Effective Proposal Writing Jan 26 2022 This is a simple short proposal microbook aimed at making an impact on your next proposal. It is not preachy and not long so you can finish it before you start on that next contract tender. It's worth the cost if it helps 10% into a better proposal. I have written

successful proposals worth millions of dollars, and I have reviewed and scored proposals worth almost as much. I have condensed my experience down to a microbook and a premium version with examples. This basic book is prescriptive not descriptive. It explains things to consider not knowing what your area is; rather than going through long examples that might not make sense. It makes 6 or 7 important points quickly rather than dressing them in 200 pages of fluff. In fact, it's written like an effective proposal. Succinct, on point, and meets the requirements. In this case, the requirements are: how can you write more effective proposals?

A Step-by-Step Guide on Writing the Dissertation Oct 30 2019 This book is a significant step towards helping doctoral learners write better proposals and the final dissertation. The book walks the learner through all the sections of my dissertation and describes, paragraph-by-paragraph, how each section may be written succinctly and correctly. Although my original dissertation was a qualitative single case study, students can relate the step-by-step directions in the book to their own qualitative studies regardless of their specific research design. Although all learners pursuing qualitative studies would benefit from the book, those pursuing a case study design, or a descriptive design would benefit the most. If you are planning to use the thematic data analysis in your qualitative doctoral research, you will find this book most helpful. I also recommend that you get the 4-Step Thematic Data Analysis with MAXQDA textbook for the complete, step-by-step walk-through of how to analyze your qualitative data. In this book, Chapters 1 through 3 are aimed at those working on the Prospectus and on the Proposal whereas Chapters 4 and 5 are aimed at those working on the final Dissertation.

Research methods in palliative care Jul 08 2020 Palliative and end of life care are concerned with the physical, social, psychological and spiritual care of people with advanced disease. It currently has a poorly developed research base, but the need to improve this is increasingly recognised. One of the reasons for the lack of research - and the variable quality of the research that is undertaken - is the difficulty of conducting research with very ill and bereaved people. Standard and well-established research methods may need to be adapted to work in this context. This means that existing research methods textbooks may be of limited use to palliative care practitioners seeking to do research for the first time, or to more experienced researchers wanting to apply their knowledge in palliative care settings. This research methods textbook is the first to be written specifically for palliative care. It has been edited by four

experienced palliative care academics with acknowledged expertise and international reputations in this field. It encompasses methods used in both clinical and health services research in palliative care, with sections on clinical, epidemiological, survey and qualitative research, as well as a section covering skills needed in any research project. Each chapter provides readers with an up to date overview of the research method in question, an understanding of its applicability to palliative care and of the particular challenges of using it in this setting. It is essential reading for all palliative care researchers.
