Geoinformatics for Climate Change Studies Jan 20 2022 Climate change is increasingly being considered a critical topic in research and policy-making. Evidences related to climate change deal with spatial and non-spatial data, which can be utilized for policy formulation. Geoinformatics, which includes remote sensing, GIS, GPS, and ICT, provides the most relevant technology to monitor climate change-related variables at different dimensions and scales. Geoinformatics for Climate Change Studies discusses the art of using this technology for investigating, monitoring, documenting, and understanding the impacts of climate change. This book provides information on the concepts and uses of geoinformatics, and focuses on filling the gap in the available literature on the subject by bringing together concepts, theories, and experiences of experts in this field.

Remote Sensing of the Cryosphere Dec 19 2021 The cryosphere, that region of the world where water is temporarily or permanently frozen, plays a crucial role on our planet. Recent developments in remote sensing techniques, and the acquisition of new data sets, have resulted in significant advances in our understanding of all components of the cryosphere and its processes. This book, based on contributions from 40 leading experts, offers a comprehensive and authoritative overview of the methods, techniques and recent advances in applications of remote sensing of the cryosphere.

Examples of the topics covered include: • snow extent, depth, grain-size and impurities • surface and subsurface melting • glaciers • accumulation over the Greenland and Antarctica ice sheets • ice thickness and velocities • gravimetric measurements from space • sea, lake and river ice • frozen ground and permafrost • fieldwork activities • recent and future cryosphere-oriented missions and experiments All figures are in color and provide an excellent visual accompaniment to the technical and scientific aspect of the book. Readership: Senior undergraduates, Masters and PhD Students, PostDocs and Researchers in cryosphere science and remote sensing. Remote Sensing of the Cryosphere is the significant first volume in the new Cryosphere Science Series. This new series comprises volumes that are at the cutting edge of new research, or provide focussed interdisciplinary reviews of key aspects of the science.

3D Seismic Survey Design Mar 30 2020 Details the properties of 3D acquisition geometries and shows how they naturally lead to the 3D symmetric sampling approach to 3D survey design. Many examples are used to illustrate choices of acquisition parameters, and the link between survey parameters and noise suppression as well as imaging is an intrinsic part of the contents.

Algorithmic Aspects in Information and Management Jun 01 2020 While the areas of information management and management science are full of algorithmic challenges, the proliferation of data has called for the design of efficient and effective algorithms and data structures for their management and processing. The International Conference on Algorithmic Aspects in Information and Management(AAIM) is intended for original algorithmic research on immediate applications and/or fundamental problems pertinent to information management and management science to be broadly construed. The conference aims at bringing together researchers in computer science, operations research, applied mathematics, economics, and related disciplines. This volume contains papers presented at AAIM 2010: the 6th International Conference on Algorithmic Aspects in Information and Management, which was held during July 19-21, 2010, in Weihai, China. We received a total of 50 submissions. Each submission was reviewed by three members of the Program Committee or their deputies on the quality, originality, soundness, and significance of its contribution. The committee decided

to accept 31 papers. The program also included two invited keynote talks. The success of the conference resulted from the input of many people. We would like first of all to thank all the members of the Program Committee for their expert evaluation of the submissions. The local organizers in the School of Computer Science and Technology, Shandong University, did an extraordinary job, for which we are very grateful. We thank the National Natural Science Foundation of China, Montana State University (USA), University of Warwick (UK), and Shandong University (China) for their sponsorship.

American Jewish Year Book 2021 Apr 11 2021 Across three centuries, AJYB has provided insight into major trends. Part I of the current volume contains two chapters on Jewish Americans in 2020 by the Pew Research Center, including reactions from 16 prominent social scientists. Subsequent chapters analyze the development of Holocaust consciousness in America, recent domestic and international events as they affect the American Jewish community, and the demography and geography of the US, Canada, and world Jewish populations. Part II provides lists of Jewish institutions, including federations, community centers, social service agencies, national organizations, camps, museums, and Israeli consulates. The final chapters present lists of Jewish periodicals and broadcast media, Jewish Studies programs, books, journals, articles, websites, research libraries, and academic conferences and lists of major events in the past year, Jewish honorees, and obituaries. This volume employs an accessible style, making it of interest to public officials, Jewish professional and lay leaders, as well as the general public and academic researchers. For more than 120 years the American Jewish Year Book has served as an indispensable resource for scholars, clergy, and lay leaders, providing crucial, detailed insights into demographic shifts and sociological trends in the North American

Jewish community. The latest edition continues to fulfill these important needs with essential articles on the landmark Pew Report and the impact of the Holocaust in the American Jewish community and American in general. This is a must-have volume for any serious student of the contemporary Jewish world. Jeffrey Shoulson, Senior Vice Provost for Academic Affairs, Professor of Literatures, Cultures, and Languages, and English, Director Emeritus Center for Judaic Studies and Contemporary Jewish Life, University of Connecticut The American Jewish Year Book is a critical snapshot of Jews and Jewish Studies in the United States in a particular year, and a valuable resource for scholars studying the changes in Jewish communities and Jewish Studies in the United States (and beyond!) over time. The AJYB highlights major publications and data that are consistently used in research, and its scholarly essays contextualize the information in an easily readable context. The lists of important institutions and organizations are invaluable for someone interested in the broader Jewish experience (or, at the most practical, a Jewish organization in their neighborhood!). Michelle Margolis Chesner, Norman E. Alexander Librarian for Jewish Studies, Columbia University.

Recent Mammals of Alaska Jul 22 2019 From the polar bear and the gray wolf to the walrus and river otter, there are 115 species of mammals in Alaska that have never been fully catalogued until now. Biologists Joseph A. Cook and Stephen O. MacDonald have compiled here the first comprehensive guide to all of Alaska's mammals, big and small, endearing and ferocious. Through extensive fieldwork and research the authors have produced a unique and authoritative reference. Detailed entries for each species include distribution and

taxonomic information, status, habitat, and fossil history. Appendices include quick reference listings of mammal distribution by region, specimen locations, conservation status, and the incidence of Pleistocene mammals. The guide is generously illustrated with line drawings by Alaskan artist W. D. Berry and includes several maps indicating populations and locations of species. Mammals of Alaska will be an accessible, easy to use source for scholars and hobbyists alike.

[American Jewish Year Book 2020](#) Aug 15 2021 The American Jewish Year Book, which spans three different centuries, is the annual record of the North American Jewish communities and provides insight into their major trends. Part I of the current volume contains the lead article: Chapter 1, "Pastrami, Verklempt, and Tshoot-spa: Non-Jews' Use of Jewish Language in the US" by Sarah Bunin Benor. Following this chapter are three on domestic and international events, which analyze the year's events as they affect American Jewish communal and political affairs. Three chapters analyze the demography and geography of the US, Canada, and world Jewish populations. Part II provides lists of Jewish institutions, including federations, community centers, social service agencies, national organizations, synagogues, Hillels, camps, museums, and Israeli consulates. The final chapters present national and local Jewish periodicals and broadcast media; academic resources, including Jewish Studies programs, books, journals, articles, websites, and research libraries; and lists of major events in the past year, Jewish honorees, and obituaries. While written mostly by academics, this volume conveys an accessible style, making it of interest to public officials, professional and lay leaders in the Jewish community, as well as the general public and academic researchers. The American Jewish Year Book has been a key resource for social scientists exploring comparative and historical data on Jewish population patterns. No less important, the Year Book serves organization leaders and policy makers as the source for valuable data on Jewish communities and as a basis for planning. Serious evidence-based articles regularly appear in the Year Book that focus on analyses

and reviews of critical issues facing American Jews and their communities which are indispensable for scholars and community leaders. Calvin Goldscheider, Professor Emeritus of Sociology and Ungerleider Professor Emeritus of Judaic Studies, Brown University They have done it again. The American Jewish Year Book has produced

yet another edition to add to its distinguished tradition of providing facts, figures and analyses of contemporary life in North America. Its well-researched and easily accessible essays offer the most up to date scrutiny of topics and challenges of importance to American Jewish life; to the American scene of which it is a part and to world Jewry. Whether one is an academic or professional member of the Jewish

community (or just an interested reader of all things Jewish), there is not another more impressive and informative reading than the American Jewish Year Book. Debra Renee Kaufman, Professor Emerita and Matthews Distinguished University Professor, Northeastern University
