**Managing Facilities for Results** Apr 08 2021 Carving out new service areas within existing space, forgoing massive additions or expensive new buildings, offers a cost-effective solution for budget-conscious libraries. Building from the proven Results Series model, this volume dovetails with the basics outlined in *The New Planning for Results: A Streamlined Approach*. This new hands-on workbook in the Results Series guides library directors, staff, and boards through the process to Prioritize new services that need space Make plans and identify an appropriate location Present the case to funding authorities Conduct a "gap analysis" Find resources to reallocate and see what new items are needed Identify building professionals to assist with alterations It's supplemented with 23 workforms to support the information and collection process. Three toolkits provide technical assistance on calculating square footage, assessing the message, and complying with the Americans with Disabilities Act (ADA) requirements. With examples ranging from small to large small public libraries, the process is equally valuable for school, special, and academic librarians who are faced with similar space repurposing challenges. Any library can embrace these practical, proven techniques for addressing community needs -- by creating a blueprint that prioritizes services and creates the space for them within their existing facility.

**Advanced Design Cultures** May 21 2022 This book

describes new thinking and practice in Advanced Design (ADD) – design that is not merely highly developed but anticipates the future by envisioning novel products and processes. The focus is especially on the front end of innovation and the search for solutions in complex pioneering processes using design-related tools and practices. The book opens by describing these tools, the approaches that characterize ADD and its historical dimension. Specific fields in which ADD has flourished are then examined, exploring the dynamics between research and design. The coverage ranges from transportation, lighting and electrical appliances through to business networks, technology parks and the development of ground-breaking materials. Advance Design is the name of the research group at the Politecnico di Milano (Italy’s largest technical university) of which the authors are members. It was chosen to reflect both the “advanced”, tangible dimension of design in terms of modern product development, materials and technologies and an orientation toward radical innovation through user involvement and imagination.
