**Pergunte ao desenvolvedor - 1ª edição 2022** Sep 18 2021 No século XXI, toda indústria tem de ser digital. Não importa o negócio: para conquistar os clientes, as empresas precisam oferecer uma experiência excelente e, hoje, isso exige bom software. Mas como fazer a transição para processos e produtos cada vez mais digitais de um jeito ágil e eficiente? A resposta está nos próprios desenvolvedores. Essa força de trabalho tem o conhecimento técnico e a criatividade para encontrar soluções para problemas espinhosos, criar produtos melhores e trazer inovações importantes para todas as áreas do negócio. No entanto, a maioria dos líderes trata os desenvolvedores como meros executores de

tarefas e, assim, perde oportunidades incríveis. Por outro lado, empresas como Google, Amazon e a maioria das startups bem-sucedidas enxergam os desenvolvedores de software como verdadeiros parceiros, e alcançaram novos patamares de sucesso por conta disso. Neste livro, Jeff Lawson usa seu conhecimento duplo como desenvolvedor e CEO para trazer ferramentas úteis para ajudar líderes, gerentes de produto, desenvolvedores de software e executivos a atingirem um único objetivo: criar produtos e experiências digitais excelentes. Se você quer vencer na economia digital, já sabe o caminho: pergunte ao desenvolvedor!

*Digital inclusion in Wales* Apr 01 2020 The Wales Office and the Welsh Assembly Government must ensure UK digital inclusion initiatives meet Welsh needs and build on existing good work to deliver on Welsh digital ambitions, says the Welsh Affairs Committee in a report published today. This report "Digital Inclusion in Wales", examines the use of digital technologies in Wales, highlights the urgent need for the eradication of broadband 'notspots' - areas with limited or no access to high speed internet connections - and says this issue must continue to receive priority attention. There should be more support to help a wider range of people use technology effectively. Employers told the Committee they need staff with better IT skills and more training opportunities. The Committee recommends the Welsh Assembly Government explicitly includes this issue in its digital inclusion strategy. The digital inclusion agenda is a complex mix of reserved and devolved matters. This brings a risk that key issues can be overlooked, for example no account has been taken of Welsh language speakers' needs in the Government's Digital Inclusion Action Plan. The Secretary of State for Wales must ensure that bodies in Wales across all sectors are fully engaged with initiatives and that the next stage of Digital Britain adequately reflects

Welsh needs. Higher education institutions also have a vital role to play and should be involved in any new research opportunities. The Welsh Assembly already has successful digital inclusion projects in Wales and it should find a way to become fully involved with the UK digital inclusion and Digital Britain work so it does not miss out on policy developments and funding opportunities. The Committee also recommends the creation of a one-stop shop providing advice on the risks for young people using technology, and commends the Assembly's work tackling internet related crimes which it says should be promoted as part of the economic development strategy in Wales.

*Innovation in an Advanced Consumer Society* Jun 03 2020 This book aims to develop innovation theory by focusing on innovation in a consumer society. In an advanced consumer society, services dominate and are provided through digital as well as physical channels by local, national and global firms. This book aims to identify the ways in which value can be increased for all stakeholders through both incremental and disruptive innovation. When interacting with leading businesses, there is a common acceptance that we need a better

understanding of how to innovate in a service economy. Today, most advanced economies are service and knowledge based, accounting for about 70 percent of GDP. OECD reports document a considerable knowledge gap related to service innovation. It is a challenge for both business and society that future economic growth will increasingly be based on services rather than manufacturing and products. Failing to understand innovation issues in this context as an engine for growth is somewhat alarming. This raises the question: do we know how to innovate successfully in a consumer driven society? In this book, the authors develop the concept of Value Driven Service Innovation, alongside a methodology for applying this approach in practice: the Service Innovation Triangle. They develop a better understanding of innovation, based on the uniqueness of services in order to develop the theory of service innovation suitable for a consumer society.
