How Europe Underdeveloped Africa Dec 21 2021 The classic work of political, economic, and historical analysis, powerfully introduced by Angela Davis In his short life, the Guyanese intellectual Walter Rodney emerged as one of the leading thinkers and activists of the anticolonial revolution, leading movements in North America, South America, the African continent, and the Caribbean. In each locale, Rodney found himself a lightning rod for working class Black Power. His deportation catalyzed 20th century Jamaica's most significant rebellion, the 1968 Rodney riots, and his scholarship trained a generation how to think politics at an international scale. In 1980, shortly after founding of the Working People's Alliance in Guyana, the 38-year-old Rodney would be assassinated. In his magnum opus, *How Europe Underdeveloped Africa*, Rodney incisively argues that grasping "the great divergence" between the west and the rest can only be explained as the exploitation of the latter by the former. This meticulously researched analysis of the abiding repercussions of European colonialism on the continent of Africa has not only informed decades of scholarship and activism, it remains an indispensable study for grasping global inequality today.

Out of Africa Aug 29 2022 From the moment Karen Blixen arrived in Kenya in 1914 to manage a coffee plantation, her heart belonged to Africa. Drawn to the intense colours and ravishing landscapes, Karen Blixen spent her happiest years on the farm and her experiences and friendships with the people around her are vividly recalled in these memoirs. Out of Africa is the story of a remarkable and unconventional woman and of a way of life that has vanished for ever.

The Cambridge History of South Africa: Volume 1, From Early Times to 1885 Jun 02 2020 Reflecting on South Africa's achievement of majority rule, this book takes a critical and searching look at the country's past. It presents South Africa's past in an objective, clear, and refreshing manner. With chapters contributed by ten of the best historians of the country, the book elaborately weaves together new data, interpretations, and perspectives on the South African past, from the Early Iron Age to the eve of the mineral revolution on the Rand. Its findings incorporate new sources, methods, and concepts, for example providing new data on the relations between Africans and colonial invaders and rethinking crucial issues of identity and consciousness. This book represents an important reassessment of all the major historical events, developments, and records of South Africa - written, oral, and archaeological - and will be an important new tool for students and professors of African history worldwide.

Voice in the Night Feb 29 2020 Astonishing True Story of the Miracles That Are Changing Africa Born into a long line of witch doctors, Surprise ("Surpresa") Sithole was destined for a life of fear, oppression, and poverty in the jungles of Africa. But at the age of fifteen, he was awakened in the middle of the night by an unfamiliar voice. Urgent, but not harsh, it told him to get up and leave his family immediately. As Surprise stepped out into the night, away from everything dear to him, he had no idea who God was--or what he had in store for him. From miraculous signs and wonders to supernatural deliverance from certain death to divine revivals that overtook countries, Surprise has followed wherever God has led, becoming an agent of hope and change in a continent devastated by war, poverty, and spiritual oppression. *Voice in the Night* is the amazing true story of what began that night in a jungle hut more than twenty-five years ago: a journey--an adventure--of faith and miracles.

Born in Blackness: Africa, Africans, and the Making of the Modern World, 1471 to the Second World War Sep 05 2020 Revealing the central yet intentionally obliterated role of Africa in the creation of modernity, *Born in Blackness* vitally reframes our understanding of world history. Traditional accounts of the making of the modern world afford a place of primacy to European history. Some credit the fifteenth-century Age of Discovery and the maritime connection it established between West and East; others the accidental unearthing of the "New World." Still others point to the development of the scientific method, or the spread of Judeo-Christian beliefs; and so on, ad infinitum. The history of Africa, by contrast, has long been relegated to the remote outskirts of our global story. What if, instead, we put Africa and Africans at the very center of our thinking about the origins of modernity? In a sweeping narrative spanning more than six centuries, Howard W. French does just that, for *Born in Blackness* vitally reframes the story of medieval and emerging Africa, demonstrating how the economic ascendancy of Europe, the anchoring of democracy in the West, and the fulfillment of so-called Enlightenment ideals all grew out of Europe's dehumanizing engagement with the "dark" continent. In fact, French reveals, the first impetus for the Age of Discovery was not—as we are so often told, even today—Europe's yearning for ties with Asia, but rather its centuries-old desire to forge a trade in gold with legendarily rich Black societies sequestered away in the heart of West Africa. Creating a historical narrative that begins with the commencement of commercial relations between Portugal and Africa in the fifteenth century and ends with the onset of World War II, *Born in Blackness* interweaves precise historical detail with poignant, personal reportage. In so doing, it dramatically retrieves the lives of major African historical figures, from the unimaginably rich medieval emperors who traded with the Near East and beyond, to the Kongo sovereigns who heroically battled seventeenth-century European powers, to the ex-slaves who liberated Haitians from bondage and profoundly altered the course of American history. While French cogently demonstrates the centrality of Africa to the rise of the modern world, *Born in Blackness* becomes, at the same time, a far more significant narrative, one that reveals a long-concealed history of trivialization and, more often, elision in depictions of African history throughout the last five hundred years. As French shows, the achievements of sovereign African nations and their now-far-flung peoples have time and again been etiolated and deliberately erased from modern history. As the West ascended, their stories—siloes and piecemeal—were swept into secluded corners, thus setting the stage for the hagiographic "rise of the West" theories that have endured to this day. "Capacious and compelling" (Laurent Dubois), *Born in Blackness* is epic history on the grand scale. In the lofty tradition of bold, revisionist narratives, it reframes the story of gold and tobacco, sugar and cotton—and of the greatest "commodity" of them all, the twelve million people who were brought in chains from Africa to the "New World," whose reclaimed lives shed a harsh light on our present world.

Afrika Jan 22 2022 For thirteen-year-old Kim, travel to South Africa with her journalist mother will mark the end of her childhood and the beginning of a remarkable journey. Expecting nothing more than three months in her mother's homeland, Kim comes to terms with the country's diverse and often shocking history. The Truth and Reconciliation Hearings in post-apartheid South Africa open her eyes to the tragedy and brutality of its segregationist policies. Kim's first meeting with her relatives, her contact with schoolmates and cousins, bring her face-to-face with the realization that she is not as removed from this powerful story as she thought. As her mother struggles with her past, Kim becomes more and more determined to unlock the secret that has always kept her from knowing her father. Helped by the young son of a long-time family servant, whose own father was a casualty of Apartheid history, Kim eventually unlocks her mystery and brings her mother and herself to their own truth and reconciliation. Layered and complex, this is a novel that raises questions and challenges beliefs.

Language Diversity Endangered Sep 25 2019 This book presents a comprehensive overview of endangered languages with a global coverage. It features such well-known specialists as Michael Krauss, Willem F. H. Adelaar, Denny Moore, Colette Grinevald, Akira Yamamoto, Roger Blench, Bruce Connell, Tapani Salminen, Olga Kazakevich,

Aleksandr Kibrik, Jonathan Owens, David Bradley, George van Driem, Nicholas Evans, Stephen A. Wurm, Darrell Tryon and Matthias Brenzinger. The contributions are unique in analysing the present extent and the various kinds of language endangerment by applying shared general indicators for the assessment of language endangerment. Apart from presenting the specific situations of language endangerment at the sub-continental level, the volume discusses major issues that bear universally on language endangerment. The actual study of endangered languages is carefully examined, for example, against the ethics and pragmatics of fieldwork. Practical aspects of community involvement in language documentation are discussed, such as the setting up of local archives and the training of local linguists. Numerous case studies illustrate different language shift environments with specific replacing factors, such as colonial and religious conquests, migrations and governmental language education. The book is of interest to students and scholars of linguistics with particular focus on endangered languages (and their documentation), typology, and sociolinguistics as well as to anthropologists and language activists.

World War I in Africa Nov 27 2019 The vast military campaigns in Africa during World War I were among the most ambitious of the Great War. Many histories, however, have regarded these campaigns as side-shows to the war on the Western Front. World War One in Africa looks afresh at the impact of the strategy of the German and Allied campaigns, and at the great rivalry between General Jan Christian Smuts, who took on the German forces in East Africa, and General Lettow-Vorbeck, celebrated as the only German general to occupy British territory and whose troops finished the war undefeated. Using primary material from British and South African archives, this book is a detailed study of the giants of the campaign, and the battles which would shape the outcome of the Great War as well as the future of the African continent and the British Empire.

Economic Integration in Africa Nov 19 2021 First published in 1968, this reissue is a study of contemporary international economic policy, with particular emphasis upon economic integration as a means of bringing about a faster rate of economic progress and of helping to overcome poverty. Peter Robson's book is a study of the rationale of common markets and other forms of economic integration among African states and of their operation in practice. The book will be of great value to those concerned with administering or assessing integration schemes in Africa and indeed in less developed areas throughout the world. In addition, it is an important contribution to the field of development economics.

African Mathematics: History, Textbook and Classroom Lessons Jul 28 2022 African Mathematics: History, Textbook and Study Guide aims to meet several objectives. Firstly, the book gives a historical overview of Africa and its contribution to Mathematics. Secondly, the book provides the teacher and the learner with study materials that can be used in the classroom. Thirdly, the book introduces some of the numerical patterns and puzzles that has fascinated one of the authors John Matthews. Fourthly, the book introduces the lectures, classes and workshops that the two authors teach on these subjects. Mathematics has an interesting history in Africa. This history forms the first part of the book. The earliest known mathematical artefact in human history is the Lebombo Bone. Thought to be 37,000 years old, it was discovered by archaeologists in South Africa. Scholars believe that the number system carved into the bone represents a lunar calendar. Later mathematical evidence comes from the Ishango region of Central Africa, Ancient Egypt, Medieval North Africa, Ethiopia, Medieval West Africa and Medieval Central Africa. Mathematics teachers have asked for material that can be used in the classroom where these African mathematical ideas can be used, tested or even challenged. To this aim, the second part of the book presents classroom material that can engage children. Each lesson demonstrates a mathematical principle followed by classroom exercises that the pupils can attempt. We have provided perhaps 22 hours worth of teaching and learning material. The third part of this book was written wholly by John Matthews, a secondary school mathematics teacher. It contains a sample of his tips and short cuts that any pupil of mathematics can profitably use to improve their engagement with number. Mr Matthews also believes that students of mathematics should enjoy detecting patterns in number sequences. In the fourth part of the book he presents a sample of his own discoveries in this area. He also presents classroom exercises that the pupils can attempt.

How to Write About Africa Jul 04 2020 A trailblazing collection of writing from Binyavanga Wainaina's extraordinary life 'In your text, treat Africa as if it were one country. It is hot and dusty with rolling grasslands and huge herds of animals and tall, thin people who are starving. Or it is hot and steamy with very short people who eat primates. Don't get bogged down with precise descriptions.' Binyavanga Wainaina was a seminal author and activist, remembered as one of the greatest chroniclers of contemporary African life. After his death in 2019, this ground-breaking collection brings together his pioneering writing on the African continent for the first time. A rule-breaker full of wry satire and piercing wisdom, this collection includes many of Binyavanga's most critically acclaimed pieces, including the viral satirical sensation 'How to Write About Africa'. Writing fearlessly across a range of topics - from politics to international aid, cultural heritage and redefining sexuality, this is a remarkable illustration of a writer at the height of his power.

The Road Jan 10 2021 The post-apocalyptic modern classic with an introduction by novelist John Banville. In a burned-out America, a father and his young son walk under a darkened sky, heading slowly for the coast. They have no idea what, if anything, awaits them there. The landscape is destroyed, nothing moves save the ash on the wind and cruel, lawless men stalk the roadside, lying in wait. Attempting to survive in this brave new world, the young boy and his protector have nothing but a pistol to defend themselves. They must keep walking. Winner of the Pulitzer Prize for Fiction, *The Road* is an incandescent novel, the story of a remarkable and profoundly moving journey. In this unflinching study of the best and worst of humankind, Cormac McCarthy boldly divines a future without hope, but one in which, miraculously, this young family finds tenderness. An exemplar of post-apocalyptic writing, *The Road* is a true modern classic, a masterful, moving and increasingly prescient novel. This edition is part of the Picador Collection, a series of the best in contemporary literature, inaugurated in Picador's 50th Anniversary year.
