[Open Borders](#) Apr 04 2020 An Economist [Our Books of the Year] Selection Economist Bryan Caplan makes a bold case for unrestricted immigration in this fact-filled graphic nonfiction. American policy-makers have long been locked in a heated battle over whether, how many, and what kind of immigrants to allow to live and work in the country. Those in favor of welcoming more immigrants often cite humanitarian reasons, while those in favor of more restrictive laws argue the need to protect native citizens. But economist Bryan Caplan adds a new, compelling perspective to the immigration debate: He argues that opening all borders could eliminate absolute poverty worldwide and usher in a booming worldwide economy!greatly benefiting humanity. With a clear and conversational tone, exhaustive research, and vibrant illustrations by Zach Weinersmith, [Open Borders](#) makes the case for unrestricted immigration easy to follow and hard to deny.

[Borders and Mobility Control in and between Empires and Nation-States](#) Aug 21 2021 The 11 contributions in this volume explore the role of early modern and modern dynastic kingdoms and empires in Europe, the Middle East and Eurasia the evolution of border controls from the 16th to the 20th century.

[Crossing Borders](#) Sep 29 2019 Robert C. Holub critically investigates the histories of reception theory, poststructuralism, and deconstruction in postwar Germany and the United States. He looks at how imported theories assume a place in the political discourse of a country, and how indigenous intellectual traditions and prejudices affect, modify, or even distort foreign theories. Holub addresses many timely questions: Why did reception theory, so prominent in Germany in the 1960s and 1970s, fail to have an impact on American academics until the 1980s? Why did poststructuralism, and specifically the writings of Michel Foucault, fail to find a home in German academia while becoming an important theoretical voice in the United States? How did deconstruction, originally considered by American scholars as merely a sophisticated tool for analysis, get taken up by leftists who argued for an affinity between the critique of language and the critique of capitalism? And finally, how have American intellectuals responded to revelations of fascism in the pasts of Paul de Man and Martin Heidegger? [Crossing Borders](#) effectively demonstrates the extent to which theoretical work needs to be understood in cultural, intellectual, and institutional contexts. Holub argues that the praxis of theories is determined not only by their content and style, but also by the environment in which they must function. The success of a transplanted theory, he contends, is due less to its inherent merits than to the hospitality of the environment on to which it is grafted. -- Publisher's website.

[Intellectual Property Ordering Beyond Borders](#) Dec 01 2019 During the past century, intellectual property (IP) law has expanded within and beyond national borders. The field of IP law was once a niche area concerning authors, inventors, and trademark owners. Today, IP law acts as a complex regime of instruments, institutions, and actors that negotiate overlapping, diverging, and occasionally competing public policies on a global scale. As IP continues to expand beyond borders, the instruments and tools utilised for its global protection rely on public international law as the common denominator and unifying frame. [Intellectual Property Ordering Beyond Borders](#) provides an evaluation of the most pertinent public international law questions raised by this multidimensional expansion. This comprehensive and far-reaching volume tackles problems such as generalist approaches under the law of treaties; custom and general principles; interfaces between IP and other normative orders, such as trade and investment; and interdisciplinary accounts from the economic, political, and social science perspectives. This title is also available as open access on Cambridge Core.

[Citizens and borderwork in contemporary Europe](#) Jul 28 2019 The extent to which ordinary people can construct, shift, and dismantle borders is seriously neglected in the existing literature. The book explores the ability of citizens to participate in the making of borders, and the empowerment that can result from this bordering and debordering activity.

[Borderwork] is the name given to the ways in which ordinary people can make and unmake borders. Borderwork is no longer only the business of nation-states, it is also the business of citizens (and indeed non-citizens). This study of [borderwork] extends the recent interest in forms of bordering which do not necessarily occur at the state's external borders. However, the changing nature of borders cannot be reduced to a shift from the edges to the interior of a polity. To date little research has been conducted on the role of ordinary people in envisioning, constructing, maintaining, shifting, and erasing borders; creating borders which facilitate mobility for some while creating barriers to mobility for others; appropriating the political resources which bordering offers; contesting the legitimacy of or undermining the borders imposed by others. This book makes an original contribution to the literature and stands to set the agenda for a new dimension of border studies. This book was published as a special issue of *Space and Polity*.

Paper on specific case study of Latvia (EU)/Russia border Jul 20 2021 Seminar paper from the year 2007 in the subject Politics - International Politics - Topic: European Union, grade: A-, Sciences Po Paris, Dijon, Nancy, Poitiers, Menton, Havre (L'Institut d'Etudes Politiques de Lille), course: Borders, Borderlands, and Security, language: English, abstract: Paper addresses the transformation of the agenda of border security relating to Latvia-Russia border. There are discussed following problems in paper: Ø the relevance of signed treaty between Latvia and Russia; Ø the investment in Latvia/Russia border; Ø the effectiveness of cross-border cooperation; Ø problems with which Latvia-Russia border is dealing (increased number of cargos waiting for crossing Latvia/Russia border, smuggling, persons crossing border with fictitious documents, illegal border crossers and illegal immigrants). This paper focuses on what comes in through the border, and not so much on what goes out except problem of long truck lines. This paper also focuses on the investment and problems which affected Latvia's side not Russia's. Definition of Borders and Security Boundary - a demarcation indicating some division in spatial terms. Border is an international boundary line; when a border is seen as a zone it is often called a borderland or the borderlands. Frontier - a zone of contact with or without a specified boundary line. As L.Heininen and H.N.Nicol have emphasized "security" is a broad concept, there are many ideas about the meaning of security and what should, or should not, be a "security" issue, therefore there are many different understandings and ways to define and conceptualize security. Security in this paper is understood as direct intervention to prevent threats and interdict dangerous people and goods at the Latvia/Russia border. Function of the Conceptual Framework Author, as E.Brunet-Jailly in Borderlands: Comparing Border Security in North America and the European Union, in this paper tried, first, to discuss the relevance of agents on borders, second, to examine the porosity of border, and third, to suggest new policy guidelines to government and agents that might strengthen border security objectives.

Post-Soviet Borders Jun 06 2020 This book investigates how borders in former Soviet Union territories have evolved and shifted in the thirty years since the end of the Cold War. The collapse of the Soviet Union in 1991 led to fifteen independent states and numerous de facto states; but this process of rebordering is not finished, and social, economic, infrastructural, cultural and political networks and spaces continue to develop. This book explores the intersection between these geopolitical shifts and the individual lived experience, drawing on cases from across border regions in the Caucasus, Central Asia and Eastern Europe. Throughout, the book introduces and frames the case studies with well-informed theoretical, conceptual and methodological overviews that situate them within border studies in general and post-Soviet border spaces in particular. Overall, the book demonstrates that like a kaleidoscope, the dynamic elements in these newly evolved border regions are similar yet strikingly different in their juxtapositions, with the appearance of new configurations often dependent on changing geopolitical constellations. This timely guide to the post-Soviet world thirty years after the Cold War will be of interest to researchers across border studies, politics, geography, social anthropology, history, Eastern European Studies, Central Asian Studies, and Caucasian Studies.

Neighbourhood Policy and the Construction of the European External Borders Mar 16 2021 This book looks both backward and forward with regard to the European Union's political strategies towards its neighbouring countries. By bringing together the perspectives of critical geopolitics, policy studies and border studies, it presents a comprehensive review of the European Neighbourhood Policy and how it impacts the ongoing construction of the EU's external frontiers. Is the EU committed to promoting integration in a "wider" European space, or is a "fortress Europe" emerging where the strengthening of internal cohesion is coupled with the militarisation of its external borders? The book aims to problematize this question by showing how the EU's external policies are based on a mixture of openness and closure, inclusion and exclusion, cooperation and securitisation. The European Neighbourhood Policy is a controversial strategy where regionalization and bordering, homogenisations and differentiations, centrifugal and centripetal forces proceed side-by-side, in an explicit attempt to construct a selective, mobile and fragmented border. A specific focus is devoted to the diversity of geo-strategies the EU is pursuing in its neighbouring countries and regions, macro-regional strategies and cross-border cooperation initiatives as new scales of cooperation, and the role of other global players.

Bankers Without Borders? Implications of Ring-Fencing for European Cross-Border Banks Jul 08 2020 This paper presents a stylized analysis of the effects of ring-fencing (i.e., different restrictions on cross-border transfers of excess profits and/or capital between a parent bank and its subsidiaries located in different jurisdictions) on cross-border banks. Using a sample of 25 large European banking groups with subsidiaries in Central, Eastern and Southern Europe (CESE), we analyze the impact of a CESE credit shock on the capital buffers needed by the sample banking groups under different forms of ring-fencing. Our simulations show that under stricter forms of ring-fencing, sample banking groups have substantially larger needs for capital buffers at the parent and/or subsidiary level than under less strict (or in the absence of any) ring-fencing.

Beyond Borders: The New Regionalism in Latin America Oct 11 2020 Although regional integration initiatives have a long history in the world economy, these efforts have expanded significantly since the 1990s. In Latin America and the Caribbean, a wave of regional integration initiatives has included free trade areas, customs unions, and steps towards common markets. The emergence of this "new regionalism" of trade in which global and regional forces complement one another has been driven by such factors as the opening up of economies and structural reforms. This year's edition of Economic and Social Progress in Latin America explores the dimensions of integration, macroeconomic coordination, and the effects of regional integration on productivity, market access, foreign direct investment, infrastructure and income inequality. Topics include subregional integration schemes, the multilateral trade agenda launched in Doha, initiatives such as the Free Trade Area of the Americas, and interregional agreements with the European Union.

The Politics of Borders Feb 01 2020 Borders are changing in response to terrorism and immigration. This book shows why this matters, especially for sovereignty, individual liberty, and citizenship.

Border Management Modernization Mar 04 2020 Border clearance processes by customs and other agencies are among the most important and problematic links in the global supply chain. Delays and costs at the border undermine a country's competitiveness, either by taxing imported inputs with deadweight inefficiencies or by adding costs and reducing the competitiveness of exports. This book provides a practical guide to assist policy makers, administrators, and border management professionals with information and advice on how to improve border management systems, procedures, and institutions.

On the Borders of Convention May 18 2021 The research presented in this book is authored by scholars coming from as distant regions as South Africa, the United States of America, Great Britain, France, Italy, Belarus, the Balkans. Needless to say that one of the good things about this international cooperation is that owing to their different socio-cultural backgrounds, these scholars have contributed to producing an extremely varied picture of ways of approaching the challenge of a changing world. The papers on literature and culture collected in this book contribute a further element of rigour into the discussion of numerous and always varying and changing borders of convention in a literary text, literary genre, and literary theory, as well as in general culture and everyday paths of life. Starting with oral cultures, over the classic literary masters, modernist and postmodernist textual and theoretical phenomena, the twentieth century flouting of numerous social and gender convention, through painting, film, dance, contemporary music, as well as graffiti. We have sought to stress that what is most noticeable from the evidence of their studies is that scholars today concern these issues through a dynamic global process and beyond any preconceived design, or any strict set of theoretical prescriptions, which would otherwise lead them to ignore the ever-shifting borders in literature and culture, as well as in global socio-cultural reality in general. The variety and complexity of these essays offer fresh views to the problem posed in the title of the book. Therefore, we trust that they will stimulate intellectual confrontation and circulation of ideas within the field of literature and cultural studies.

Heritage Tourism Beyond Borders and Civilizations Sep 09 2020 This book gathers the best papers presented at the 11th Tourism Outlook Conference, held in Eskişehir, Turkey, from 3 to 5 October 2018. Covering various aspects of heritage and its effects on tourism issues, the contributions provide a multidisciplinary perspective on emerging issues and challenges in the area. The book also analyzes both the tangible and intangible properties of natural, cultural, and historical heritage and how these relate to and influence tourism, and evaluates the importance and role of heritage in tourism destinations and products. By providing a platform for cross-disciplinary dialogues that integrate research and insights

from diverse geographical, sectoral and institutional perspectives, the book allows readers to gain a better understanding of heritage tourism.

Migrants, Borders and Global Capitalism Oct 30 2019 People from West Africa are risking their lives and surrendering their citizenship rights to enter exploitative labour markets in Europe. This book offers an explanation for this phenomenon that is based on close analysis of the contradictory economic and political agendas that create and constrain labour migration. It shows how global capitalism regulates different stages of the process within an interconnected system of economic dispossession, the construction of an illegal status, border control, labour exploitation and processes of underdevelopment. This is summarised as a regime of [un]free labour mobility. Combined with structural and historical approaches, this book is based on ethnographic research. It incorporates those who are left behind, those who decide to stay, migrants who fail and those who are on the move, alongside clustered migrant communities in Senegal, Mauritania and Spain. The book's panoramic approach shows how West African [step-wise] journeys to Europe by land and sea sees competing territorial and economic policies regulating an unstable and unpredictable trajectory, creating [illegal] labour through dual logics of border security and selective labour mobility. This book demonstrates that the diverse channels through which people migrate in the modern era are mediated by European states and labour markets, which utilise border regimes to control labour and be globally competitive. The themes and patterns that emerge, in their context of inter-generational change, present a challenge to the accepted wisdom about the individual and household dynamics of labour migration. This book is of interest to students and scholars of migration, transnationalism, politics, security, development, economics, and sociology.

Communities Across Borders Jan 14 2021 Communities across Borders examines the many ways in which national, ethnic or religious groups, professions, businesses and cultures are becoming increasingly tangled together. It shows how this entanglement is the result of the vast flows of people, meanings, goods and money that now migrate between countries and world regions. Now the effectiveness and significance of electronic technologies for interpersonal communication (including cyber-communities and the interconnectedness of the global world economy) simultaneously empowers even the poorest people to forge effective cultures stretching national borders, and compels many to do so to escape injustice and deprivation.

EU Borders and Shifting Internal Security Aug 28 2019 This edited volume analyzes recent key developments in EU border management. In light of the refugee crises in the Mediterranean and the responses on the part of EU member states, this volume presents an in-depth reflection on European border practices and their political, social and economic consequences. Approaching borders as concepts in flux, the authors identify three main trends: the rise of security technologies such as the EUROSUR system, the continued externalization of EU security governance such as border mission training in third states, and the unfolding dynamics of accountability. The contributions show that internal security cooperation in Europe is far from consolidated, since both political oversight mechanisms and the definition of borders remain in flux. This edited volume makes a timely and interdisciplinary contribution to the ongoing academic and political debate on the future of open borders and legitimate security governance in Europe. It offers a valuable resource for scholars in the fields of international security and migration studies, as well as for practitioners dealing with border management mechanisms.

Reapproaching Borders Aug 09 2020 Territorial borders, identity borders, and many other kinds of social and cultural borders are constantly questioned in Israel-Palestine. Reapproaching Borders: New Perspectives on the Study of Israel-Palestine explores the concept of borders, how they are imagined and actualized in this deeply contested land. The book focuses on the 'implicate relations' between Palestinian Arabs and Jews, providing new insights into the origins and dynamics of the conflicts between them. Emphasizing the history of the non-elite members of both communities, the book sees the relations between Jews and Palestinian Arabs as embedded and reflected in areas of daily living, such as in the spheres of architecture, commerce, health sexuality, and the courts. Using the voices of the new generation of scholars, Reapproaching Borders demonstrates the continued saliency of older themes such as ownership and rights to the land, but as they intersect with the newer areas of inquiry, such as sexual identity politics and spatial relations.

Surrealism Beyond Borders May 30 2022 Surrealism Beyond Borders challenges conventional narratives of a revolutionary artistic, literary, and philosophical movement. Tracing Surrealism's influence and legacy from the 1920s to the late 1970s in places as geographically diverse as Colombia, Czechoslovakia, Egypt, Japan, Korea, Mexico, the Philippines, Romania, Syria, Thailand, and Turkey, this publication includes more than 300 works of art in a variety of media by well-known figures including Dalí, Ernst, Kahlo, Magritte, and Miró as well as numerous artists who are less widely known. Contributions from more than forty distinguished international scholars explore the network of Surrealist exchange and collaboration, artists' responses to the challenges of social and political unrest, and the experience of displacement and exile in the twentieth century. The multiple narratives addressed in this expansive book move beyond the borders of history, geography, and nationality to provocatively redraw the map of Surrealism.
