Indie Science Fiction Cinema Today Jun 25 2022 Much of 20th century science fiction foretold technological and social developments beyond the year 2000. Since then, a key theme has been: what happens when the future no one anticipated arrives faster than anyone expected? Focusing on 21st century independent science fiction films, the author describes a seismic shift in subject matter as society moves into a new technological age. Independent films since the millennium are more daring, incisive and even plausible in their depiction of possible futures than blockbuster films of the same period. Shirley Jackson, Influences and Confluences Dec 27 2019 The popularity of such widely known works as "The Lottery" and The Haunting of Hill House has tended to obscure the extent of Shirley Jackson's literary output, which includes six novels, a prodigious number of short stories, and two volumes of domestic sketches. Organized around the themes of influence and intertextuality, this collection places Jackson firmly within the literary cohort of the 1950s. The contributors investigate the work that informed her own fiction and discuss how Jackson inspired writers of literature and film. The collection begins with essays that tease out what Jackson's writing owes to the

weird tale, detective fiction, the supernatural tradition, and folklore, among other influences. The focus then shifts to Jackson's place in American literature and the impact of her work on women's writing, campus literature, and the graphic novelist Alison Bechdel. The final two essays examine adaptations of *The Haunting of Hill House* and Jackson's influence on contemporary American horror cinema. Taken together, the essays offer convincing evidence that half a century following her death, readers and writers alike are still finding value in Jackson's words.

Space Exploration on Film Nov 06 2020 Over the course of several decades, scientific fact has overtaken science fiction as humankind's understanding of the universe has expanded. Mirroring this development, the cinematic depictions of space exploration over the last century have evolved from whimsical sci-fi fantasies to more fact-based portrayals. This book chronologically examines 75 films that depict voyages into outer space and offers the historical, cultural, and scientific context of each. These films range from Georges Melies' fantastical *A Trip to the Moon* to speculative science fiction works such as *2001: A Space Odyssey*, *Solaris*, and *Contact*, and fact-based accounts of actual space missions as depicted in *The Right Stuff*, *Apollo 13*, *Salyut 7* and *First Man*. Each film is analyzed not only in terms of its direction, screenplay, and other

cinematic aspects but also its scientific and historical accuracy. The works of acclaimed directors, including Fritz Lang, George Pal, Stanley Kubrick, Andrei Tarkovsky, Robert Wise, Ron Howard, Robert Zemeckis, Ridley Scott, and Christopher Nolan, are accorded special attention for their memorable contributions to this vital and evolving subgenre of science fiction film.

The Forbidden Body Aug 23 2019 "Throughout history, the religious imagination has attempted to control nothing so much as our bodies: what they are and what they mean; what we do with them, with whom, and under what circumstances; how they may be displayed-or, more commonly, how they must be hidden. Religious belief and mandate affect how our bodies are used in ritual practice, as well as how we use them to identify and marginalize threatening religious Others. This book examines how horror culture treats religious bodies that have stepped (or been pushed) out of their 'proper' place. Unlike most books on religion and horror, This book explores the dark spaces where sex, sexual representation, and the sexual body come together with religious belief and scary stories. Because these intersections of sex, horror, and the religious imagination force us to question the nature of consensus reality, supernatural horror, especially as it concerns the body, often shows us the religious imagination at work in real time. It is important to note that the discussion in this book is not limited either to horror cinema or to popular fiction, but considers a wide range of material, including literary horror, weird fiction, graphic storytelling, visual arts, participative culture, and aspects of real-world religious fear. It is less concerned with horror as a genre (which is mainly a function of marketing) and more with the horror mode, a way of storytelling that finds expression across a number of genres, a variety of media, and even blurs the boundary between fiction and non-fiction. This expanded focus not only deepens the pool of potential examples, but invites a much broader readership in for a swim"--
