Romancing the Beat **Jul 11 2021** What makes a romance novel a romance? How do you write a kissing book? Writing a well-structured romance isn't the same as writing any other genre-something the popular novel and screenwriting guides don't a romance arc is made up of its own story beats, and the external plot and theme need to be braided to the romance arc-not around. Told in conversational (and often irreverent) prose, Romancing the Beat can be read like you are sitting down to coffee with a romance editor and author Gwen Hayes while she explains story structure. The way she does with her clients. Some of whom are regular inhabitants of the New York Times and USA Today bestseller lists. Romancing the Beat is a recipe, not a rigid system. You don't care if you plot or outline before you write, or if you pants your way through the drafts and do a "beat check" when you're revising. Pantsers and plotters are both welcome. So sit down, grab a cuppa, and let's talk about kissing books.

In grade school, she always had her nose in a book. In junior high, the other girls thought she was weird, because she actually liked reading those dusty old novels in literature class. All through high school, she dreamed of writing a book of her own someday. But when she went to college, her parents persuaded her to study something practical. Goldilocks hated practical, and secretly she kept reading novels. But she was a very obedient girl, so she did what her parents said. She got a very practical degree in marketing. After college, she got a job that bored her to tears—but at least it was practical. She got married, and within a few years, she had two children, a girl and then a boy. She quit her job to devote full time to them. As her children grew, Goldilocks took great joy in introducing them to the stories she had loved as a child. When her son went off to kindergarten, Goldilocks thought about looking for a job. But her resume now had a seven-year hole in it, and her practical skills were long out of date. The only jobs Goldilocks could qualify for were minimum wage. She suddenly realized that being practical had made her horribly unhappy. On a whim, Goldilocks decided to do the one thing she had always wanted more than anything else—she was finally going to write a novel. She didn't care if it was impractical. She didn't care if nobody would ever read her novel. She was going to do it just because she wanted to. For the first time in years, she was going to do something just for herself. And nobody was going to stop her.
