

Stochastic Hybrid Systems Nov 11 2020 Because they incorporate both time- and event-driven dynamics, stochastic hybrid systems (SHS) have become ubiquitous in a variety of fields, from mathematical finance to biological processes to communication networks to engineering. Comprehensively integrating numerous cutting-edge studies, Stochastic Hybrid Systems presents a captivating treatment of some of the most ambitious types of dynamic systems. Cohesively edited by leading experts in the field, the book introduces the theoretical basics, computational methods, and applications of SHS. It first discusses the underlying principles behind SHS and the main design limitations of SHS. Building on these fundamentals, the authoritative contributors present methods for computer calculations that apply SHS analysis and synthesis techniques in practice. The book concludes with examples of systems encountered in a wide range of application areas, including molecular biology, communication networks, and air traffic management. It also explains how to resolve practical problems associated with these systems. Stochastic Hybrid Systems achieves an ideal balance between a theoretical treatment of SHS and practical considerations. The book skillfully explores the interaction of physical processes with computerized equipment in an uncertain environment, enabling a better understanding of sophisticated as well as everyday devices and processes.

Medical Terminology: A Programmed Systems Approach Dec 01 2019 This best-selling medical terminology resource is now even better with a newly robust suite of supplement options for instructors, innovative built-in learning tools for students, and extensive updates reflecting the most accurate, current industry terms today. MEDICAL TERMINOLOGY: A PROGRAMMED SYSTEMS APPROACH, 10E uses a unique word-building programmed approach that teaches students to break down key medical terms into their roots, prefixes, and suffixes. This programmed-learning format requires active participation through reading, writing, answering questions, labeling, repetition, and providing immediate feedback. By using didactic color, engaging review activities, back-of-the-book flash cards, and an accompanying CD-ROM with interactive learning activities, this book provides a complete package for building a comprehensive entry-level knowledge of medical language for students with little or no previous experience. Now in its 10th edition, this book is a proven resource that is easy and fun to use. Teaching medical terminology has never been easier. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

World Electoral Processes: Parliamentary System of Government Gr. 5-8 Aug 01 2022 **This is the chapter slice "Parliamentary System of Government Gr. 5-8" from the full lesson plan "World Electoral Processes"** Become a voting expert with a clear understanding of the election process. Our resource breaks down the differences between a presidential, parliamentary and dictatorship government. Travel back to ancient times to experience the first voting system. Explore the concept of a democratic government and whether it truly represents the people. Discover how the president has to share powers with the legislature in a presidential system. Explain why it is easier to pass laws in the parliamentary system than in the presidential system. Roleplay as a member of Parliament and deliver a 90-second statement about an important issue. Find out why most dictators were military leaders, and how the role of dictator has changed over time. Learn about suffrage and what the requirements are for a citizen to be allowed to vote. Hold your own election to decide on a policy for running your classroom. Aligned to your State Standards and written to Bloom's Taxonomy, additional writing tasks, crossword, word search, comprehension quiz and answer key are also included.

Radiation Oncology Dec 13 2020 'Radiation Oncology: MCQs for Exams' (ROME) will cover the essential aspects of radiation physics, radiobiology, and clinical radiation oncology designed to meet the needs of a large scale of examinees. Topics of this new book will be in the order of our previous "Basic Radiation Oncology" (Springer, 2010) with additional two new chapters (Pediatric tumors and Rare tumors-Benign Diseases) making a total of 15 chapters and instead of old style question and answer format,current MCQ examination pattern helpful for both oral exams and written exams is used in this comprehensive bedside recall book complementing the "Basic Radiation Oncology"1st Edition.

Fundamentals of Information Systems Security Sep 02 2022 PART OF THE JONES & BARTLETT LEARNING INFORMATION SYSTEMS SECURITY & ASSURANCE SERIES Revised and updated with the latest information from this fast-paced field, Fundamentals of Information System Security, Second Edition provides a comprehensive overview of the essential concepts readers must know as they pursue careers in information systems security. The text opens with a discussion of the new risks, threats, and vulnerabilities associated with the transformation to a digital world, including a look at how business, government, and individuals operate today. Part 2 is adapted from the Official (ISC)2 SSCP Certified Body of Knowledge and presents a high-level overview of each of the seven domains within the System Security Certified Practitioner certification. The book closes with a resource for readers who desire additional material on information security standards, education, professional certifications, and compliance laws. With its practical, conversational writing style and step-by-step examples, this text is a must-have resource for those entering the world of information systems security. New to the Second Edition: - New material on cloud computing, risk analysis, IP mobility, OMNIBus, and Agile Software Development. - Includes the most recent updates in Information Systems Security laws, certificates, standards, amendments, and the proposed Federal Information Security Amendments Act of 2013 and HITECH Act. - Provides new cases and examples pulled from real-world scenarios. - Updated data, tables, and sidebars provide the most current information in the field.

Master Key System SAM Mar 28 2022 This book's focus is on the management and application of a master keying system, not on the development of the system as most master keying books do. Specification deals with factory ordering of systems for shops without a master keying locksmith. Application deals with putting the key cut bitting list to actual usage. Management includes the life cycle of the system.

Human Body (eBook) May 30 2022 This book presents a program of basic studies dealing with the anatomy and physiology of the human body. Each body system is detailed and major organs and their functions are described. Each of the twelve teaching units in this book is introduced by a color transparency (print books) or PowerPoint slide (eBooks) that emphasizes the basic concept of the unit and presents questions for discussion. Reproducible student pages provide reinforcement and follow-up activities. The teaching guide offers descriptions of the basic concepts to be presented, background information, suggestions for enrichment activities, and a complete answer key.

Intelligent Systems Design and Applications Jul 28 2019 This book highlights recent research on intelligent systems and nature-inspired computing. It presents 130 selected papers from the 19th International Conference on Intelligent Systems Design and Applications (ISDA 2020), which was held online. The ISDA is a premier conference in the field of computational intelligence, and the latest installment brought together researchers, engineers and practitioners whose work involves intelligent systems and their applications in industry. Including contributions by authors from 40 countries, the book offers a valuable reference guide for all researchers, students and practitioners in the fields of Computer Science and Engineering.
