**Two-Week Wait** Apr 14 2021 An original graphic novel based on the IVF stories of its husband-and-wife authors and the 1-in-50 couples around the world like them. Conrad and Joanne met in their final year of university and have been virtually inseparable since then. For a while, it felt like they had all the time in the world. Yet now, when they are finally ready to have kids, they find that getting pregnant isn't always so easy. Ahead of them lies a difficult, expensive, and emotional journey into the world of assisted fertility, where each 'successful' implantation is followed by a two-week wait to see if the pregnancy takes. Join Joanne and Conrad, their friends, their family, their coworkers, and a stream of expert medical practitioners as they experience the highs and the lows, the tears and the laughter in this sensitive but unflinching portrayal of the hope and heartbreak offered to so many by modern medicine.

**Refrigeration, Air Conditioning and Heat Pumps** Oct 01 2022 Refrigeration, air conditioning, and heat pumps (RACHP) have an important impact on the final energy uses of many sectors of modern society, such as residential, commercial, industrial, transport, and automotive. Moreover, RACHP also have an important environmental impact due to the working fluids that deplete the stratospheric ozone layer, which are being phased out according to the Montreal Protocol (1989). Last, but not least, high global warming potential (GWP), working fluids (directly), and energy consumption (indirectly) are responsible for a non-negligible quota of greenhouse gas (GHG) emissions in the atmosphere, thus impacting climate change.

**International Commercial Disputes** Apr 26 2022 This is the fourth edition of this highly regarded work on the law of international commercial litigation as practised in the English courts. As such it is primarily concerned with how commercial disputes which have connections with more than one country are dealt with by the English courts. Much of the law which provides the framework for the resolution of such disputes is derived from international instruments, including recent Conventions and Regulations which have significantly re-shaped the law in the European Union. The scope and impact of these European instruments is fully explained and assessed in this new edition. The work is organised in four parts. The first part considers the jurisdiction of the English courts and the recognition and enforcement in England of judgments granted by the courts of other countries. This part of the work, which involves analysis of both the Brussels I Regulation and the so-called traditional rules, includes chapters dealing with jurisdiction in personam and in rem, anti-suit injunctions and provisional measures. The work's second part focuses on the rules which determine whether English law or the law of another country is applicable to a given situation. The part includes a discussion of choice of law in contract and tort, with particular attention being devoted to the recent Rome I and Rome II Regulations. The third part of the work includes three new chapters on international aspects of insolvency (in particular, under the EC Insolvency Regulation) and the final part focuses on an analysis of legal aspects of international commercial arbitration. In particular, this part examines: the powers of the English courts to support or supervise an arbitration; the effect of an arbitration agreement on the jurisdiction of the English courts; the law which governs an arbitration agreement and the parties' dispute; and the recognition and enforcement of foreign arbitration awards.

**Chemical Triggering** Jul 18 2021 Chemical reactions which can, on demand, be switched on and off are valuable for industrial applications. In order to make the best use of these reactions, it is essential to have them readily available for a research chemist. The chemical literature, in general, has not yet identified or grouped such reactions. However, their existence is relatively abundant. This book is meant as a survey of those reactions which have potential utility in industrially useful processes. These reactions are grouped under the title of chemical release reactions which can be triggered by heat, light, electric current, etc., to release a specific compound from, or change in the physical or chemical properties of, a unimolecular reactant. The book is divided into chapters covering ways to trigger the release of certain chemicals. Each chapter is further divided into sections, each beginning with a brief introduction of analogies of the discussed reactions and of how they were used in reported industrial processes. This survey is not meant to be absolute or exhaustive but rather to be directive, to be as complete as possible, and to provide food for further thought.

**2015 International Mechanical Code Commentary** Dec 23 2021 Unlike any other book on the market, the 2015 INTERNATIONAL MECHANICAL CODE COMMENTARY is a powerhouse of features: a renowned author team, the entire text and tables from the 2015 International Mechanical Code (IMC), and valuable commentaries that put its technical requirements into a real-world context. Section by section, the book guides readers through the 2015 IMC, presenting clear, detailed explanations that expand on its regulations along the way. These commentaries examine the code's implications and methods of application, as well as the potential consequences that may arise when not followed. With a focus on the effective design and installation of mechanical systems, coverage includes ventilation, exhaust systems, duct systems, hydronic heating, and more. When it comes to the 2015 IMC, there simply isn't a better resource and reference guide available, and you won't be in the field without it.

**Cliff Richard** Dec 31 2019 Cliff Richard has been Britain's longest surviving and most consistent hit music maker. Starting his career as a rock 'n' roll threat to decent, upstanding citizens, he is now a friend to Royalty and prime ministers, a Knight, and a holder of the OBE. This book tells his story chronologically, through the voices of his friends, family, and colleagues including songwriters, film directors, managers, and agents—like listening in on a dinner party attended by most of the key people in his career. The stories reveal Cliff as seen by those closest to him and, in contrast to the many official publications, this book does not just include the flattering stories. The author's probing questions have elicited extraordinary memories and observations, previously unheard by the public. Heavily illustrated with rare and interesting photographs of Cliff at work and play, this unique oral

history will stand as a lasting testament to one of the most glorious careers in British show business.

*Tackling Bullying in Your School* Jan 12 2021 This comprehensive collection of essays provides a series of highly practical guidelines which schools can implement themselves. Step-by-step advice is given on developing a whole-school policy which is generally seen as the essential nucleus of effective action. The book also suggests methods for tackling bullying through classroom and curriculum activities, including video, drama, and the use of quality circles and of working with pupils involved in bullying situations. Emphasis is placed on assertiveness training for pupils who may be bullied, and non-punitive work with pupils who bully others. As the majority of bullying takes place in playgrounds, the book includes innovative sections on training lunchtime supervisors, enhancing playground activities, and improving the playground environment.

**2002 Report of the Methyl Bromide Technical Options Committee** Mar 02 2020 The Methyl Bromide Technical Options Committee (MBTOC) was established by parties to the Montreal Protocol on Substances that Deplete the Ozone Layer to identify existing and potential alternatives to methyl bromide (MB). This 2002 Assessment reports on MB usage, the quantities produced and consumed, and existing and potential alternate treatments for its use as a fumigant.

*Food Engineering 2000* Jun 04 2020 The technical papers included in this book are based on the presentations made by the invited speakers of First Thero-American Conference on Food Engineering that was held at Universidade Estadual de Campinas, Sao Paulo, Brazil, from November 5-9,1995. This well attended meeting was organized to present recent advances and provide an adequate forum for developing a vision for future directions in food engineering education and research. In addition to the invited oral presentations, there were more than 300 volunteered contributions, most of these volunteered publications were published separately by the Valencia Polytechnic University. The first chapter of Food Engineering 2000, authored by Dr. Marcus Karel, deals with the history and future of food engineering. The following chapters, authored by an outstanding group of food engineers, focus on five major areas of current interest: physical properties of foods, new food processing technologies, modeling of food processing operations, food packaging, and food engineering education. The excellent quality of the Conference is clearly reflected in the articles included in this book. Some of them present the latest developments in a given field, while others effectively summarize the work done during the last few years.

EU Private International Law Mar 26 2022 This thoroughly revised and updated second edition analyses in detail the current development of private international law at European Union level. Peter Stone examines the provisions of, and the case-law on, measures such as the Brussels I Regulation on civil jurisdiction and judgments; the Rome I and II Regulations on the law applicable to contractual and non-contractual obligations; the Brussels IIA Regulation on matrimonial proceedings and parental responsibility; Regulation 4/2009 on maintenance; and Regulation 1346/2000 on insolvency proceedings. The author welcomes, in principle, the movement towards European harmonisation in the sphere of private international law, but has misgivings over various aspects of the current legislation and case-law. Given the considerable development in this area of law since the first edition, law academics, law students, and legal practitioners interested in international litigation in matters governed by private law will warmly welcome this new book.

**I Loved a Rogue** Dec 11 2020 In the third in Katharine Ashe's Prince Catchers series, the eldest of three very different sisters must fulfill a prophecy to discover their birthright. But if Eleanor is destined to marry a prince, why can't she resist the scoundrel who seduced her? She can pour tea, manage a household, and sew a modest gown. In short, Eleanor Caulfield is the perfect vicar's daughter. Yet there was a time when she'd risked everything for a black-eyed gypsy who left her brokenhearted. Now he stands before her—dark, virile, and ready to escort her on a journey to find the truth about her heritage. Leaving eleven years ago should have given Taliesin freedom. Instead he's returned to Eleanor, determined to have her all to himself, tempting her with kisses and promising her a passion she's so long denied herself. But if he was infatuated before, he's utterly unprepared for what will happen when Eleanor decides to abandon convention—and truly live . . .

European Private International Law Oct 28 2019 As one of the most definitive texts on the market, European Private International Law provides an essential guide for both students and practitioners to the complex field of international litigation within the EU. The private international law of the Member States is increasingly regulated by European law, making private international law ever less 'national' and ever more EU based. Consequentially EU law in this area has penetrated national law to a very high degree, making it an essential area of study and an area of increasing importance to practising lawyers. This book provides a thorough overview of core European private international law, including the Brussels I, Rome I and Rome II Regulations (jurisdiction, applicable law for contracts and tort), while additional chapters deal with the recently adopted Succession Regulation, private international law and insolvency, freedom of establishment, and the impact of PIL on corporate social responsibility. From the reviews of the first edition 'As a result of his broad knowledge on the subject and rich professional experience, Mr van Calster provides great insight into current issues within international law. The book is practical as both a student textbook and a general introduction for legal professionals'. Vladimir Cupryszak, Association for International Arbitration 'Excellent overview of European Private International Law issues, as well as a very helpful introduction to basic concepts of conflicts of laws and jurisdictions'. Professor Stavros Brekoulakis, Queen Mary University of London 'This is a most useful book. I recommend it to my students as a great way to come to terms with the EU elements of Private International Law'. Dr David Kenny, Trinity College Dublin 'This book is essential reading for law students in Europe and abroad. It provides a coherent overview of all main elements of European private international law; concepts, legal instruments and practice'. Professor Kim Talus, UEF Law School, Finland 'Well-written, clear and understandable. Excellent value for money'. Dr Jan Oster, King's College London, UK

Welcome Home Vietnam Oct 09 2020 Death is often welcome for soldiers who returned from Vietnam because it appears to be the only means of peace within. Knowing that each day could, and in all probability, will be his last, the soldier's thought process becomes distorted and his animalistic instincts take over and allow for total abandonment of inhibitions. These soldiers answered the nation's call and they paid the price for the freedoms we as a nation hold dear. They are also the ones who continue to pay the price for the combat experience and that part of us that died in country. These

men suffer from PTSD, Post Traumatic Stress Disorder, and this is their story.

**The Irrigation Sector** Aug 19 2021 India's irrigated agriculture sector has been basic to India's economic development and poverty alleviation. One of India's major achievements is its rapid expansion of irrigation and drainage infrastructure. However, the major emphasis on development has been achieved at a cost. The importance put on new construction has diverted attention away from the need to ensure the quality, productivity, and sustainability of the services. Further, a governmental subsidy based approach has been used and this has resulted in irrigation and drainage services which, while enabling significantly higher productivity than from non-irrigated lands, are well below their potential. 'The Irrigation Sector' discusses directions for future growth, the framework for reform, and the reform agenda.

**Ecoviolence** Apr 02 2020 Ecoviolence explores links between environmental scarcities of key renewable resources\_such as cropland, fresh water, and forests\_and violent rebellions, insurgencies, and ethnic clashes in developing countries. Detailed contemporary studies of civil violence in Chiapas, Gaza, South Africa, Pakistan, and Rwanda show how environmental scarcity has played a limited to significant role in causing social instability in each of these contexts. Drawing upon theory and key findings from the case studies, the authors suggest that environmental scarcity will worsen in many poor countries in coming decades and will become an increasingly important cause of major civil violence.

**The Occult Anatomy of Man** Jul 30 2022 First published in 1929, this is a study of the occult aspects of human physiology by Manly Palmer Hall (1901-1990), a Canadian-born occultist, mystic and author best known for his book, *The Secret Teaching of All Ages*, published one year earlier. In *The Occult Anatomy of Man*, Hall has gathered together a world-renowned collection of books and manuscripts on alchemy, mysticism, and the occult, which became part of the library of an organisation the Philosophical Research Society, which he founded in 1934. Manly Palmer Hall was the author of over a hundred books and pamphlets on the esoteric subjects.

**Ibero-American Bioethics** Aug 26 2019 This book is the first in a series of planned volumes focused on preserving the character of the development of bioethics in particular cultural contexts. As the first of these volumes, Leo Pessini, Christian de Paul de Barchifontaine, and Fernando Lolas Stepke's work has succeeded well. It has brought together accounts by scholars who were crucial to the emergence of bioethics in the Ibero-American cultural domain. This trail-blazing work in the history of bioethics will be of enduring significance. I am deeply in their debt for having shouldered this far from easy task. Bioethics is the product of very particular socio-historical developments. Most prominent among them have been (1) the secularization of the dominant culture of North America, Western Europe, and now Central and South America as well, (2) a deflation of the status and authority of physicians as moral authorities able to guide their own profession, and (3) the salience of a post-traditional animus that gives central place to persons as isolated atomic sources of moral authority. Bioethics initially took shape in North America as a post-Christian, post-professional, post-traditional social movement. This bioethics sought to establish a moral discourse for the public forum, a moral practice able to give practical guidance in hospitals and other institutions, and a body of undergirding and justifying theoretical reflections.

**Fatal Secrets** Jan 30 2020 **DEADLY QUEST** When a top lieutenant in a notorious ring of human traffickers agrees to turn state's evidence, Immigration and Customs Enforcement senior agent Sonia Knight believes she'll finally take down the illegal operation's devilish mastermind, Xavier Jones. But when an FBI sting on Jones's criminal enterprise collides with an ICE stakeout, Sonia is enraged: Her informant's life and her evidence are in grave jeopardy. FBI agent Dean Hooper has been chasing Jones for years on money-laundering and tax-evasion charges and doesn't need or want a hot-headed ICE agent second-guessing his every move. When the Bureau is ordered to join forces with ICE, Sonia is just as livid: Her job is to save lives, not money. But their team effort pays off as fierce mutual resentment fades and passion flares—along with risk. For Jones is just one piece of a depraved puzzle, answering to an even more dangerous predator. Denied his expected prey, this pitiless fiend intends to make Sonia and Dean pay with their own blood.
