[Governance, Social Control and Legal Reform in China](#) Jan 03 2020 This book outlines how community sentences and early  
release options are administered in China. Chen provides empirical insights into the emerging community sector of the  
Chinese penal system, and illustrates how Chinese criminal courts decide between imprisonment and community sentences.  
Drawing on interviews with government and non-governmental supervisors, this methodological and rigorous study offers an  
depth discussion of the enforcement of these community sanctions and measures (CSM). By using the CSM reform as an  
example, this book illustrates the adaptation of Chinese governance and social control. Ultimately, Chen argues that the  
current model of governance in China (disciplinary governance) cannot guarantee an effective state-agent relationship; it also  
denies local governments sufficient legitimacy to secure social stability. Finally, proposing that only the rule of law and an  
active judiciary can complement these two deficiencies, this book will be of great interest to scholars of criminology, law, and  
penology, as well as anyone who is interested in how China is held together in a socio-legal sense.

Scrum Fundamentals for Scrum Alliance (R) ScrumMaster (R) Certification Jan 25 2022 This guide book provides a single, comprehensive source of information on how to pass the Certified Scrum Master (R) Assessment of Scrum Alliance (R). This information includes relevant details on the Certification/Assessment, a strategy to prepare for and take the assessment, and finally, adequate study material for the assessment itself. The only purpose of this book is to provide a focused approach to help achieve the audience's focused objective: attain Scrum Master Credential at the minimum cost and time. It does not seek to provide an adequate background on Agile methodologies, or a complete description of Scrum principles and practices. The focus is on providing just as much information as is required; just in time. At present, there are two popular organizations providing different types and levels of role-based Scrum credentials: Scrum Alliance (R), and Scrum.org. The CSM (R) credential of Scrum Alliance is the most popular Scrum Master credential today, but acceptance of the PSM credentials (of Scrum.org) is rapidly growing. This book covers CSM (R) requirements in detail, while giving an adequate exposure to the PSM credential/assessment as well. This book is part of series, aimed at providing enough information and knowledge to pass the CSM (R) and/or PSM I Assessments. This book series has been developed primarily from my own experience, taking into account what was most important while preparing for the assessments, as well as while actually taking the assessments. A continual endeavor will be made to enhance to coverage and effectiveness of the content. While this book series is aimed at those interested in Scrum Master Certification, it will be useful for other certification aspirants - Product Owners, Developers since it provides quite an extensive coverage of Scrum Fundamentals, common to these roles.

The Mom Test Jan 11 2021 The Mom Test is a quick, practical guide that will save you time, money, and heartbreak. They say you shouldn't ask your mom whether your business is a good idea, because she loves you and will lie to you. This is technically true, but it misses the point. You shouldn't ask anyone if your business is a good idea. It's a bad question and everyone will lie to you at least a little. As a matter of fact, it's not their responsibility to tell you the truth. It's your responsibility to find it and it's worth doing right. Talking to customers is one of the foundational skills of both Customer Development and Lean Startup. We all know we're supposed to do it, but nobody seems willing to admit that it's easy to screw up and hard to do right. This book is going to show you how customer conversations go wrong and how you can do better.
