The Productivity Project Jun 16 2021 'A fun, interesting, and useful read!' David Allen, bestselling author of *Getting Things Done* Nearly all of us want to be more productive, but finding the method that works for you among the hundreds and hundreds of different tips, tricks and hacks can be a daunting prospect. After graduating college, Chris Bailey decided to dedicate a whole year to doing just that - experimenting with as many of the techniques as he could, and finding the things that work. Among the experiments that he undertook are: going several weeks on little to no sleep; cutting out caffeine and sugar; taking a daily siesta; living in total isolation for 10 days; stretching his workweek to 90 hours; and getting up at 5:30 every morning, all the while monitoring the impact of his experiments on the quality and quantity of his work. The results were often surprising! This book is the result of Chris's year-long journey, distilling the lessons he learned into a few core truths about how we get things done (or, indeed, don't). Among the many counterintuitive insights Chris discovered that had the biggest impact on his productivity were striving for imperfection; scheduling less time for important tasks; the 20 second rule to distract yourself from distractions; and the concept of productive procrastination. In this accessible and fun guide, Chris Bailey offers over 30 tried-and-tested best practices that will help everyone to accomplish more - and become more awesome.

How and Why to Read and Create Children's Digital Books Jul 18 2021

How and Why to Read and Create Children's Digital Books outlines effective ways of using digital books in early years and primary classrooms, and specifies the educational potential of using digital books and apps in physical spaces and virtual communities. With a particular focus on apps and personalised reading, Natalia Kucirkova combines theory and practice to argue that personalised reading is only truly personalised when it is created or co-created by reading communities. Divided into two parts, Part I suggests criteria to evaluate the educational quality of digital books and practical strategies for their use in the classroom. Specific attention is paid to the ways in which digital books can support individual children's strengths and difficulties, digital literacies, language and communication skills. Part II explores digital books created by children, their caregivers, teachers and librarians, and Kucirkova also offers insights into how smart toys, tangibles and augmented/virtual reality tools can enrich children's reading for pleasure. How and Why to Read and Create Children's Digital Books is of interest to an international readership ranging from trainee or established teachers to MA level students and researchers, as well as designers, librarians and publishers. All are inspired to approach children's reading on and with screens with an agentic perspective of creating and sharing. Praise for How and Why to Read and Create Children's Digital Books 'This is an exciting and innovative book - not least because it is freely available to read online but because its origins are in primary practice. The author is an accomplished storyteller, and whether you know, as yet, little about the value of digital literacy in the storymaking process, or you are an accomplished digital player, this book is full of evidence-informed ideas, explanations and inspiration.' Liz Chamberlain, Open University 'At a time when children's reading is increasingly on-screen, many teachers, parents and carers are seeking practical, straightforward guidance on how to support children's engagement with digital books. This volume, written by the leading expert on personalised e-books, is packed with app reviews, suggestions and insights from recent international research, all underpinned by careful analysis of digital book features and recognition of reading as a social and cultural practice. Providing accessible guidance on finding, choosing, sharing and creating digital books, it will be welcomed by those excited by the possibilities of enthusing children about reading in the digital age.' Cathy Burnett, Professor of Literacy and Education, Sheffield Hallam University

Richard Holloway's usefully dialectical approach to this central question will allow non-believers as well as believers to profit from a study of the most influential book in human history. The book discusses significant passages from both the Hebrew and Christian scriptures and explores the evolution of the split between the two communities whose tragic consequences still reverberate powerfully today.

How Should One Read a Book? Sep 19 2021 First delivered as a speech to schoolgirls in Kent in 1926, this enchanting short essay by the towering Modernist writer Virginia Woolf celebrates the importance of the written word. With a measured but ardent tone, Woolf weaves together thought and quote, verse and prose into a moving tract on the power literature can have over its reader, in a way which still resounds with truth today. I have sometimes dreamt, at least, that when the Day of Judgement dawns and the great conquerors and lawyers and statesmen come to receive their rewards - their crowns, their laurels, their names carved indelibly upon imperishable marble - the Almighty will turn to Peter and will say, not without a certain envy when he sees us coming with our books under our arms, "Look, these need no reward. We have nothing to give them here. They have loved reading."

How We Read Now Apr 14 2021 "The digital revolution has transformed reading. Onscreen text, audiobooks, podcasts, and videos often replace print. We make these swaps for pleasure reading, but also in schools. How We Read Now is a ringside seat to the impact of reading medium on learning. Teachers, administrators, librarians, and policymakers need to make decisions about classroom materials. College students must weigh their options. And parents face choices for their children. Digital selections are often based on cost or convenience, not educational evidence. Current research offers essential findings about how print and digital reading compare when the aim is learning. Yet the gap between what scholars and the larger public know is huge. How We Read Now closes the gap. The book begins by sizing up the state of reading today, revealing how little reading students have been doing. The heart of the book connects research insights to practical applications. Baron draws on work from international researchers, along with results from her collaborative studies of student reading practices ranging from middle school through college. The result is an impartial view of the evidence, including where the jury is still out. The book closes with two challenges. The first is that students increasingly complain print is boring. And second, for all the educational buzz about teaching critical thinking, digital reading is inherently ill-suited for cultivating these habits of mind. Since screens and audio are now entrenched - and valuable - platforms for reading, we need to rethink how to help learners use them wisely"--

How to Read Now Mar 26 2022 'Castillo's *How To Read Now* took my breath away. Energetically brilliant, warmly humane, incisively funny' Andrew Sean Greer, Pulitzer Prize -winning author of *Less* 'I gasped, shouted, and holler-laughed while reading these essays... Phenomenal' R.O. Kwon, author of *The Incendiaries* How many times have we heard that reading builds empathy? That we can travel through books? How often have we were heard about the importance of diversifying our bookshelves? Or claimed that books saved our lives? These familiar words - beautiful, aspirational - are sometimes even true. But award-winning novelist Elaine Castillo has more ambitious hopes for our reading culture, and in this collection of linked essays, she moves to wrest reading away from the aspirations of uniting people in empathetic harmony and reposition it as thornier, ultimately more rewarding work. *How to Read Now* explores the politics and ethics of reading, and insists that we are capable of something better: a more engaged relationship not just with our fiction and our art, but with our buried and entangled histories. Smart, funny, galvanizing, and sometimes profane, Castillo attacks the stale questions and less-than-critical proclamations that masquerade as vital discussion: reimagining the cartography of the classics, building a moral case against the settler colonialism of lauded writers like Joan Didion, taking aim at Nobel Prize winners and toppling indie filmmakers, and celebrating glorious moments in everything from popular TV like *The Watchmen* to the films of Wong Kar-wai and the work of contemporary

poets like Tommy Pico. At once a deeply personal and searching history of one woman's reading life, and a wide-ranging and urgent intervention into our globalized conversations about why reading matters today, *How to Read Now* empowers us to embrace a more complicated, embodied form of reading, inviting us to acknowledge complicated truths, ignite surprising connections, imagine a more daring solidarity, and create space for a riskier intimacy - within ourselves, and with each other.
