Friends, Families, & Forays Aug 05 2020 The 55 chapters of Friends, Families & Forays are bursting with details about the people and the pursuits that colored the life of Henry Ford. Here the reader will meet prominent and diverse figures such as Thomas Edison, John Borroughs, George Washington Carver, Helen Keller, and Mahatma Gandhi—all of whose lives intersected that of Henry Ford at some interesting point in his life. Also brought to life in these pages are the branches of Ford's family tree, from his Irish ancestors to the descendants who carry his legacy today. Although it was the automobile that made him an industrial icon, Henry Ford could boast of exploits in many other arenas as well: railroads, speedboats, robots, flour mills, rubber plantations, and humanitarian efforts around the world and in his own backyard. Ford's hard work and passionate interests brought him great wealth, and this book provides a peek at the luxuries he and his wife, Clara, enjoyed, from a yacht and a private rail car, to gracious residences in Michigan, Florida, and Georgia.

Buses and Coaches in and around Walton-on-Thames and Weybridge, 1891-1986 Jan 10 2021
Although the Surrey towns of Walton-on-Thames and Weybridge were for many years served by the London bus network, there were also a number of small scale locally based operators running bus services, before selling out to London Transport in the 1930s. Such companies ran coaches for private hire, contracts and pleasure outings, commencing just after the First World War. This book seeks to newly record the history of these proprietors and put the activities of the London General Omnibus Company and later London Transport into local context. The story starts in the 1890s with horse drawn buses linking with the local railway stations and carries the reader through the dawn of the motor era, the rise of the charabanc, entrepreneurial opportunities in the 1920s and consolidation in the 1930s, World War Two and the gradual decline of bus services from the 1960s. It culminates in a return to a de-regulated operating environment in 1986. Capturing the story of Ben Stanley's Coaches (amongst other pioneers) by using primary source material, the book covers more than just routes and vehicles - it attempts to show how road passenger transport was influenced by local social historic and economic activity.
