America's Financial

Apocalypse Dec 03 2019 For nearly three decades, America has been gradually losing ground to the developed world in many critical areas. The result is that the American standard of living has been in decline for over two decades, with the middle class having been affected the most. Meanwhile, the rich have gotten wealthier and now America is a nation controlled by corporate America. Hidden by two-income households and open access to credit, declining living standards have gone unnoticed by most Americans. Spending beyond one's means has become the American way of life and is encouraged by the government. In contrast, saving is almost unheard of in America. As a result, this once power nation has changed from the world's largest creditor to the world's largest debtor.

by Americans can only last so long before a day of reckoning occurs. The deflation of the Internet Bubble resulted in the paper loss of over \$7 trillion dollars, yet most people seem to have already forgotten the most scandalous charades in U.S. history by Wall Street and corporate America. And now, as the retirement assets of tens of millions of Americans are in question, an even larger number are caught up in the largest real estate bubble in our history. As we enter the two next decades, 76 million baby boomers will retire, most of them in poverty. Thus, the generation that was responsible for creating the greatest bull market in U.S. history may, through no choice of its own, also be the same group that causes an economic meltdown due to decades of government mismanagement, inadequate planning, and overconsumption. During this same time frame, many expect the global oil production is

gradually decline due to what is known as the peak oil theory. Obviously, this has enormous consequences of its own.

Today, America is in the final preparatory stages that will lead to a massive economic meltdown resulting in the Next Great Depression, as over 46 million Americans already have no healthcare insurance, Social Security will be inadequate for the 76 million baby boomers who will retire over the next several years, energy prices will remain high for some time, and for the first time ever, Americans can no longer live with the comfort knowing that they are safe on their own soil. These issues will only get worse and when the appropriate triggers are set off, a domino effect will commence, sending the stock and bond markets into a downward spiral. This book claims to represent the most detailed and exhaustive analysis of America's current and future economic plight, as well as that of its capital markets. Rather than making bold claims

In this groundbreaking book, Bill Williams, a seasoned trader at the forefront of this dynamic new approach, explains exactly what it is, how it works in current stock and commodity markets, and how to use it to your advantage. Based on human nature rather than the vagaries of the market, the new trading dimension works on the premise that we trade not the market, but our own belief system. By assessing what your personal biases are, you can determine how they influence your ultimate success-or failure-and then adjust your trading strategies accordingly. Written by an expert in the field who has been featured in Futures, Worth, Success, and other prominent publications, New Trading Dimensions takes the latest in scientific knowledge about human behavior and applies it directly to the fields of stock and commodity investing and trading. With straightforward guidelines, it shows you
