**Knowledge-Based Configuration** Nov 18 2021 Knowledge-based Configuration incorporates knowledge representation formalisms to capture complex product models and reasoning methods to provide intelligent interactive behavior with the user. This book represents the first time that corporate and academic worlds collaborate integrating research and commercial benefits of knowledge-based configuration. Foundational interdisciplinary material is provided for composing models from increasingly complex products and services. Case studies, the latest research, and graphical knowledge representations that increase understanding of knowledge-based configuration provide a toolkit to continue to push the boundaries of what configurators can do and how they enable companies and customers to thrive. Includes detailed discussion of state-of-the art configuration knowledge engineering approaches such as automated testing and debugging, redundancy detection, and conflict management Provides an overview of the application of knowledge-based configuration technologies in the form of real-world case studies from SAP, Siemens, Kapsch, and more Explores the commercial benefits of knowledge-based configuration technologies to business sectors from services to industrial equipment Uses concepts that are based on an example personal computer configuration knowledge base that is represented in an UML-based graphical language

**Cross-Cultural Apologetics** Dec 27 2019 In our increasing multicultural world, Christian missionaries struggle to give an answer concerning their faith: most are trained just to communicate the gospel across cultures. Likewise, many trained apologists never gain a hearing for their defense because of cultural differences and barriers they were never prepared to recognize or overcome. Wayne Detzler, a professor of missions and experienced missionary on three continents (Europe, Africa and Asia) for over 20 years along with Doug

Potter an educator in Christian theology and apologetics for 10 years move these two needed areas, apologetics and cross-cultural communication, closer together by providing a theory and then apply it to adherents of various worldviews and their religious expressions. Interactive case studies provide a real world feel to this subject that is often left out of the classroom. This book is especially suited for Westerners who need help developing an answer for those they come in contact with from distant cultures.

The Book of L Jun 13 2021 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Day Bang Dec 07 2020 Day Bang is a 201-page book that teaches you how to pick up women during the day, primarily in a coffee shop, clothing store, bookstore, grocery store, subway, or on the street. It contains 51 openers, 23 long dialogue examples with commentary, and dozens of additional lines that teach by example. Day Bang includes... - The optimal day game mindset that leads to the most amount of success-An easy mental trick to prevent your brain from going into a flight-or-fight response when it's time to approach a woman you're attracted to-A detailed breakdown of how to use the "elderly opener," an easy style of approach that reliably starts conversations with women-2 ways to

tell if a girl will be receptive to your approach-How to avoid the dreaded "interview vibe"-  
10 common mistakes guys make that hurt their chances of getting a number Day Bang  
shares tons of tips and real examples on having successful conversations. It teaches you... -  
How to use my bait system to get the girl engaged and interested in you-How to segue out  
of the initial opening topic into a more personal chat where you'll get to know the girl on a  
deeper level-How to take the interesting things you've done (your accomplishments,  
hobbies, and experiences) and morph them into bait hooks that gets the girl intrigued  
enough to want to go out with you-My "Galnuc" method to seamlessly get a girl's number-  
An easy hack at the end of your interactions that will reduce the chance of a flake and prime  
the girl for going out with you-Ways to open up a conversation on a girl who isn't giving  
you much to work with Day Bang goes into painstaking detail on how to approach women  
in a variety of common environments... -How to open a girl in coffee shops when she has a  
book, laptop, mp3 player, cell phone, research paper, crossword or Sudoku puzzle, or  
nothing at all-Two methods for approaching a girl on the street, depending on if she's  
moving or not, with a diagram to explain all the approach variations-How to approach in a  
retail store or mall environment, with openers to use on customers or sales clerks-How to  
approach in bookstores, with specific tips on how to customize your approaches in the cafe,  
magazine section, or general book aisles-How to meet women in public transportation, on  
both the bus and subway-How to meet women in grocery stores-How to approach girls in  
secondary venues like a beach, casino, concert, gym, hair salon, handicraft fair, museum, art  
show, park, public square, or wine festival Dozens of additional topics are logically  
organized into 12 chapters... -Preparation. How to reduce your approach anxiety-Opening.  
How to deliver your opener in a way that doesn't scare women away-Rambling. How to  
have conversations that make women interested in you-Closing. How to get a number in a  
way that reduces the chance she'll flake-The Coffee Shop. How to pick up in coffee shops  
and cafes-The Street. How to pick up outdoors-The Clothing Shop. How to pick up in retail  
shops, malls, and big box stores-The Bookstore. How to pick up in bookstores-Public  
Transportation. How to pick up in the bus, subway, or long distance transportation-The  
Grocery Store. How to pick up in grocery stores-Other Venues. How to pick up just about  
anywhere else women can be found-Putting It All Together. How to maximize your day  
game potential The lessons taught in this 75,000 word, no-fluff textbook will help you meet  
women during the day. If you need tips on what to do after getting her number, consult my  
other book Bang, which contains an A-to-Z banging strategy. Day Bang focuses exclusively  
on daytime approaching.

**Cooking for One** Sep 28 2022 Discover the joy of cooking for yourself with more than 160  
perfectly portioned, easy-to-execute recipes, flexible ingredient lists to accommodate your  
pantry, and ideas for improvising to your taste. Taking care to prepare a meal for yourself is  
a different experience than cooking for others. It can be a fun, casual, and (of course)  
delicious affair, but there are challenges, from avoiding a fridge full of half-used ingredients  
to ending up with leftovers that become boring after the third reheat. Cooking for One helps  
you make cooking for yourself special without becoming a chore with unfussy yet utterly  
appealing meals that rely on ingredients you already have on hand, like Garam Masala Pork  
Chop with Couscous and Spinach and Weeknight Chicken Cacciatore. Don't have exactly  
the right ingredients? Never fear--with a "Kitchen Improv" box on every page, we offer

ideas for altering the dish so it works for you. And for those weeks you didn't make it to the supermarket, we use a "Pantry Recipe" icon to clearly mark recipes that rely entirely on our checklist for a well-stocked pantry. We show you when it's worth making two servings (but never more) with our "Makes Leftovers" icon, and suggest how to transform those leftovers into a whole new meal. (We love our Spice-Rubbed Flank Steak with Celery Root and Lime Yogurt Sauce served over arugula as a hearty salad the next day.) Ingredients themselves often lead you to another exciting meal--when you're left with half an eggplant from Simple Ratatouille, we direct you to Broiled Eggplant with Honey-Lemon Vinaigrette as the perfect way to use it up. And if the thought of a sink full of dishes keeps you out of the kitchen, there are plenty of appealing one-pan dinners like Sheet Pan Sausages with Sweet Potatoes, Broccoli Rabe, and Mustard-Chive Butter or Couscous with Shrimp, Cilantro, and Garlic Chips that are here to save the day.

Onesimus longs to gain his freedom and Eirene's love. However, he doesn't realize where true freedom lies. He wants nothing to do with Jesus Christ. His master, Philemon, may follow the teachings of the Christ and his apostle Paul... but Onesimus has other plans.

Statistical Language Models for Information Retrieval May 24 2022 As online information grows dramatically, search engines such as Google are playing a more and more important role in our lives. Critical to all search engines is the problem of designing an effective retrieval model that can rank documents accurately for a given query. This has been a central research problem in information retrieval for several decades. In the past ten years, a new generation of retrieval models, often referred to as statistical language models, has been successfully applied to solve many different information retrieval problems. Compared with the traditional models such as the vector space model, these new models have a more sound statistical foundation and can leverage statistical estimation to optimize retrieval parameters. They can also be more easily adapted to model non-traditional and complex retrieval problems. Empirically, they tend to achieve comparable or better performance than a traditional model with less effort on parameter tuning. This book systematically reviews the large body of literature on applying statistical language models to information retrieval with an emphasis on the underlying principles, empirically effective language models, and language models developed for non-traditional retrieval tasks. All the relevant literature has been synthesized to make it easy for a reader to digest the research progress achieved so far and see the frontier of research in this area. The book also offers practitioners an informative introduction to a set of practically useful language models that can effectively solve a variety of retrieval problems. No prior knowledge about information retrieval is required, but some basic knowledge about probability and statistics would be useful for fully digesting all the details. Table of Contents: Introduction / Overview of Information Retrieval Models / Simple Query Likelihood Retrieval Model / Complex Query Likelihood Model / Probabilistic Distance Retrieval Model / Language Models for Special Retrieval Tasks / Language Models for Latent Topic Analysis / Conclusions

*The Bios Companion* Jul 14 2021 This text describes the functions that the BIOS controls and how these relate to the hardware in a PC. It covers the CMOS and chipset set-up options found in most common modern BIOSs. It also features tables listing error codes

*Tiny Crimes* Mar 10 2021 Forty very short stories that reimagine the genre of crime writing from some of today's most imaginative and thrilling writers "An intriguing take on crime/noir writing, this collection of 40 very short stories by leading and emerging literary voices—Amelia Gray, Brian Evenson, Elizabeth Hand, Carmen Maria Machado, Benjamin Percy, Laura van den Berg and more—investigates crimes both real and imagined. Despite their diminutive size, these tales promise to pack a punch." —Chicago Tribune, 1 of 25 Hot Books for Summer *Tiny Crimes* gathers leading and emerging literary voices to tell tales of villainy and intrigue in only a few hundred words. From the most hard-boiled of noirs to the coziest of mysteries, with diminutive double crosses, miniature murders, and crimes both real and imagined, *Tiny Crimes* rounds up all the usual suspects, and some unusual suspects, too. With illustrations by Wesley Allsbrook and flash fiction by Carmen Maria Machado, Benjamin Percy, Amelia Gray, Adam Sternbergh, Yuri Herrera, Julia Elliott, Elizabeth Hand, Brian Evenson, Charles Yu, Laura van den Berg, and more, *Tiny Crimes* scours the underbelly of modern life to expose the criminal, the illegal, and the depraved.

**Programming 32-bit Microcontrollers in C** Aug 27 2022 \*Just months after the introduction of the new generation of 32-bit PIC microcontrollers, a Microchip insider and acclaimed author takes you by hand at the exploration of the PIC32 \*Includes handy checklists to help readers perform the most common programming and debugging tasks The new 32-bit microcontrollers bring the promise of more speed and more performance while offering an unprecedented level of compatibility with existing 8 and 16-bit PIC microcontrollers. In sixteen engaging chapters, using a parallel track to his previous title dedicated to 16-bit programming, the author puts all these claims to test while offering a gradual introduction to the development and debugging of embedded control applications in C. Author Lucio Di Jasio, a PIC and embedded control expert, offers unique insight into the new 32-bit architecture while developing a number of projects of growing complexity. Experienced PIC users and newcomers to the field alike will benefit from the text's many

thorough examples which demonstrate how to nimbly side-step common obstacles, solve real-world design problems efficiently and optimize code using the new PIC32 features and peripheral set. You will learn about: \*basic timing and I/O operation \*debugging methods with the MPLAB SIM \*simulator and ICD tools \*multitasking using the PIC32 interrupts \*all the new hardware peripherals \*how to control LCD displays \*experimenting with the Explorer16 board and \*the PIC32 Starter Kit \*accessing mass-storage media \*generating audio and video signals \*and more!

*Invisible* Oct 05 2020 You could say that my railroad, the Madham Line, is almost the most important thing in my life. Next to Andy Morrow, my best friend. Lots of people think Doug Hanson is a freak -- he gets beat up after school, and the girl of his dreams calls him a worm. Doug's only refuge is creating an elaborate bridge for the model railroad in his basement and hanging out with his best friend, Andy Morrow, a popular football star who could date any girl in school. Doug and Andy talk about everything -- except what happened at the Tuttle place a few years back. It does not matter to Andy that we live in completely different realities. I'm Andy's best friend. It does not matter to Andy that we hardly ever actually do anything together. As Doug retreats deeper and deeper into his own reality, long-buried secrets threaten to destroy both Doug and Andy -- and everything else in Doug's fragile world.

Code of Practice for Electric Vehicle Charging Equipment Installation Jan 28 2020 The Code of Practice for Electric Vehicle Charging Equipment Installation, 3rd Edition has been updated to align with the current requirements of BS 7671. This includes updated guidance on the electrical installation requirements of BS 7671:2018 (Section 722 Electric vehicle charging installations) to be published in July 2018. The Code of Practice provides an overview of electric vehicle charging equipment, considerations needed prior to installation, physical installation requirements, relevant electrical installation requirements of BS 7671:2018 and specific requirements when installing electric vehicle charging equipment in location's such as dwellings, on-street locations, commercial and industrial premises. Also included are useful installation checklists and risk assessment templates. Therefore this publication provided useful guidance for anyone interested in the installation of electric vehicle charging points. This is a practical guide for use by anyone planning to install electric vehicle charging equipment. It provides specific electrical installation requirements for electrical contractors as well as essential guidance for anyone planning to specify,

procure or manage the installation of such equipment.

**Sailing Made Easy** Aug 03 2020 *Sailing Made Easy* is the first step in a voyage that will last you the rest of your life. It is a gift from a group of dedicated sailing professionals who have committed their lives to sharing their art, their skill, and their passion for this wonderful activity. This book, which *Sailing Magazine* called "best in class" upon its release in 2010, is the most comprehensive education and boating safety learn-to-sail guide to date. It is also the official textbook for the ASA Basic Keelboat Standard (ASA 101). Incorporated in the textbook are useful illustrations and exceptional photographs of complex sailing concepts. The text's most distinguishing feature is its user friendly "spreads" in which instructional topics are self-contained on opposing pages throughout the book. There are also chapter end quizzes and a glossary to help those new to sailing to navigate their way through the extensive nautical terminology.

**Robotic Cardiac Surgery** Sep 16 2021 *Robotic Cardiac Surgery* is a comprehensive guide to robotic/totally endoscopic cardiac surgery. The book is intended to provide in-depth information regarding the history of robotic surgical systems, their components and principles. It emphasizes patient selection, perioperative management, anesthesia considerations and management, operative techniques and management, postoperative care and results. Extensive, detailed photographs and illustrations of different kinds of robotic surgery are also included. It provides cardiac surgeons, cardiac anesthesiologists, and perfusionists with a comprehensive review of current robotic cardiac surgeries and related knowledge. Changqing Gao, MD, is a professor at the Department of Cardiovascular Surgery, PLA General Hospital, Beijing, China.

**Korean** Nov 06 2020 *Korean: A Comprehensive Grammar* is a reference to Korean grammar, and presents a thorough overview of the language, concentrating on the real patterns of use in modern Korean. The book moves from the alphabet and pronunciation through morphology and word classes to a detailed analysis of sentence structures and semantic features such as aspect, tense, speech styles and negation. Updated and revised, this new edition includes lively descriptions of Korean grammar, taking into account the latest research in Korean linguistics. More lower-frequency grammar patterns have been added, and extra examples have been included throughout the text. The unrivalled depth and range of this updated edition of *Korean: A Comprehensive Grammar* makes it an essential reference source on the Korean language.
