of Autair, founded by helicopter pioneer William 'Bill' Armstrong. Autair itself was an offshoot of his global helicopter operation, but Bill also had his finger in many aviation 'pies' including a multitude of operations in Africa, where so many aircraft and airlines were created, bought and sold with such prolificacy that even he could not remember the names and how many there were! There is also the background to Court Line's shipping concerns and the Caribbean operations of the hotel chains and regional airline Leeward Islands Air Transport which Court owned for a while. Covered in detail is the introduction, demonstration and use of the Lockheed TriStar wide-bodied airliner, the first of the type used in the Inclusive Tour business. Court Line Aviation and Tom Gullick's Clarksons Holidays brought to the forefront the concept of value-for-money Inclusive Tour holidays following the 'vertical integration' business model whereby owning and controlling each step of the holiday allowed the company to make a small profit at every

Zamboni Oct 23 2021 Enjoy a (slow) spin around the old rink in the only history of the world-famous Zamboni ice resurfacer...now available in an updated edition to celebrate the 70th birthday of these iconic machines! Until 1949, resurfacing an ice rink required an ungainly tractor-pulled shaver followed by three or four workers scooping away the shavings and then spraying and squeegeeing water. The process—including the refreezing—took more than an hour, as skaters or hockey players waited patiently. That all changed when a

tireless inventor by the name of Frank J. Zamboni—who also happened to own a skating rink in Southern California—put his mind to creating a quality sheet of ice in a shorter time. The story of the machines the Zamboni Company has produced—now as beloved among sports enthusiasts as ice skates and hockey pucks—is fully told in this fun-filled history of machine-age ingenuity and entrepreneurial spirit that forever changed the nature of ice sports. Inside this official illustrated story, created with the cooperation of the Zamboni Company, you'll be greeted by a wealth of visual material from their archives. Explore: The early development of Zamboni ice-resurfacing machines How they work and have evolved over the years The story behind figure-skating legend Sonja Henie's personal Zamboni ice resurfacer Anecdotes from drivers Stories behind paint schemes Colorful tales about Zamboni ice resurfacer drivers And much more Witness the design and workings of the latest models, such as the

Boeing 747 Jan 14 2021 Boeing's 747 'heavy' has achieved a fifty-year reign of the airways, but now airlines are retiring their fleets as a different type of long-haul airliner emerges. Yet the ultimate development of the 747, the -800 model, will ply the airways for many years to come. Even as twin-engine airliners increasingly

dominate long-haul operations and the story of the four-engine Airbus A380 slows, the world is still a different place thanks to the great gamble that Boeing took with its 747. From early, difficult days designing and proving the world's biggest-ever airliner, the 747 has grown into a 400-ton leviathan capable of encircling the world. Boeing took a massive billion-dollar gamble and won. Taking its maiden flight in February 1969, designing and building the 747 was a huge challenge and involved new fields of aerospace technology. Multiple fail-safe systems were designed, and problems developing the engines put the whole programme at risk. Yet the issues were solved and the 747 flew like a dream said pilots - belying its size and sheer scale. With its distinctive hump and an extended upper-deck allied to airframe, avionics and engine developments, 747 became both a blue-riband airliner and, a mass-economy class travel device. Fitted with ultra-efficient Rolls-Royce engines, 747s became long-haul champions all

over the world, notably on Pacific routes. across the Atlantic in January 1970, 747 became the must-have, four-engine, long haul airframe. Japan Airlines, for example, operated over sixty 747s in the world's biggest 747 fleet. By the renowned aviation author Lance Cole, this book provides a detailed yet engaging commentary on the design engineering and operating life and times of civil aviation's greatest sub-sonic achievement.

Aircraft Propulsion and Gas Turbine Engines

Dec 25 2021 Aircraft Propulsion and Gas Turbine Engines, Second Edition builds upon the success of the book's first edition, with the addition of three major topic areas: Piston Engines with integrated propeller coverage; Pump Technologies; and Rocket Propulsion. The rocket propulsion section extends the text's coverage so that both Aerospace and Aeronautical topics can be studied and compared. Numerous updates have been made to reflect the latest advances in turbine engines,

fuels, and combustion. The text is now divided into three parts, the first two devoted to air breathing engines, and the third covering non-air breathing or rocket engines.

Bedford Buses and Coaches Dec 01 2019

Bedford Buses and Coaches provides a detailed review of the entire range of purpose-built Public Service Vehicle (PSV) bus and coach chassis that carried the Bedford name from 1931 until production ceased in 1986. Bedfords were once a familiar sight on the roads not only of the United Kingdom, but throughout the world. They were produced in such volume that the advertising slogan 'You see them everywhere' was quite legitimately adopted by Vauxhall

Motors, the manufacturer of Bedford vehicles. Fully illustrated throughout with hundreds of photographs, the majority in colour, the book includes detailed descriptions of the Bedford petrol and diesel engines and other manufacturers engines used in Bedford bus and coach chassis. Detailed specifications and production histories are given for all the full-size passenger chassis including the WHB/WLB, WTB, OB/OWB, SB, VAS, VAL, VAM, Y-series and the Venturer. Road tests and owners' experiences are covered along with advice on buying and restoring a Bedford bus or coach. This book will be of great interest to all bus enthusiasts and historians and is superbly illustrated with 200 colour and 50 black & white photographs.
