Poverty Dec 09 2020 Poverty has dire consequences on the ability to fulfil one's aspirations for life. Poverty has strong implications for social cohesion and societies' abilities to function in harmonious ways. This book presents the readers with the core concepts, latest development and knowledge about policies that work to eliminate absolute poverty. This volume shows what the consequences are for the quality of life of those living in poverty. It describes life for people in poverty in general, but also deals more specifically with children, in-work poverty and the elderly, thus providing a life, generational and global perspective on poverty, including the impact on people's happiness levels. The book also discusses policies aimed at poverty reduction, such as changes to the labour market – including the risk of working poor – and shows that there is a variety of possible instruments available to reduce poverty. These range from direct provision of social security to ensuring education and a better functioning labour market. Written in an engaging and accessible style, the book provides a succinct insight into the concept of poverty, how to measure it, the situation of poverty around the globe as well as different types of possible interventions to cope with poverty. Supporting theory with examples and case studies from a variety of contexts, suggestions for further reading, and a detailed glossary, this text is an essential read for anyone approaching the study of poverty for the first time.

Avian Nutrition Jan 10 2021 The scope of book has relevant and important informations on some of the popular tamed birds reared as pet in cages. Among these Parrots and Mayana are companion species capable of learning and limited conversation with members of the house. Bulbul, partridges and pigeon are used for sports. Owners of these birds expect guidance for care and management from the experts of poultry science because so far there appears to be no school on the management of such avian species. Incorporation of these avian species in the book is expected to enrich the knowledge of students and teachers of the Avian and Poultry Science. Note: T& F does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.

Missing Data in Longitudinal Studies Aug 17 2021 Drawing from the authors' own work and from the most recent developments in the field, *Missing Data in Longitudinal Studies: Strategies for Bayesian Modeling and Sensitivity Analysis* describes a comprehensive Bayesian approach for drawing inference from incomplete data in longitudinal studies. To illustrate these methods, the authors employ several data sets throughout that cover a range of study designs, variable types, and missing data issues. The book first reviews modern approaches to formulate and interpret regression models for longitudinal data. It then discusses key ideas in Bayesian inference, including specifying prior distributions, computing posterior distribution, and assessing model fit. The book carefully describes the assumptions needed to make inferences about a full-data distribution from incompletely observed data. For settings with ignorable dropout, it emphasizes the importance of covariance models for inference about the mean while for nonignorable dropout, the book studies a variety of models in detail. It concludes with three case studies that highlight important features of the Bayesian approach for handling nonignorable missingness. With suggestions for further reading at the end of most chapters as well as many applications to the health sciences, this resource offers a unified Bayesian approach to handle missing data in longitudinal studies.

Communication of Love May 14 2021 By the end of the twentieth century certain new media had established themselves which have profoundly changed communication among lovers. SMS and email in particular have created new relational forms and forms of intimacy. From declarations of love on talk shows to televised dating games and marriage quiz shows, television offers a panoply of wildly popular theatrical communications of love. Does the neglecting of traditional communication media, such as love letters and the telephone, cause the intermingling of intimacy with the public sphere and hence the abrogation of it? From the disciplines of sociology, history, cultural and media studies and linguistics, this book offers answers to this question by analyzing and discussing new media from various perspectives. Contributions by Eva Illouz, Joachim R. Höflich, Friedrich Krotz, Helga Kotthoff, Karl Lenz, Sabine Maasen, and others.

Long Fuse, Big Bang Jun 14 2021 "If I had asked people what they wanted, they would have said faster horses." --Henry Ford As one part of your brain processes these words, another part of your brain is urging you to put the book down and focus on something more pressing. Get back to work on the budget due tomorrow. Answer e-mails growing stale in your inbox. Get off your rear and update that résumé. We're all guilty of it, especially in the business world. From Fortune 500 CEOs to assistants, we work to solve the most urgent problems first. That's because evolution has hardwired our brains to focus only on the immediate future, a survival technique that worked extremely well when predators were lurking at every turn. But that was then, this is now. In the modern world, where life expectancies are long and physical perils rare (at least for people who buy books), it's not only possible to build a strong tomorrow without sacrificing today, but to actually increase the number of here-and-now victories by pursuing distant wins. That's where Long Fuse, Big Bang comes in--to help you work with that instinct to create and foster ideas that will lead to explosive professional results. Through proven case studies and personal experience, Dr. Eric Haseltine shows you how to neutralize the quick-fix way of thinking and actually use that desire to improve your chances of an enduring success. Rather than fight our most basic thought processes, this book will teach you how to work with your brain to light the long fuse, keep it smoldering, and ignite that "Big Bang" that will make history.
